Lord Haw-Haw William Joyce 2018-10-22 Along with his later Twilight over England, these two writings by Irish American William Joyce ("Lord Haw-Haw"), first published during his years of activism in Britain prior to the Second World War, sum up in many respects the worldview of this most famous radio propaganda broadcaster in history. Joyce was from its earliest inception an active member of Oswald Mosley's British Union of Fascists (BUF), and easily its best public speaker. After 1937, when he left the BUF, he formed his own organisation, the British National Socialist League (BNSL). It was for the latter organisation that Joyce penned National Socialism Now--his manifesto to the British people on how a National Socialist Britain would be structured. It includes sections on the "meaning of National Socialism," "The menace of Class War and Snobbery," "The National Socialist structure of government," the "Need of economic revolution," "Finance and the people," "Machinery and shorter hours," "Scientific regulation as opposed to Laissez Faire," a detailed discussion on the future of the Empire and foreign policy, the need to use "legal and constitutional methods," religious freedom, and the Jewish Question. Although the BNSL was highly active, it was never allowed the chance to test itself electorally, as the advent of the war--against which Joyce warned in his manifesto--saw the mass arrest of dissidents in Britain and Joyce's exile in Germany. The second essay, Fascism and Jewry, was written as a BUF leaflet in 1935, which describes the attacks on the BUF by Jews and the organisation's official response. This new edition has been completely reset with a new biography of the author, and has 54 supplementary footnotes to allow the modern reader to understand all the references in the text to events and personalities of the time.

SolderSmoke Bill Meara 2014-11-16 SolderSmoke is the story of a secret, after-hours life in electronics. Bill Meara started out as a normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly

large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill's struggles to understand (really understand) radio-electronic theory. Why does $P=IE$? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, and who have stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards." Get on the Air with HF Digital Steve Ford 2011-01-01 Step-by-step guide that will get you started in the fascinating world of HF digital technology. Written in an easy to understand, conversational style, this book will show you how to set up and operate your own HF digital. The text includes instructions for configuring software programs for popular modes such as RTTY, PSK31 and JT65. You will also learn about other digital communication modes including MFSK, Olivia and PACTOR.-- Book cover.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

An American Artist in Tokyo Michiyo Morioka 2007

Northwest artist Frances Blakemore had a lifelong love affair with Japan. She first went to Japan in 1935 and spent most of her adult life in Tokyo. Her experience with Japan encompassed the entire period from preWorld War II militarism to postwar modernization. Illustrated with photographs and striking color reproductions of her work, this book introduces the adventures of a remarkable American artist and provides a new perspective on U.S.Japanese cultural relations.

Taliban Narratives Thomas H. Johnson 2018-02-01 Why has the Taliban been so much more effective in presenting messages that resonate with the Afghan population than the United States, the Afghan government and their allies? This book, based on years of field research and the assessment of hundreds of original source materials, examines the information operations and related narratives of Afghan insurgents, especially the Afghan Taliban, and investigates how the Taliban has won the information war. Taliban messaging, wrapped in the narrative of jihad, is both to the point and in tune with its target audiences. On the other hand, the United States and its Kabul allies committed a basic messaging blunder, failing to present narratives that spoke to or, often, were even understood by their target audiences. Thomas Johnson systematically explains why the United States lost this "battle of the story" in Afghanistan, and argues that this defeat may have cost the US the entire war, despite its conventional and technological superiority.

The Worldwide Listening Guide John Figliozzi 2021-12-15 This new 10th edition of John Figliozzi's popular Worldwide Listening Guide explains radio listening in all of today's formats - "live," on-demand, WiFi, podcast, terrestrial, satellite, internet, digital and, of course, analog AM, FM and SW. The introductory section explains all the newest delivery methods for

radio, and the devices used to access broadcasts from around the world at any time of day or night. Listening to programs from distant lands is no longer a late-night activity dependant upon shortwave propagation conditions. There is a whole other world of radio out there for your listening enjoyment. Thousands of radio stations worldwide use the Internet to stream their broadcasts. Traditional radio is being augmented by computers, laptops, tablets, smartphones, satellites, WiFi receivers and multiplexed digital transmission methods, greatly enhancing the listening experience. Use *The Worldwide Listening Guide* to join in the excitement of listening to worldwide radio, listening to news, information, music and entertainment from around the world broadcast in English. The Guide is organized to make it easy and convenient to find radio programs of interest to you. All program listings are provided two ways: First, programs are listed by UTC time, station, days of broadcast, the type of program, and their frequencies and web addresses. Second, special Classified Listings are provided to help listeners find programs of specific interest. The 37 classified program listings make it easy to find programs by topic or subject area.

Nothing in Reserve Jack Lewis 2011 *Nothing in Reserve* invites the reader to an intimate glimpse of one soldier's journey to Iraq and back. True stories set in wartime, these are not war stories. Jack Lewis offers an unexpectedly vulnerable glimpse into one of the timeless tests men have faced: going to war, and returning home.

While the veteran will find honesty and truth within, this book brings a fresh insight to anyone interested in what it is we ask of our soldiers. Early stories give an authentic and often funny glimpse of military life, building to a crisis of self all too common among returning soldiers. Exploring the universal human question of how we move through our lives, acknowledging mortality and pain without becoming lost within it, Jack shares with us his own journey toward elusive redemption.
