Filter Trap

The Filter Trap A. L. Lorentz 2016-04-08 An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear.As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena Christmas with his wife and children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch above Los Angeles Allan can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why 2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening. Their next mission: Find Allan Sands and the other scientists on the president's secret First Contact list.Will the world be ready to hear what the scientists conclude about the mysterious so-called Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started.Equal parts high concept and high action, the Filter Trap explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart.

All about the D Lex Martin 2019-03-06 Temptation has never come in a hotter package. You know how people say you can never believe what you read on the interwebs? That a hot guy online is probably a creeper with a beer gut and a shoe fetish, not the sexy beast he pretends to be? So I had no clue that the anonymous blogger who contacted my law firm about his naughty website would be droolworthy in real life. Not that I'm interested in him in that way. Attorneys can't go around sleeping with their clients. Not even if he is the most beautiful man I've ever met and so ridiculously smart he makes my nerdy-girl heart sigh. Besides, he has too much on the line to risk taking a chance on the insane chemistry building between us. We both do. I've always followed the rules. Too bad he makes me want to break each and every one of them.

"**Only the Super-Rich Can Save Us!**" Ralph Nader 2011-01-04 "In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion, Warren Buffett watched the horrors of Hurricane Katrina unfold on television in early September 2005. . . . On the fourth day, he beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . . He knew exactly what he had to do. . . ." So begins the vivid fictional account by political activist and bestselling author Ralph Nader that answers the question, "What if?" What if a cadre of superrich individuals tried to become a driving force in America to organize and institutionalize the interests of the citizens of this troubled nation? What if some of America's most powerful individuals decided it was time to fix our government and return the power to the people? What if they focused their power on unionizing Wal-Mart? What if a national political party were formed with the sole purpose of advancing clean elections? What if these seventeen superrich individuals decided to galvanize a movement for alternative forms of energy that will effectively clean up the environment? What if together they took on corporate goliaths and Congress to provide the necessities of life and advance the solutions so long left on the shelf by an avaricious oligarchy? What could happen? This extraordinary story, written by the author who knows the most about citizen action, returns us to the literature of American social movements—to Edward Bellamy, to Upton Sinclair, to John Steinbeck, to Stephen Crane—reminding us in the process that changing the body politic of America starts with imagination.

Creating Effective Learning Environments Ingrid Crowther 2010-12-21 Creating Effective Learning Environments takes curriculum development to another level: it fills the gap between theory and practice. This text helps readers see the curriculum from a child's perspective and understand how that perspective is linked to learning and theory. It is the author's view that the centre of any curriculum is the child; this text begins not with general theories or applications that are suitable for many, but with each individual child. The theory and methodology of this text are integrated around the actual experiences of children, presented in a logical flow, and embracing current philosophies about integration, play, bias, and learning practices.

Houses of Maine Elliott + Elliott Architecture 2013-05-21 "There have been many influences for us over the years but the defining factor in our firm's work is that we practice architecture in Maine, amidst extraordinary and ordinary beauty." Although it has become something of a cliché for architects to say they pay close attention to a building's site and surroundings, for Elliott + Elliott Architecture, residing, working, and building along Maine's rugged coast has translated not only into refreshing architectural forms whose roots in tradition are clear, but also into collaborative processes with local builders and artisans, in the spirit of the shipbuilders and craftsmen of the state's history. Featuring six of their most emblematic residential projects, Houses of Maine demonstrates that, in the right hands, the rough-around-the-edges individualism and often harsh natural environment for which this coast is known allow for a balanced, serene, and vernacular architecture whose links with the past create nothing less than a confidently optimistic preview of the region's architectural future.
