The national information infrastructure (NII) holds the key to increasing the productivity of the American people. The NII is the technology underpinning the information revolution that is transforming our society and our lives. The NII is a collection of networks and computer systems that provide access to a wide range of information. It depends largely on interfaces—technologies by which people communicate with the computing systems of the NII. The NII provides access to a rich storehouse of information, offers a range of means for creating and sharing information, and will enable new forms of expression and communication.

In the 1997 report, "Making the 21st Century Work: The Role of Technology in the 21st Century," the Commission outlined the concept of a national information infrastructure and identified the key components and strategies needed to implement this vision. The report emphasized the importance of developing effective interfaces that allow a person to communicate with a computer system. Methods for designing, evaluating, and improving interfaces to increase ease and efficiency of use are critical to the development of the NII. The report called for the development of agents—intelligent computer programs or tools that allow a person to communicate with a computer system. The agents should be able to adapt to the user's needs and find the solutions that are most effective for the user. The report emphasized the importance of interfaces for effective communication, and called for the development of interface technologies that are user-friendly and efficient. The report also called for the development of interfaces that are accessible to all people, regardless of their age or ability. The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people.

The report also emphasized the importance of interfaces for effective communication, and called for the development of interface technologies that are user-friendly and efficient. The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people.

The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people. The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people. The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people.

The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people. The report recommended that the NII be designed with the needs of every-citizen interfaces in mind, and that the development of the NII be guided by principles that ensure that it is accessible to all people.
Care, diagnostic errors—inaccurate or delayed diagnoses—persever throughout all settings of care and continue to harm an unacceptable number of patients. It is likely that most people will experience at least one diagnostic error in their lifetime, sometimes with devastating consequences. Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment, providing unnecessary or harmful treatment, or resulting in psychological or financial repercussions. The committee concluded that improving the diagnostic process is not only possible, but also represents a moral, professional, and public health imperative. Improving Diagnosis in Health Care a continuation of the landmark Institute of Medicine reports To Err Is Human (2000) and Crossing the Quality Chasm (2001) finds that diagnosis—and, in particular, the occurrence of diagnostic errors—has been largely unappreciated in efforts to improve the quality and safety of health care. Without a dedicated focus on improving diagnosis, diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity. Just as the diagnostic process is a collaborative activity, improving diagnosis will require collaboration and a widespread commitment to change among health care professionals, health care organizations, patients and their families, researchers, and policy makers. The recommendations of Improving Diagnosis in Health Care contribute to the growing momentum for change in this crucial area of health care quality and safety. IT Essentials Companion Guide v7 Cisco Networking Academy 2028-B4-01 IT Essentials v7 Companion Guide supports the Cisco Networking Academy IT Essentials version 7 course. The course is designed for Cisco Networking Academy students who want to pursue careers in IT and learn how computers work, how to assemble computers, and how to safely and securely troubleshoot hardware and software issues. The features of the Companion Guide are designed to help you study and succeed in this course: • Chapter objectives—Review core concepts by answering the focus questions listed at the beginning of each chapter. • Key terms—Refer to the updated lists of networking vocabulary introduced, and turn to the highlighted terms in context. • Course section-numbering—Follow along with the course heading numbers to easily jump online to complete labs, activities, and quizzes referred to within the text. • Check Your Understanding Questions and Answer Key—Evaluate your readiness with the updated end-of-chapter questions that match the style of questions you see on the online course quizzes. This book is part of the Cisco Networking Academy Series from Cisco Press. Books in this series support and complement the Cisco Networking Academy.

Ace the IT Interview Paula Moreira 2007-12-11 Proven strategies for getting hired as an IT professional!
