SolderSmoke Bill Meara 2014-11-16

SolderSmoke is the story of a secret, after-hours life in electronics. Bill Meara started out as a normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill's struggles to understand (really understand) radio-electronic theory. Why does P=IE? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, and who have stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards."
The Yalu River Boys Dan King  
2018-07-03 The Yalu River Boys is the true story of the forgotten men from the Forgotten War. Follow a B-29 bomber crew as it battles Russian MiG-15 fighters in the heart of Mig-Alley during the Korean War. Learn the heartbreaking truth of the communist prison camp gulags, the cruelty of the North Korean enemy, and the propaganda attacks from friend and foe. Marvin King joined the US Air Force in peacetime but soon found himself in the midst of jet age aerial combat, captured and taken into China, and later subjected to the abject horror of a place in North Korea known only as The Caves.

Emergency Preparedness Meeting Ideas Virginia Nicols 2019-06-09 Dear Neighborhood Emergency Response Group Leader, How are you doing in your efforts to build a volunteer team? Struggling? In a slump? Over the past 15+ years I have been in each of those places with my own neighborhood group. But with some help from friends just when it was needed, we've kept our group alive and active. After all that effort, it just made sense to put what I've learned into a book so it could help other groups. This is the result! Emergency Preparedness Meeting Ideas offers 21 meeting ideas on a range of topics. Pick one that fits your group's interests and skills, or the time of the year, or a looming threat. Pick a meeting activity that will be fun, serious or surprising. If you have had CERT training, feel free to add some of that material. Note that these meetings are not part of the CERT curriculum. Rather, they are for regular citizens who may or may not have had any formal training but who care about their families and their neighbors. In any case, each meeting is fully developed. You can find one you like and use it for your very next meeting. Or, perhaps even better, hand it off to someone else on your team and let THAT person use it for your next meeting! Emergency Preparedness Meeting Ideas pulls together all the skills and experience I've had in a career as writer, marketer, trainer - and CERT volunteer. Add to that what I've learned from the hundreds of meetings I've planned or helped plan with professional organizations and my own neighbors. With that as background, I've fleshed out each meeting idea with Topic, Goal, Procedure, Materials needed and Comments. Sample checklists and diagrams are augmented with links to additional resources. Plus, there's a Meeting Planner Page at the end of each activity that makes it easy to organize each meeting -- and to assign volunteer roles. Some of the meeting ideas can be repeated. Most are meant to be customized or expanded upon. Whatever your needs, you can put the workbook to work immediately to plan your very next meeting. (Add it to one of our other Neighborhood Disaster Survival Guides and you will have an entire blueprint for building a neighborhood preparedness group!) These activities are meant to train, to entertain, and to inspire citizen volunteers to simply be as prepared as possible at all times. We subscribe to the belief that "The more we all know the better off we all will be!"

**The Worldwide Listening Guide** John Figliozzi 2021-12-15 This new 10th edition of John Figliozzi’s popular Worldwide Listening Guide explains radio listening in all of today’s formats—“live,” on-demand, WiFi, podcast, terrestrial, satellite, internet, digital and, of course, analog AM, FM and SW. The introductory section explains all the newest delivery methods for radio, and the devices used to access broadcasts from around the world at any time of day or night. Listening to programs from distant lands is no longer a late-night activity dependant upon shortwave propagation conditions. There is a whole other world of radio out there for your listening enjoyment. Thousands of radio stations worldwide use the Internet to stream their broadcasts. Traditional radio is being augmented by computers, laptops, tablets, smartphones, satellites, WiFi receivers and multiplexed digital transmission methods, greatly enhancing the listening experience. Use The Worldwide Listening Guide to join in the excitement of listening to worldwide radio, listening to news, information, music and entertainment from around the world broadcast in English. The Guide is organized to make it easy and convenient to find radio programs of interest to you. All program listings are provided two ways: First, programs are listed by UTC time, station, days of broadcast, the type of program, and their frequencies and web addresses. Second, special Classified Listings are provided to help listeners find programs of specific interest. The 37 classified program listings make it easy to find programs by topic or subject area.

**Parentology** Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the
latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

**Lord Haw-Haw** William Joyce 2018-10-22  
Along with his later Twilight over England, these two writings by Irish American William Joyce ("Lord Haw-Haw"), first published during his years of activism in Britain prior to the Second World War, sum up in many respects the worldview of this most famous radio propaganda broadcaster in history. Joyce was from its earliest inception an active member of Oswald Mosley's British Union of Fascists (BUF), and easily its best public speaker. After 1937, when he left the BUF, he formed his own organisation, the British National Socialist League (BNSL). It was for the latter organisation that Joyce penned National Socialism Now—his manifesto to the British people on how a National Socialist Britain would be structured. It includes sections on the "meaning of National Socialism," "The menace of Class War and Snobbery," "The National Socialist structure of government," the "Need of economic revolution," "Finance and the people," "Machinery and shorter hours," "Scientific regulation as opposed to Laissez Faire," a detailed discussion on the future of the Empire and foreign policy, the need to use "legal and constitutional methods," religious freedom, and the Jewish Question.
Although the BNSL was highly active, it was never allowed the chance to test itself electorally, as the advent of the war--against which Joyce warned in his manifesto--saw the mass arrest of dissidents in Britain and Joyce's exile in Germany. The second essay, Fascism and Jewry, was written as a BUF leaflet in 1935, which describes the attacks on the BUF by Jews and the organisation's official response. This new edition has been completely reset with a new biography of the author, and has 54 supplementary footnotes to allow the modern reader to understand all the references in the text to events and personalities of the time.

Denial of Justice in International Law Jan Paulsson 2005-10-06 Denial of justice is one of the oldest bases of liability in international law and the modern understanding of denial of justice is examined by Paulsson in this book, which was originally published in 2005. The possibilities for prosecuting the offence of denial of justice have evolved in fundamental ways and it is now settled law that States cannot disavow international responsibility by arguing that their courts are independent of the government. Even more importantly, the doors of international tribunals have swung wide open to admit claimants other than states: non-governmental organisations, corporations and individuals, and Paulsson examines several recent cases of great importance in his book.
