Paper Families Estelle T. Lau demonstrates how exclusion affected Chinese American women and initiated the development of restrictive U.S. immigration policies and practices. Throughout history, Chinese Americans have been subjected to a variety of forms of record keeping and identification practices. Meanwhile, Chinese Americans took advantage of the system’s loopholes: Chinese citizens as were granted eligibility for immigration. The result was an elaborate system of "paper families," a way to use fictitious "paper children" to avoid the quotas. This practice could then use their kinship status as a basis for entry into the United States. This subterfuge necessitated the creation of "tribe sheets" outlining genealogies and providing village maps and other information that could be used during immigration proceedings. The system of "paper families" was also manipulated and thwarted through the use of regulations, forcing the U.S. government to adapt its practices and policies. Lau points out that the Exclusion Acts and the pseudo-familial structures that emerged in response have had lasting effects on Chinese American identity. She concludes that the United States can work towards undoing the damage to both individual Chinese American families and wider communities through the provision of recommendations for research, longitudinal studies, and analyses of macro-level data. They also provide a broad time perspective on the developments that have shaped the current situation.

which still appears on American coins today, has been used since 1782, reflecting how even the early Americans saw their country. But does a multicultural society system like this really work? That's the main point I will try to work out in my research paper. To get through this topic it needs to be defined very clearly what immigrations means in general and to describe briefly the immigration process from the early times till nowadays. This should be explained with some facts and figures to build the foundation of the following analysis. I will also show the reasons and problems of illegal immigration which is an important topic in the American society. That brings us to the next point the Hispanic Americans, which representativ for American immigrants. I will use The Hispanic Americans as an example to mark the assimilation problem of immigrants in the USA. Furthermore you can use this group of immigrants to explain the multicultural situation in the USA today. I will round off my work with the part of the conclusion and I
