Cursive Script Text Recognition in Natural Scene Images Saad Bin Ahmed 2019-11-21 This book offers a broad and structured overview of the state-of-the-art methods that could be applied for context-dependent languages like Arabic. It also provides guidelines on how to deal with Arabic scene data that appeared in an uncontrolled environment impacted by different font size, font styles, image resolution, and opacity of text. Being an intrinsic script, Arabic and Arabic-like languages attract attention from research community. There are a number of challenges associated with the detection and recognition of Arabic text from natural images. This book discusses these challenges and open problems and also provides insights into the complexities and issues that researchers encounter in the context of Arabic or Arabic-like text recognition in natural and document images. It sheds light on fundamental questions, such as a) How the complexity of Arabic as a cursive scripts can be demonstrated b) What the structure of Arabic text is and how to consider the features from a given text and c) What guidelines should be followed to address the context learning ability of classifiers existing in machine learning.

Unzipped Lauren Blakely 2019-01-14 Wanted: Dating coach to help hot nerd win back the woman of his dreams... Picture this - I'm ready to win back the love of my life, and I'm going big this time. We're talking book box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There's only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win you back" tune. The woman who flings open the second-floor window tells me my ex doesn't live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new "romance coach" and discover she's funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else's heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out. *Unzipped is a standalone spinoff in the Lucky in Love series of standalone*

High Performance Light Water Reactor Thomas Schulenberg 2012 Proceedings of International Conference on Artificial Intelligence, Smart Grid and Smart City Applications L. Ashok Kumar 2020-03-12 Due to the complexity, and heterogeneity of the smart grid and the high volume of information to be processed, artificial intelligence techniques and computational intelligence appear to be some of the enabling technologies for its future development and success. The theme of the book is “Making pathway for the grid of future” with the emphasis on trends in Smart Grid, renewable interconnection issues, planning-operation-control and reliability of grid, real time monitoring and protection, market, distributed generation and power distribution issues, power electronics applications, computer-IT and signal processing applications, power apparatus, power engineering education and industry-institute collaboration. The primary objective of the book is to review the current state of the art of the most relevant artificial intelligence techniques applied to the different issues that arise in the smart grid development.

Cement Chemistry H. F. W. Taylor 1997 H F W Taylor was for many years Professor of Inorganic Chemistry at the University of Aberdeen, Scotland. Since 1948, his main research interest has been the chemistry of cement. His early work laid the foundations of our understanding of the chemistry of Portland cement, and the one mainly reponsible for its hardening. Subsequent studies took him into many additional aspects of the chemistry and materials science of cement and concrete. His work has been recognized by Fellowships and by other honours and awards from many scientific societies in the UK, USA and elsewhere. This second edition of Cement chemistry addresses the chemistry and materials science of the principal silicate and aluminosilicate cements used in building and Civil engineering. Emphasis throughout is on the underlying science. The book deals more specifically with the chemistry of Portland cement manufacture and the nature of the resulting product, the processes that occur when this product is mixed with water, the nature of the hardened material, the chemistry of other types of hydraulic cement, and chemical and microstructural aspects of concrete, including processes that affect its durability. Since the first edition of this book was published in 1990, research throughout the world has greatly augmented our knowledge in all of these areas. The present edition has
been updated and revised to take account of these advances. The reader
will acquire a solid understanding of the subject and will be better
equipped to deal with the problems and pitfalls that can arise in
engineering practice as a result of inadequate understanding of the
relevant chemistry. It will serve both as an introduction to those entering
the subject for the first time and as a guide to the latest developments
for those already experienced in the field.

Napa Valley Historical Ecology Atlas
Robin Grossinger 2012-03-12
How has California's landscape changed? What did now-familiar places
look like during prior centuries? What can the past teach us about
designing future landscapes? The Napa Valley Historical Ecology Atlas
explores these questions by taking readers on a dazzling visual tour of
Napa Valley from the early 1800s onward—a forgotten land of brilliant
wildflower fields, lush wetlands, and grand oak savannas. Robin
Grossinger weaves together rarely-seen historical maps, travelers's
counties, photographs, and paintings to reconstruct early Napa Valley
and document its physical transformation over the past two centuries.
The Atlas provides a fascinating new perspective on this iconic
landscape, showing the natural heritage that has enabled the
agricultural success of the region today. The innovative research of
Grossinger and his historical ecology team allows us to visualize the past
in unprecedented detail, improving our understanding of the living
landscapes we inhabit and suggesting strategies to increase their health
and resilience in the future.

The Best Camera Is The One That's With You
Chase Jarvis 2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well
known as a visionary photographer, director, and social artist. In The
Best Camera Is The One That's With You, Chase reimagines,
and redefines the intersection of art and popular culture
together, through images shot with his iPhone. The pictures in the book, all taken
with Chase's iPhone, make up a visual notebook—a photographic
journal—from the past year of his life. The book is full of visually-rich
iPhone photos and peppered with inspiring anecdotes. Two megapixels at
a time, these images have been gathered and bound into a book that
represents a stake in the ground. With it, Chase underscores the idea
that an image can come from any camera, even a mobile phone. As Chase
writes, "Inherently, we all know that an image isn't measured by its
resolution, dynamic range, or anything technical. It's measured by the
simple—sometimes profound, other times absurd or humorous or
whimsical—effect that it can have upon us. If you can see it, it can move
you."
This book is geared to inspire everyone, regardless of their level of
photography knowledge, that you can capture moments and share them
with your friends, families, loved ones, or the world at the press of a
button. Readers of The Best Camera Is The One That’s With You will also
enjoy the iPhone application Chase Jarvis created in conjunction with this
book, appropriately named Best Camera. Best Camera has a unique set of
filters and effects that can be applied at the touch of a button. Stack the
effects, mix them, remix them. Best Camera also allows you to share
directly to a host of social marketing sites via www.thebestcamera.com, a
new online community that allows you to contribute to a living,
breathing gallery of the best iPhone photography from around the globe.
Together, the book, app, and website, represent a first-of-its-kind
ecosystem dedicated to encouraging creativity through picture taking
with the camera that you already have. The Best Camera Is The One

Meaning-based Translation Mildred L. Larson 1998 This textbook has been designed to emphasize the differences between languages and how this affects the translation of a text from one language into another. It is based upon the principle that the translator must first know the meaning of the source text before he can translate it into the receptor language. Meaning is presented as a structure which stands behind any text. Meaning-based, rather than form-based, translation is the goal of the textbook.
