Killing For Profit Julian Rademeyer

Thank you very much for downloading Killing For Profit Julian Rademeyer. As you may know, people have look numerous times for their favorite books like this Killing For Profit Julian Rademeyer, but end up in malicious downloads. Rather than enjoying a good book with a cup of tea in the afternoon, instead they cope with some infectious bugs inside their computer.

Killing For Profit Julian Rademeyer is available in our book collection an online access to it is set as public so you can download it instantly.

Our digital library hosts in multiple countries, allowing you to get the most less latency time to download any of our books like this one. Merely said, the Killing For Profit Julian Rademeyer is universally compatible with any devices to read

Animal Education John Broadus Watson 1903

African Rhino Richard Emslie 1999 The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild.

An African Love Story Daphne Sheldrick 2012-03-01 Daphne Sheldrick’s best-selling love story of romance, life and elephants, An African Love Story: Love, Life and Elephants is an incredible story from Africa's greatest living conservationist. A typical day for Daphne involves rescuing baby elephants from poachers; finding homes for orphan elephants, all the while campaigning the ever-present threat of poaching for the ivory trade. An African Love Story is the incredible memoir of her life. It tells two stories - one is the extraordinary love story which blossomed when Daphne fell head over heels with Tsavo Game Park and its famous warden, David Sheldrick. The second is the love story of how Daphne and David, who devoted their lives to saving elephant orphans, at first losing every infant under the age of two until Daphne at last managed to devise the first-ever milk formula which would keep them alive. 'Compulsively readable', Mail on Sunday 'An enchanting memoir', Telegraph Daphne Sheldrick has spent her entire life in Kenya. For over 25 years, she and her husband, David, the famous founder of the the giant Tsavo National Park, raised and rehabilitated back into the wild orphans of misfortune from many different wild species. These included elephants, rhinos, buffaloes, zebra, eland, kudu, impala, warthogs and many other smaller animals. In 2006 she was made Dame Commander of the British Empire by the Queen.

Rogue Johann van Loggerenberg 2016-09-19 The story of a ‘rogue unit’ operating within the South African Revenue Service (SARS) became entrenched in the public mind following a succession of sensational reports published by the Sunday Times in 2014. The unit, the reports claimed, had carried out a series of illegal spook operations: they had spied on President Jacob Zuma, run a brothel, illegally bought spyware and entered into unlawful tax settlements. In a plot of Machiavellian proportions, head of the elite crime-busting unit Johann van Loggerenberg and many of SARS’s top management were forced to resign. Van Loggerenberg’s select team of investigators, with their impeccable track record of busting high-level financial fraudsters and nabbing tax criminals, lost not only their careers but also their reputations. Now, in this extraordinary account, they finally get to put the record straight and the rumours to rest: there was no ‘rogue unit’. The public had been deceived, seemingly by powers conspiring to capture SARS for their own ends. Shooting down the allegations he has faced one by one, Van Loggerenberg tells the story of what really happened inside SARS, revealing details of some of the unit’s actual investigations.

The Extinction Market Vanda Felbab-Brown 2017-11-15 The planet is currently experiencing alarming levels of species loss caused in large part by intensified poaching and wildlife trafficking driven by expanding demand, for medicines, for food, and for trophies. Afflicting many more species than just the iconic elephants, rhinos, and tigers, the rate of extinction is now as much as 1000 times the historical average and the worst since the dinosaurs died out 65 million years ago. In addition to causing irretrievable biodiversity loss, wild - trafficking also poses serious threats to public health, potentially triggering a global pandemic. The Extinction Market explores the causes, means, and consequences of poaching and wildlife trafficking, with a view to finding ways of suppressing them. Vanda Felbab-Brown travelled to the markets of Latin America, South and South East Asia, and eastern and southern Africa, to evaluate the effectiveness of various tools, including bans on legal trade, law enforcement, and interdiction; allowing legal supply from hunting or farming; alternative livelihoods; anti-money-laundering efforts; and demand reduction strategies. This is an urgent book offering meaningful solutions to one of the world’s most pressing crises.

Between the Lines - The Spirit of South African Rugby Matthew Knight 2012-10-09 It’s in the early morning, usually on dry, icy cold, thorn-strewn fields, that rugby legends are created. The boys are kaalvoet, the linesmen are spectators, sometimes unwillingly plucked from the makeshift stands, and the aroma of boerewors on hot coals drifts across the field. It is here that the love for the game of rugby is born, where passion is first ignited. Between the Lines is a journey to the heart of South Africa’s rugby spirit. Join Matthew Knight as he travels from Bishops in Cape Town - the birthplace of rugby in South Africa - to the hallowed corridors of Hilton College and Michaelhouse in KwaZulu-Natal, to dusty platteland dorps where Bok greats such as Os du Randt were nurtured, and Grey College in Bloemfontein, the undisputed nursery for future Springboks. Knight meticulously mines South Africa’s rich rugby heritage and interviews some of the former and current greats of the game. Characters such as Schalk Burger Snr and son, ‘Skonk’ Nicholson (South Africa’s longest-serving coach), Mark Andrews and Nick Mallett, among many others, share their memories of the game that has left an indelible impression on their lives, as well as the lives of those who cheered them on from the stands. This is Knight’s quest to discover the foundation of Springbok success: schools’ rugby.

The Role of the Judiciary in Environmental Governance Louis J Kotzé 2009-04-17 This important book investigates the environmental legal frameworks, court structures and relevant jurisprudence of nineteen countries, representing legal systems and legal cultures from a diverse array of countries situated across the globe. In doing so, it distils comparative trends, new developments, and best practices in adjudication endeavours, highlighting the benefits and shortcomings of the judicial approach to environmental governance.

African Muckraking Anya Schiffrin 2018-04-10 African Muckraking is the first collection of investigative and campaigning journalism written by Africans about Africa. The editors delved into the history of modern Africa to find the most important and compelling pieces of journalism on the stories that matter. This collection of 41 pieces of African journalism includes passionate and committed writing on labor abuses, police brutality, women’s rights, the struggle for democracy and independence on the continent and other subjects. Each piece of writing is introduced
by a noted scholar or journalist who explains the context and why the journalism mattered. Some of the highlights include: Feminist writing from Tunisia into the 1930s, exposés of the secret tactics planned by the South African government during apartheid, Richard Mngabana’s searing description of the albino brothers in Tanzania who fear for their lives, and the reporting by Libyan journalist Mae Azango on genital cutting, which forced her to go into hiding. Many African Muckrakers have been imprisoned and even killed for their work. African Muckraking is a must-read for anyone who cares about journalism and Africa.

Unfair Game Michael Ashcroft 2020-06-16 In April 2019 Lord Ashcroft published the results of his year-long investigation into South Africa’s captive-bred lion industry. Over eleven pages of a single edition of the Mail on Sunday he showed why this sickening trade, which involves appalling cruelty to the ‘King of the Jungle’, is thriving. South Africa, and its embattled president, Cyril Ramaphosa, have become a stain on the country. Unfair Game, to be published in June 2020, features the shocking results of a new inquiry Lord Ashcroft has conducted into South Africa’s lion business. In the book, he shows how tourists are unwittingly being used to support the abuse of lions; he details how lions are being tranquillised and then hunted in enclosed spaces; he urges the British government to ban the import of captive-bred lion trophies; and he demonstrates why Asia’s insatiable appetite for lion bones has become a multimillion-dollar business linked to criminality and corruption, which now underpins South Africa’s captive lion industry.

The rollout of South Africa’s chemical and biological warfare program

The Beautiful Screaming Of Pigs Daemon Gatuz 2012-10-09 I was back in a hospital bed, with a doctor sitting beside me. ‘Try to describe how you feel,’ he said. ‘I feel dislocated,’ I told him. ‘Not part of life.’ ‘Whose life?’ ‘Mine. Everybody’s. Life.’ And the familiar sensation started up in my belly, the shaking spread into my arms. I covered my face with my hands, but I couldn’t block out what I saw. A year ago Patrick Winter, a young South African, was sent to Namibia to complete his military service and to defend his country against ‘terrorism’. Now he is back, to meet Godfrey, his childhood friend, and to witness the country’s first free elections. But Patrick needs to confront and process much more than a country in transition, and in doing so he is forced to revisit his past and to face the pain and the demons that haunt him.

Landscape of Memory Sabine Marschall 2009-12-14 This book critically investigates the flourishing monument phenomenon in post-apartheid South Africa, notably the political discourses that fuel it; its impact on identity formation, its potential benefits, and most importantly its ambivalences and contradictions.

Project Coast Chândré Gould 2002 Project Coast was the codename for a covert programme, established by the South African apartheid government in 1981, to develop a range of chemical and biological agents intended for use against opponents of the regime within and outside the state. This book examines the history of the project, its operation outside ordinary political, military and financial controls, through to its eventual demise in 1995. It draws on information made public at the Truth and Reconciliation Commission hearings, as well as evidence presented at the criminal trial of Dr Wouter Basson, the project’s director.

Thinking up a Hurricane Martinique Stilwell 2012-09-28 In the spring of 1977 Frank Stilwell launched Vingila, 17 tons of welded together 11-millimetre steel plates, in Durban harbour. An electrician by trade, Frank’s experience of sailing amounted to not very much - anmc.mcgill.ca
of the criminal world of wildlife trafficking — the poachers, the traders, and the customers — and of those fighting against it. Journalist Rachel Love Nuwer plunges the reader into the underground of global wildlife trafficking, a topic she has been investigating for nearly a decade. Our insatiable demand for animals — for jewellery, pets, medicine, meat, trophies, and fur — is driving a worldwide poaching epidemic, threatening the continued existence of countless species. Illegal wildlife trade now ranks among the largest contraband industries in the world, yet compared to drug, arms, or human trafficking, the wildlife crisis has received scant attention and support, leaving it up to passionate individuals fighting on the ground to try to ensure that elephants, tigers, rhinos, and more are still around for future generations. Poached takes readers to the front lines of the trade: to killing fields in Africa, traditional-medicine black markets in China, and restaurants around the world. Nuwer’s investigative first-hand reporting that took her to ten countries, Nuwer explores the forces currently driving demand for animals and their parts; the toll that demand is extracting on species across the planet; and the conservationists, rangers, and activists who are working to stop the impending extinctions — people who believe this is a battle that can be won, that our animals are not beyond salvation. Poacher's of the World Joshua Horwitz 2014-07-01 Documents the efforts of crusading lawyer Joel Reynolds and marine biologist Ken Balcom to expose a covert U.S. Navy sub detection system that caused whales to beach themselves, an effort that challenged the navy’s loyalties and pitted them against powerful military adversaries. The Zuma Years Richard Calland 2013-08-16 The face of power in South Africa is rapidly changing – for better and for worse. The years since Thabo Mbeki was swept aside by Jacob Zuma’s ‘coalition of the wounded’ have been especially tumultuous, with the rise and fall of populist politicians such as Julius Malema, the terrible events at Marikana, and the embarrassing Guptagate scandal. What lies behind these developments? How does the Zuma presidency exercise its power? Who makes our foreign policy? What goes on in cabinet meetings? What is the state of play in the Alliance – is the SACP really more powerful than before? And, as the landscape shifts, what are the opposition’s prospects? In The Zuma Years, Richard Calland attempts to answer these questions, and more, by holding up a mirror to the new establishment; by exploring how people such as Malema, Chief Justice Mogoeng Mogoeng and DA parliamentary leader Lindiwe Mazibuko have risen so fast; by examining key drivers of transformation in South Africa, such as the professions and the universities; and by training a spotlight on the toxic mix of money and politics. The Zuma Years is a fly-on-the-wall, insider’s approach to the people who control the power that affects us all. It takes you along the corridors of government and corporate power, mixing solid research with vivid anecdote and interviews with key players. The result is an accessible yet authoritative account of who runs South Africa, and how, today. Tortoises and Freshwater Turtles IUCN/SSC Tortoise and Freshwater Turtle Specialist Group 1989-01-01 Cheetahs: Biology and Conservation 2017-11-28 Cheetahs: Biology and Conservation reports on the science and conservation of the cheetah. This volume demonstrates the interdisciplinary nature of research and conservation efforts to study and protect the cheetah, the world’s fastest land animals with unique morphological, genetic, physiology, ecology and behavior of the species, as well as distribution reports from range countries. These introductory chapters lead into discussions of the challenges facing cheetah survival, including habitat loss, declining prey base, human-wildlife conflict, illegal trade, and newly-emerging threats, notably climate change. This book also focuses on conservation strategies and solutions, including environmental education and alternative livelihoods. Chapters on the role of captive cheetahs to conservation and the long-term research of the species are included, as are a brief discussion of the methods and analyses used to study cheetah. The book concludes with the conservation status and future outlook of the species. Cheetahs: Biology and Conservation is a valuable resource for the regional and global communities of cheetah conservationists, researchers, and academics. Although cheetah focussed the book provides information relevant to the study of broader topics such as wildlife conservation, captive breeding, habitat management, conservation biology and animal behaviour. Cover photograph by Angela Scott includes chapters by the world’s leading cheetah researchers and practitioners, who have focused their efforts on this high-profile species of conservation concern Provides findings as a combination of scientific detail and basic explanations so that they can be available not only to cheetah researchers and conservationists, but also to policy makers, business leaders, zoo managers, academics, students, and people interested in the cheetah and its future Presents the current knowledge of the species, helping lay the foundations and best practices for cheetah conservation and research worldwide Additional protocols and forms (which were provided by authors) can be found at the Cheetahs: Biology and Conservation companion site: https://www.elsevier.com/books-and-journals/book-companion/978-0128040881 Killing for Profit Julian Rademeyer 2013-03-15 *On the black markets of Southeast Asia, rhino horn is worth more than gold, cocaine and heroin. This is the chilling story of a two-year-long investigation into a dangerous criminal underworld and the merciless syndicates that will stop at nothing to obtain their prize. It is a tale of greed, folly and corruption, and of an increasingly desperate battle to save the rhino—which has survived for more than fifty million years—from extinction.*—P.-[4] of cover. IUCN Red List Categories and Criteria International Union for Conservation of Nature and Natural Resources 2001 The IUCN Red List Categories and Criteria provide an easily and widely understood system for classifying species at high risk of global extinction, so as to focus attention on conservation measures designed to protect them. This latest version of the classification system was adopted by the IUCN Council in February 2001 and reflects comments from the IUCN and SSC memberships and the final meeting of the Criteria Review Working Group. Steeped in Blood David Klatzow 2010-11-05 Bloody crimes of passion, political assassinations, sinister poisonings, investment fraud and mass mining disasters... Dr David Klatzow has seen it all. During his extraordinary twenty-six-year career as South Africa’s foremost independent forensic scientist, he has investigated countless high-profile and notorious cases. Steeped in Blood provides gripping accounts of dozens of these matters, including the infamous deaths of Brett Kebble and Inge Lotz, the Helderberg aeroplane crash and the frustrating investigations of the brutal apartheid years. From the Gugulethu Seven and Trojan Horse massacres to the assassination of David Webster, Klatzow’s investigations reveal his fierce determination to unveil the truth in spite of overwhelming state obstructions, police bungling and cover-ups. Unfazed by controversy and unwilling to accept no for an answer, Klatzow’s tenacity, fearlessness and forensic know-how are used to brilliant effect in these fascinating cases. This book exposes a demanding and sinister world where the rewards are equalled only by the frustrations, and where the truth is always elusive. But the truth is out there, and David Klatzow will find it. Spud John van de Ruit 2012-09-18 It's South Africa 1990. Two major events are about to happen: the release of Nelson Mandela and, more importantly, it's Spud Milton's first year at an elite boys only private school. Cursed with parents from well beyond the liberal fringe, a sensible best friend and a dosh of strange characters, Spud has his hands full trying to adapt to his new home. Surrounded by names such as Gecko, Rambo, Rain Man and Mad Dog, Spud takes his first tentative steps along the path to manhood. (The path, it seems, could be a rather long road.) Armed with only his wits and his diary, Spud takes us from illegal night swimming to the red-hot furnace of the cricket pitch, from ghostbusting to a catastrophic family vacation. He also invites us into the mind of a boy struggling to come to terms with a strange new world; a boy whose eyes are being opened to love, friendship and complete insanity.
There are now fewer than 5,000 tigers in all of India, and the South China, Sumatra, Bali, Java, and the Russian Far East. The large species, the situation is becoming ever more critical. One medicine, but as wildlife habitats are shrinking for the hunted Chinese medicine relies on herbs and other plants, and is not a poaching is increasing at an alarming rate. Most of traditional medicine is a leading cause of species endangerment in Asia, and the economies and growing wealth in parts of Asia are increasing conflict relationships useful for green criminological research, this study is essential reading for scholars and academics in criminology, as well as those interested in crime, law and justice. Killing for Profit Julian Rademeyer 2012-11-08 A terrifying true story of greed, corruption, depravity and ruthless criminal enterprise ... On the black markets of Southeast Asia, rhino horn is worth more than gold, cocaine and heroin. This is the chilling story of a more than two-year-long investigation into a dangerous criminal underworld where merciless syndicates will stop at nothing to attain their prize. It is a tale of greed, folly and corruption, and of an increasingly desperate battle to save the rhino – which has survived for more than 50 million years – from extinction. Killing for Profit is a meticulous, devastating and revelatory account of one of the world’s most secretive trades. It exposes poachers, gangsters, con men, mercenaries, killers, gunrunners, diplomats, government officials and other key players behind the slaughter. And it follows the bloody trail from the front lines of the rhino wars in South Africa, Zimbabwe and Mozambique to the medicine markets of Vietnam and the lair of a wildlife-trafficking kingpin on the banks of the Mekong River in Laos. Tiger Bone & Rhino Horn Richard Ellis 2013-02-22 In parts of Korea and China, moon bears, black but for the crescent-shaped patch of white on their chests, are captured in the wild and brought to "bear farms" where they are imprisoned in squeeze cages, and a steel catheter is inserted into their gall bladders. The dripping bile is collected as a cure for ailments ranging from an upset stomach to skin burns. The bear may live as long as fifteen years in this state. Rhinos are being illegally poached for their horns, as are tigers for their bones, thought to improve virility. Booming economies and growing wealth in parts of Asia are increasing demand for rhino horn, which is used medicinally. Some species are being sacrificed for temporary treatments for nausea and erectile dysfunction. Richard Ellis, one of the world's foremost experts in wildlife extinction, brings his alarm to the pages of Tiger Bone & Rhino Horn, in the hope that through an exposure of this drug trade, something can be done to save the animals most direly threatened. Trade in animal parts for traditional Chinese medicine is a leading cause of species endangerment in Asia, and poaching is increasing at an alarming rate. Most of traditional Chinese medicine relies on herbs and other plants, and is not a cause for concern. Ellis illuminates those aspects of traditional Chinese medicine, but as wildlife habitats are shrinking for the hunted large species, the situation is becoming ever more critical. One hundred years ago, there were probably 100,000 tigers in India, South China, Sumatra, Bali, Java, and the Russian Far East. The South Chinese, Caspian, Balinese, and Javan species are extinct. There are now fewer than 5,000 tigers in all of India, and the numbers are dropping fast. There are five species of rhinoceros--three in Asia and two in Africa--and all have been hunted to near extinction so their horns can be ground into powder, not for aphrodisiads, as commonly thought, but for ailments ranging from arthritis to depression. In 1930, there were 80,000 black rhinos in Africa. Now there are fewer than 2,500. Tigers, bears, and rhinos are not the only animals pursued for the sake of alleviating human ills--the list includes musk deer, sharks, saiga antelope, sea horses, porcupines, monkeys, beavers, and sea lions--but the dwindling numbers of those rare species call us to attention. Ellis tells us what has been done successfully, and contemplates what can and must be done to save these animals or, sadly, our children will witness the extinction of tigers, rhinos, and moon bears in their lifetime. Recognising Postnatal Depression Andrea Taub-Da Costa 2012-09-28 The journey to motherhood is sometimes clouded with unrealistic expectations and society's unfair judgement of any woman who isn't immediately blissfully happy with her new baby. Giving birth is a major life adjustment and rite of passage for all mothers. This book is for anyone who is struggling or has struggled on that journey, who may be grappling with confusion, anxiety, fear or anger. It offers hope, support and comfort and a clear path out of what may feel like a bewildering or overwhelming situation. Postnatal depression affects around 30 per cent of mothers, but partners, children, extended family, friends and colleagues all feel the effect, and no amounts to nothing if they know, or do not wish to acknowledge, that this misunderstood illness can be treated just like any other. Written by a medical doctor, a clinical psychologist and their patient, a writer, each author contributes her own personal experience and expertise in the area of postnatal depression to an open and enlightening discussion of just what this illness is, how to recognise it and ways to achieve recovery of body, mind and spirit. They call on health care professionals and society at large to respond timeously, knowledgeably and with empathy to what is, for many mothers, a medical emergency. Women from different walks of life agreed to share with the authors, and now with the reader, their tough yet transformational experiences of postnatal depression, offering hope and encouragement and revealing the power of healing through openness and the telling of their stories. Ivory, Horn and Blood Ronald Orenstein 2013 Describes the illegal trafficking of elephant ivory and rhinoceros horns and the implications for these endangered animals. Troublemakers Anton Harber 2010 A collection of finalists of the Taco Kuiper Award for Investigative Reporting, this book illustrates the revival of hard-hitting investigative reporting in South Africa and highlights its important role. These exposés range from government corruption and white collar crime to environmental and social issues. With a comprehensive discussion on the state of South African journalism, these stories were originally published by the country's most reputable newspapers and make no qualms about covering the controversial: the horrors of Zimbabwe prisons, shifty politicians, and shoot-to-kill policemen. My Life With Leopards - Graham Cooke's Story Fransje van Riel 2012-09-03 Human emotion and animal instinct meet poignantly when two six-week-old leopard cubs become the charge of 22-year-old game ranger Graham Cooke at Londolozi. Staying with the cubs in an unfenced bush camp surrounded by lions, hyenas and other predators, he must gain their trust before he begins to guide them towards release in the wild. It takes weeks of patience and gentleness for Graham to be accepted into the cubs’ small family unit and to find ways of communicating with the young leopards as he slowly begins to introduce them to their new environment. Graham finds himself drawn more to the wary little female than her easy-going brother, but over time both cubs come to recognise him as their protector. They form a bond of friendship through which he can gain unparalleled insights into their development and behaviour. When, a year later, the cubs are relocated to the Zambian wilderness, Graham faces the harrowing task of all; to help these wild and wily animals he has become so devoted to so that they can return to a wild existence where he is unable to control their fate. Wildlife Trafficking Gian Ege 2020-10-09 "Wildlife trafficking threatens the existence of many plant and animal species and accelerates the destruction of wildlife, forests, and other natural
resources. It contributes to environmental degradation, destroys unique natural habitats, and deprives many countries and their populations of scarce renewable resources. Nevertheless, preventing and supressing the illegal trade in wildlife, animal parts, and plants is presently not a priority in many countries and it remains overlooked and poorly researched. The chapters included in this volume address causes, characteristics, and actors of wildlife trafficking, analyse detection methods, and explore different international and national legal frameworks.

**Operation Lock and the War on Rhino Poaching**

John Hanks 2015-04-29 "The aggressive poaching of rhinos needs to be countered with equal aggression. So argued Prince Bernhard of the Netherlands, the founder president of the World Wide Fund for Nature (WWF), at a 1987 meeting with John Hanks, conservation expert and WWF's head in Africa. The result was Operation Lock, a secret initiative funded by Prince Bernhard and staffed by former SAS operatives. Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states: Namibia, Zambia, Botswana, Swaziland and Mozambique. Its operatives planned to train game rangers, to pose as rhino horn traders in order to entrap buyers, and to expose the kingpins who were driving the trade. It was a controversial approach, all the more because it was working within apartheid South Africa in the late 1980s. When the existence of the project was finally leaked, WWF denied any involvement, and John Hanks took the fall. In Operation Lock and the War on Rhino Poaching, John Hanks finally tells the story of these explosive events from 25 years ago. As a leading international authority on conservation, he also deals with the scourge of rhino poaching up to the present, and gives powerful and controversial criticism of some of the current policies to curb poaching." -- Back cover.

**The Truth about Crime**

Jean Comaroff 2016-12-05 In this book, renowned anthropologists Jean and John L. Comaroff make a startling but absolutely convincing claim about our modern era: it is not by our arts, our politics, or our science that we understand ourselves—it is by our crimes. Surveying an astonishing range of forms of crime and policing—from petty thefts to the multibillion-dollar scams of too-big-to-fail financial institutions to the collateral damage of war—they take readers into the disorder of the late modern world. Looking at recent transformations in the triangulation of capital, the state, and governance that have led to an era where crime and policing are ever more complicit, they offer a powerful meditation on the new forms of sovereignty, citizenship, class, race, law, and political economy of representation that have arisen. To do so, the Comaroffs draw on their vast knowledge of South Africa, especially, and its struggle to build a democracy founded on the rule of law out of the wreckage of long years of violence and oppression. There they explore everything from the fascination with the supernatural in policing to the extreme measures people take to prevent home invasion, drawing illuminating comparisons to the United States and United Kingdom. Going beyond South Africa, they offer a global criminal anthropology that attests to criminality as the constitutive fact of contemporary life, the vernacular by which politics are conducted, moral panic voiced, and populations ruled. The result is a disturbing but necessary portrait of the modern era, one that asks critical new questions about how we see ourselves, how we think about morality, and how we are going to proceed as a global society.

**Militarised Responses to Transnational Organised Crime**

Tuesday Reitano 2017-10-06 This edited volume examines the use of militarised responses to different forms of criminal activity, discussing the outcomes and unintended consequences. Politicians and policymakers frequently use militarised responses to look tough on crime. The deployment of armies, navies, military assets and militarised approaches can send a powerful message, but have produced mixed results. While they generate the perception that governments are actively engaged on issues of concern to the public, and in some cases have resulted in notable successes, on the downside they have frequently also increased the loss of life, exacerbated the humanitarian consequences of a particular crime and entrenched divides between security and state institutions and the criminal proponents, narrowing the possibilities for future negotiated solutions. By focusing on four different areas of criminality – wildlife crime, piracy, migration and drug trafficking – the book allows context and evidence-based conclusions to be drawn on the strategic value and commonality of responses and their outcomes.
