SolderSmoke Bill Meara 2014-11-16 SolderSmoke is the story of a secret, after-hours life in electronics. Bill Meara started out as a normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill’s struggles to understand (really understand) radio-electronic theory. Why does P=IE? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, and who have stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards."

Post-Hindu India Kancha Ilaiah 2009-11-17 Kancha Ilaiah, the author of the best selling book Why I am Not a Hindu, pens a thought-provoking critique of Brahmanism and the caste system in India, while anticipating the death of Hinduism as a direct consequence of, what he says is, its anti-scientific and anti-nationalistic stand. This work challenges Hinduism’s interpretation of history, with a virulent attack on caste politics, and also takes a refreshing look at the necessity of encouraging indigenous scientific thought for the sake of national progress. It establishes Hinduism as a `backward` religion that suppresses the latent scientific and productive potential of the Dalit-Bahujan communities. The author says this oppressive system of spiritual fascism is detrimental to both the future of religion and the nation-state. He thus criticizes the idea of spiritual justice or varnadharma, used to justify the caste system, as rooted in spiritual inequality. On a micro-analytical level, it is based on a thorough study of the productive knowledge systems of the Dalit-Bahujan communities of Andhra Pradesh, and provides a detailed day-to-day analysis of the scientific technological processes and events at work in the life of a member of these communities. On a macro level, it shows how Hinduism fails to negotiate between faith and reason, unlike other major religions of the world. Kancha Ilaiah critiques the intellectual imagination of the dominant communities and inspires the marginalized. In the process of doing so he crafts a work of immense socio-political interest which appeals to academics, and also to all those who are concerned about contemporary India’s polity and social fabric.

Emergency Preparedness Meeting Ideas Virginia Nicols 2019-06-09 Dear Neighborhood Emergency Response Group Leader, How are you doing in your

efforts to build a volunteer team? Struggling? In a slump? Over the past 15+ years I have been in each of those places with my own neighborhood group. But with some help from friends just when it was needed, we've kept our group alive and active. After all that effort, it just made sense to put what I've learned into a book so it could help other groups. This is the result! Emergency Preparedness Meeting Ideas offers 21 meeting ideas on a range of topics. Pick one that fits your group's interests and skills, or the time of the year, or a looming threat. Pick a meeting activity that will be fun, serious or surprising. If you have had CERT training, feel free to add some of that material. Note that these meetings are not part of the CERT curriculum. Rather, they are for regular citizens who may or may not have had any formal training but who care about their families and their neighbors. In any case, each meeting is fully developed. You can find one you like and use it for your very next meeting. Or, perhaps even better, hand it off to someone else on your team and let THAT person use it for your next meeting! Emergency Preparedness Meeting Ideas pulls together all the skills and experience I've had in a career as writer, marketer, trainer - and CERT volunteer. Add to that what I've learned from the hundreds of meetings I've planned or helped plan with professional organizations and my own neighbors. With that as background, I've fleshed out each meeting idea with Topic, Goal, Procedure, Materials needed and Comments. Sample checklists and diagrams are augmented with links to additional resources. Plus, there's a Meeting Planner Page at the end of each activity that makes it easy to organize each meeting -- and to assign volunteer roles. Some of the meeting ideas can be repeated. Most are meant to be customized or expanded upon. Whatever your needs, you can put the workbook to work immediately to plan your very next meeting. (Add it to one of our other Neighborhood Disaster Survival Guides and you will have an entire blueprint for building a neighborhood preparedness group!) These activities are meant to train, to entertain, and to inspire citizen volunteers to simply be as prepared as possible at all times. We subscribe to the belief that "The more we all know the better off we all will be!"
