Nationalism, Liberalism, and Progress: The dismal fate of new nations Ernst B. Haas 1997 Has global liberalism made the nation-state obsolete? Or, on the contrary, are primordial nationalist hatreds overwhelming cosmopolitanism? To assert either theme without serious qualification, according to Ernst B. Haas, is historically simplistic and morally misleading. Haas describes nationalism as a key component of modernity and a crucial instrument for making sense of impersonal, rapidly changing, and heterogeneous societies. He characterizes nationalism as a feeling of collective identity, a mutual understanding experienced among people who may never meet but who are persuaded that they belong to a community of kindred spirits. Without nationalism, there could be no large integrated state. He explores nationalism in five societies that had achieved the status of nation-states by about 1880: the United States, Britain, France, Germany, and Japan.

A Study Guide to the ISTQB® Foundation Level 2018 Syllabus Adam Roman 2018-11-13 This book is an excellent, helpful and up-to-date resource for all candidates preparing for the ISTQB Foundation Level certification exam based on the new Foundation Level 2018 Syllabus. Although there are plenty of sample questions and information related to the Foundation Level exam on the web, there are two problems with these: Firstly, most of them will soon be outdated, as the old syllabus and exams are going to be retracted in June 2019. Secondly, much of what is available is of poor quality, since many of the sample questions do not follow the strict ISTQB examination rules. This book stands out from other ISTQB-related works through a number of special features: Topicality: The material complies with the latest version of the Foundation Level syllabus published in 2018. Quality and originality: The exam questions are original, not redundant, of high quality, fully aligned with the ISTQB exam requirements and have not been published before. Huge amount of material: It includes 5 full sample exams (200 questions in total) designed in accordance with the ISTQB exam rules, and with the appropriate distribution of questions regarding the learning objectives and K-levels. Well-thought-out sample questions: The questions not only appropriately cover the corresponding learning objectives (LOs), but also to show the typical pitfalls. Diversity: The questions from various sample exams related to the same LO are diversified, that is, each of them points out different aspects of a given LO. This is an excellent method for better and more effective learning and preparing for the exam. Comprehensive, intelligible explanations: All answers are justified and there are detailed and easy-to-understand explanations not only of why a given answer is correct, but also why all the others are wrong. A lot of bonus material: The book includes a great number of chapters that explain the white-box and black-box test techniques in a detailed way, a set of exercises on test techniques and the detailed solutions to them, and much more. Mathematics Year 3 David Hillard 2015-09-25 Biogeochemistry of Ancient and Modern Environments P. A. Trudinger 2013-06-29 This volume contains a selection of papers presented to the Fourth International Symposium on Environmental Biogeochemistry (ISEB), and a conference on Biogeochemistry in Relation to Mining Industry and Environmental Pollution (Leaching Conference), held in Canberra, Australia on August 26-31 and September 3-4, 1979, respectively. The ISEB were established to provide "a forum for uninhibited exchange of information and ideas among the biological, chemical, atmospheric and geological scientists working in the common area of biogeochemistry, encompassing soil and other earth sciences as well as the hydrosphere and atmosphere." By linking the fourth ISEB with the Leachin~ Conference the scope of discussions was extended to encompass the application of biogeochemical processes to the mining industry.
