_Gce A Level Economics: The Examination Skills Guide_ Christabelle Soh
2021-09-29 Why do hard-working students who understand all the economic concepts not do well in GCE A Level Economics examinations? The reason is surprisingly simple. There are two areas that students need to do well in – content mastery and Economics-specific examination skills. Students who have revised the content thoroughly could still perform poorly because they lack the latter. This book is meant to fill this gap by being the first book that makes the full range of these examination skills explicit. The skills covered in this book are organized by question type. The first section covers the skills needed to answer case study questions and the second section covers the skills needed to answer essay questions. Each skill is illustrated using worked examples of examination-type materials and questions. At the end of each section, a summary of the skills required is provided to enable students to do a quick revision before the relevant papers.

_Economics: The User's Guide_ Ha-Joon Chang 2015-10-20 "Unlike many economists, who present only one view of their discipline, Chang introduces a wide range of economic theories--from the Classical economists to the Behavioral economists, from the Marxists to the Austrians--revealing how..."
each has its strengths and weaknesses and why there is no one correct way to explain economic behavior. Instead, by challenging received wisdom and exposing the myriad institutional, political, and technological forces that shape our economic world, Chang explains how our increasingly global and interconnected world works and is evolving. Economics: The User's Guide is a concise and expertly crafted guide to economic theories, and will give all who read it a clear and accurate picture of the global economy and how and why it affects our daily lives."--Jacket.
