Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration’s three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Costwise and Inland Waters navigation.

The King Records Legacy: Acts I, II, III University of University of Cincinnati School of Architecture 2022-03-29 King Records was an independent recording studio, founded in 1943 in the Evanston neighborhood of Cincinnati, Ohio. It was at one point the sixth largest record company in the United States, representing artists such as James Brown, Bonnie Lou, The Stanley Brothers, and Otis Williams and The Charms. Though the company closed in 1971, the site still stands, and was even given a historical marker by the Rock and Roll Hall of Fame in 2008. The Cincinnati musical community and the Evanston neighborhood community wished to revitalize and restore King Records’ legacy, leading the University of Cincinnati’s School of Architecture and Interior Design to participate in a design studio experience to research King Records’ history and to submit design proposals to repurpose the King Records site. The resultant illustrative documentation is captured in The King Records Legacy: Acts I, II, III, providing an encapsulating history of King Records’ influence in America’s mid-twentieth century music culture, as well as the visions of eight renovation design proposals for the King Records historic site. The King Records Legacy: Acts I, II, III gives an account of the semester-long immersive study by fourth-year architecture and interior design students to decipher the racially divided mid-twentieth century social culture and the emergence of King Records as a unique melting pot of diverse artists and musical genres of early American vernacular pop music. Next, the students translate their findings into cohesive architectural proposals for a musical community center. Eight design proposals produced by eight collaborative teams map out visions for renovating the historic King Records site to a community venue offering a view of King’s historic position in contemporary music history and a facility for music education and the promotion of musical arts.

Sewing for Fashion Designers Anette Fischer 2015-04-06 This comprehensive guide explores the fundamental sewing methods fashion designers need and teaches professional garment construction. Chapter One introduces sewing tools and machinery (including industrial machines). It discusses how to work with patterns and explains cutting-out methods. Chapter Two is devoted to different fabrics and how they work, focusing on the construction of a garment, including fastenings and trimmings, and the use of materials to support structured pieces, such as corsets. Hand-sewing techniques and basic seams are explored in Chapter Three. Techniques are demonstrated with step-by-step photographic guides combined with technical drawings. A guide to making garment details and decorations, such as pockets, waistlines, and necklines, is found in Chapter Four. Chapter Five addresses fabric-specific techniques, for everything from lace to neoprene. The best technical approaches to use for patternmaking and construction are discussed for each fabric. Catwalk images demonstrate how these kinds of techniques are employed by designers.
