Find My Device - Google

Find My Device makes it easy to locate, ring, or wipe your device from the web.

Array.prototype.find() - JavaScript | MDN - Mozilla

Jan 12, 2023 · The find() method is an iterative method. It calls a provided callbackFn function once for each element in an array in ascending-index order, until callbackFn returns a truthy value. find() then returns that element and stops iterating through the array. If callbackFn never returns a truthy value, find() returns undefined.

find | Microsoft Learn

Sep 2, 2022 · To search for a string with wild cards and regex patterns, you can use the FINDSTR command. If you use /c and /v in the same command line, this command displays a count of the lines that don't contain the specified string. If you specify /c and /n in the same command line, find ignores /n. This command doesn't recognize carriage returns.

[.find\(\) | jQuery API Documentation](#)

An element or a jQuery object to match elements against. Given a jQuery object that represents a set of DOM elements, the .find () method allows us to search through the descendants of these elements in the DOM tree and construct a new jQuery object from the matching elements. The .find () and .children () methods are similar, except that the latter only travels a single level ...
