Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious...
ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they’ve long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there’s something interesting about everything (...except maybe jackhammers).

Mots de L'histoire Jacques Rancière 1994 History in our day is still a story, and yet one from which we expect to tell the...
truth - not just the facts, the names and events of the past, but the invisible order and forces behind them. How can the language of history balance these seemingly contrary tasks - the narrative, the scientific, and the political? This is the question Jacques Ranciere explores in "The names of history", a meditation on the poetics of historical knowledge.

In the works of writers from Jules Michelet to Fernand Braudel, Ranciere traces an ongoing revolution in historical study, a movement that challenged, in the practice of language, the opposition of science and literature. By way of a commentary on Erich Auerbach, he shows how fictional narrative intertwines with historical narrative to produce a "truth" that retains mythical elements. The poetics of knowledge Ranciere develops here is an attempt to identify the literary procedures by which historical discourse escapes literature and gives itself the status of a science.

His book is also an appreciation of Braudel, whose work in the Annales school greatly advanced this project. Ranciere follows and extends Braudel's discursive production of new agencies of history, which accounts for both the material conditions in which history takes place and the language in
which it is written.
