**Politics of Culture in Iran** Nematollah Fazeli 2006-08-21 This first full-length study of the history of Iranian anthropology charts the formation and development of anthropology in Iran in the twentieth century. The text examines how and why anthropology and culture became part of wider socio-political discourses in Iran, and how they were appropriated, and rejected, by the pre- and post-revolutionary regimes. The author highlights the three main phases of Iranian anthropology, corresponding broadly to three periods in the social and political development of Iran: \*the period of nationalism: lasting approximately from the constitutional revolution (1906-11) and the end of the Qajar dynasty until the end of Reza Shah’s reign (1941) \*the period of Nativism: from the 1950s until the Islamic revolution (1979) \*the post-revolutionary period. In addition, the book places Iranian anthropology in an international context by demonstrating how Western anthropological concepts, theories and methodologies affected epistemological and political discourses on Iranian anthropology.

**The Cultural Dimension of Global Business (1-download)** Gary Ferraro 2015-07-22 This book demonstrates how the theories and insights of anthropology have positively influenced the conduct of global business and commerce, providing a foundation for understanding the impact of culture on global business, and global business on culture. *Prehistoric Myths in Modern Political Philosophy* Karl Widerquist 2016-12-05 How modern philosophers use and perpetuate myths about prehistoryThe state of nature, the origin of property, the origin of government, the primordial nature of inequality and war why do political philosophers talk so much about the Stone Age? And are they talking about a Stone Age that really happened, or is it just a convenient thought experiment to illustrate their points?Karl Widerquist and Grant S. McCall take a philosophical look at the origin of civilisation, examining political theories to show how claims about prehistory are used. Drawing on the best available evidence from archaeology and anthropology, they show that much of what we think we know about human origins comes from philosophers imagination, not scientific investigation.Key FeaturesShows how modern political theories employ ambiguous factual claims about prehistoryBrings archaeological and anthropological evidence to bear on those claimsTells the story of human origins in a way that reveals many commonly held misconceptions

**Monsoon Islam** Sebastian R. Prange 2018-05-03 Between the twelfth and sixteenth centuries, a distinct form of Islamic thought and practice developed among Muslim trading communities of the Indian Ocean. Sebastian R. Prange argues that this 'Monsoon Islam' was shaped by merchants not sultans, forged by commercial imperatives rather than in battle, and defined by the reality of Muslims living within non-Muslim societies. Focusing on India's Malabar Coast, the much-fabled 'land of pepper', Prange provides a case study of how Monsoon Islam developed in response to concrete economic, socio-religious, and political challenges. Because communities of Muslim merchants across the Indian Ocean were part of shared commercial, scholarly, and political networks, developments on the Malabar Coast illustrate a broader, trans-oceanic history of the evolution of Islam across monsoon Asia. This history is told through four spaces that are examined in their physical manifestations as well as symbolic meanings: the Port, the Mosque, the Palace, and the Sea.

**Satisfying Zambian Hunger for Culture** Mwizenge S. Tembo 2012-09-01 The Southern African country of Zambia with 72 tribes has experienced tremendous social turmoil during the last 48 years. The 13 million citizens migrated into the cities and professionals immigrated and scattered abroad in a growing Diaspora. The diversity of the Zambian society and globalization has created a cultural crisis. Satisfying Zambian Hunger for Culture discusses social and political history, gender rites of passage, food, religion, witchcraft, and recommendations for contemporary life in the 21st century. The17 chapter book puts the diverse Zambian African tribal customs, culture and technology into the modern digital age.

**How to Read a Folktale** Lee Haring 2013-10-24 How to Read a Folktale offers the first English translation of Ibonia, a spellbinding tale of old Madagascar. Ibonia is a folktale on epic scale. Much of its plot sounds familiar: a powerful royal hero attempts to rescue his betrothed from an evil adversary and, after a series of tests and duels, he and his lover are joyfully united with a marriage that affirms the royal lineage. These fairytale elements link Ibonia with European folktales, but the tale is still very much a product of Madagascar. It contains African-style praise poetry for the hero; it presents Indonesian-style riddles and poems; and it inflates the form of folktale into epic proportions. Recorded when the Malagasy people were experiencing European contact for the first time, Ibonia proclaims the power of the ancestors against the foreigner. Through Ibonia, Lee Haring expertly helps readers to understand the very nature of folktales. His definitive translation, originally published in 1994, has now been fully revised to emphasize its poetic qualities, while his new introduction and detailed notes give insight into the fascinating imagination and symbols of the Malagasy. Haring’s research connects this exotic narrative with fundamental questions not only of anthropology but also of literary criticism.

**Anthropology of Landscape** Christopher Tilley 2017-02-01 An Anthropology of Landscape tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both ‘taskscape’ and ‘leisureescape’, and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

**An Introduction to Sociology** Anthony Giddens 2000-04-01

**Decolonizing Anthropology** Faye Venetia Harrison 1997 Decolonizing Anthropology is part of a broader effort that aims to advance the critical reconstruction of the discipline devoted to understanding humankind in all its diversity and commonality. The utility and power of a decolonized anthropology must continue to be tested and developed. May the results of ethnographic probes--the data, the social and cultural analysis, the theorizing, and the strategies for knowledge application--help scholars envision clearer paths toincreased understanding, a heightened sense of intercultural and international solidarity, and last, but certainly not least, world transformation. **In Austrvegr: The Role of the Eastern Baltic in Viking Age Communication across the Baltic Sea** Marika Mägi 2018-05-17 This volume offers a novel, trans-regional vision of Viking Age (9th-11th century) cultural and political contacts between Scandinavia and the eastern coasts of the Baltic Sea, using predominantly archaeological evidence, combined with historical sources, topography and logistical considerations.

**Mirror for Humanity: A Concise Introduction to Cultural Anthropology** Conrad Kottak 2013-09-10 Written by a prominent scholar in the field, Conrad Phillip Kottak, this concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. While maintaining its connection with students through relevant examples, the combination of brevity, readability, and trusted content makes Mirror for Humanity a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text.

*Thanks for Watching* Patricia G. Lange 2019-11-15 YouTube hosts one billion visitors monthly and sees more than 400 hours of video uploaded every minute. In her award winning book, *Thanks for Watching*, Patricia G. Lange offers an anthropological perspective on this heavily mediated social environment by analyzing videos and the emotions that motivate sharing them. She demonstrates how core concepts from anthropology—participant-observation, reciprocity, and community—apply to sociality on YouTube. Lange’s book reconceptualizes and updates these concepts for video-sharing cultures. Lange draws on 152 interviews with YouTube participants at gatherings throughout the United States, content analyses of more than 300 videos, observations of interactions on and off the site, and participant-observation. She documents how the introduction of monetization options impacted perceived opportunities for open sharing and creative exploration of personal and social messages. Lange’s book provides new insight into patterns of digital migration, YouTube’s influence on off-site interactions, and the emotional impact of losing control over images. The book also debunks traditional myths about online interaction, such as the supposed online/offline binary, the notion that anonymity always degrades public discourse, and the popular characterization of online participants as over-sharing narcissists. YouTubers’ experiences illustrate fascinating hybrid forms of contemporary sociality that are neither purely mediated nor sufficient when conducted only in person. Combining intensive ethnography, analysis of video artifacts, and Lange’s personal vlogging experiences, the book explores how YouTubers are creating a posthuman collective characterized by interaction, support, and controversy. In analyzing the tensions between YouTubers' idealistic goals of sociality and the site’s need for monetization, *Thanks for Watching* makes crucial contributions to cultural anthropology, digital ethnography, science and technology studies, new media studies, communication, interaction design, and posthumanism. For its perceptive analysis of video blogging for self-expression and sociality, *Thanks for Watching* received the Franklyn S. Haiman Award for Distinguished Scholarship in Freedom of Expression (2020), from the National Communication Association.

**Mirror for Humanity** Conrad Phillip Kottak 2019 "This concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. Mirror for Humanity is a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text." -- Amazon.

*Ethnobiology* E. N. Anderson 2012-02-14 The single comprehensive treatment of the field, from the leading members of the Society of Ethnobiology The field of ethnobiology—the study of relationships between particular ethnic groups and their native plants and animals—has grown very rapidly in recent years, spawning numerous subfields. Ethnobiological research has produced a wide range of medicines, natural products, and new crops, as well as striking insights into human cognition, language, and environmental management behavior from prehistory to the present. This is the single authoritative source on ethnobiology, covering all aspects of the field as it is currently defined. Featuring contributions from experienced scholars and sanctioned by the Society of Ethnobiology, this concise, readable volume provides extensive coverage of ethical issues and practices as well as archaeological, ethnological, and linguistic approaches. Emphasizing basic principles and methodology, this unique textbook offers a balanced treatment of all the major subfields within ethnobiology, allowing students to begin guided research in any related area—from archaeoethnology

to ethnomycology to agroecology. Each chapter includes a basic introduction to each topic, is written by a leading specialist in the specific area addressed, and comes with a full bibliography citing major works in the area. All chapters cover recent research, and many are new in approach; most chapters present unpublished or very recently published new research. Featured are clear, distinctive treatments of areas such as ethnozoology, linguistic ethnobiology, traditional education, ethnoecology, and indigenous perspectives. Methodology and ethical action are also covered up to current practice. Ethnobiology is a specialized textbook for advanced undergraduates and graduate students; it is suitable for advanced-level ethnobotany, ethnobiology, cultural and political ecology, and archaeologically related courses. Research institutes will also find this work valuable, as will any reader with an interest in ethnobiological fields.

**An Anthropology of Anthropology** Robert Borofsky 2019-03-21 The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

**Societal Resilience and Response to Contagious Diseases and Pandemics** Abrabó, Amal Adel 2022-03-04 For the first time in modern human history, the response to a global health crisis was required among all countries no matter their wealth, size, or economic status. Every country was impacted by the COVID-19 pandemic, and as it surged across the world, it took many lives with it. Thus, it is essential to study the ability of human societies to cope with the changes caused by pandemics. Societal Resilience and Response to Contagious Diseases and Pandemics adopts and maintains an interdisciplinary-transdisciplinary approach to investigating societal resilience. This book builds upon different insights of what has already been done for humanity to survive the spread of a deadly pandemic. Covering topics such as the role of healthcare professionals, political economy, and consumption culture, it is an essential resource for professionals, business leaders, policymakers, professors, graduate students, researchers, and academicians.

*Yapomamō, the Fierce People* Napoleon A. Chagnon 1977 "Yapomamō culture, in its major focus, reverses the meanings of "good" and "desirable" as phrased in the ideal postulates of the Judaic-Christian tradition. A high capacity of rage, a quick flash point, and a willingness to use violence to obtain one's ends are considered desirable traits. Much of the behavior of the Yapomamō can be described as brutal, cruel, treacherous, in the value-ladened terms of our own vocabulary. The Yapomamō themselves, however, as Napoleon Chagnon came to intimately know them in the year and a half he lived with them, do not all appear to be mean and treacherous. As individuals, they seem to be people playing their own cultural game, with internal feelings that at times may be quite divergent from the demands placed upon them by their culture. This case study furnishes valuable data for phrasing questions about the relationship between the individual and his culture."-- Foreword.

**Life-Span Human Development** Carol K. Sigelman 2017-03-14 Known for its clear, straightforward writing, grounding in current research, and well-chosen visuals and examples, Sigelman and Rider’s text combines a topical organization at the chapter level and a consistent chronological presentation within each chapter. Each chapter focuses on a domain of development and traces developmental trends and influences in that domain from infancy to old age. Each chapter also includes sections on infancy, childhood, adolescence, and adulthood. The blend of topical and chronological approaches helps students grasp key transformations that occur in each period of the life span. Other staples of the text are its emphasis on theories and their application to different aspects of development and its focus on the interplay of nature and nurture in development. This edition expands its examination of both biological bases of and sociocultural influences on life-span development. **Parentology** Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom.bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

**Emigrating Beyond Earth** Cameron M Smith 2012-06-09 Emigrating Beyond Earth puts space colonization into the context of human evolution. Rather than focusing on the technologies and strategies needed to colonize space, the authors examine the human and societal reasons for space colonization. They make space colonization seem like a natural step by demonstrating that if will continue the human species' 4 million-year-old legacy of adaptation to difficult new environments. The authors present many examples from the history of human expansion into new environments, including two amazing tales of human colonization - the prehistoric settlement of the upper Arctic around 5,000 years ago and the colonization of the Pacific islands around 3,000 years ago - which show that space exploration is no more about rockets and robots than Arctic exploration was about boating!

**Human Adaptability** Emilio F. Moran 2018-05-04 Designed to help students understand the multiple levels at which human populations respond to their surroundings, this essential text offers the most complete discussion of environmental, physiological, behavioral, and cultural adaptive strategies available. Among the unique features that make *Human Adaptability* outstanding as both a textbook for students and a reference book for professionals are a complete discussion of the development of ecological anthropology and relevant research methods; the use of an ecosystem approach with emphasis on arctic, high altitude, arid land, grassland, tropical rain forest, and urban environments; an extensive and updated bibliography on ecological anthropology; and a comprehensive glossary of technical terms. Entirely new to the third edition are chapters on urban sustainability and methods of spatial analysis, with enhanced emphasis throughout on the role of gender in human-adaptability research and on global environmental change as it affects particular ecosystems. In addition, new sections in each chapter guide students to websites that provide access to relevant material, complement the text's coverage of biomes, and suggest ways to become active in environmental issues.

*(un)Common Sounds* Roberta R. King 2014-11-18 In troubled times of heightened global tensions and conflict, (un)Common Sounds: Songs of Peace and Reconciliation among Muslims and Christians explores the contribution of music and the performing arts to peacebuilding and interfaith dialogue in interreligious settings. It asks the simple but endlessly complex question: How is music and song used in our faiths and daily lives to foster peace and reconciliation? Focusing on the two largest world religions that together comprise more than 55% of the world’s population, the essays address the complexities of embodied, lived religious traditions by moving across and linking a range of disciplines: ethnomusicology (the intersection of music and culture), peacemaking, Islamic studies, and Christian theology. Based on research in the Middle East, North Africa, and Indonesia, context-specific case studies serve to identify and reflect on the significant roles of music and the performing arts in fostering sustainable peace. (un)Common Sounds investigates the dynamics of peacebuilding and interfaith dialogue as they relate to music's transformative roles in conflict and post-conflict settings. Classroom tested, ((un)Common Sounds also provides discussion questions and projects for each chapter, a companion Web site (www.songsforpeaceproject.org), and an available documentary film to enhance learning in the academy, nongovernmental organizations, and religious groups.

**Cultural Anthropology 18e** KOTTAK 2018-09-13 A leading name in anthropology, Conrad Philip Kottak continues to define student learning in the cultural anthropology course. Cultural Anthropology offers an up-to-date holistic introduction to anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. The program presents anthropology’s core concepts and also demonstrates anthropology’s relevance to the 21st-century world we inhabit. Revisions to the 18th edition of Cultural Anthropology were extensively informed by student data, collected anonymously by McGraw-Hill’s adaptive learning system. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

*Languages of the World* Asya Pereltsvaig 2012-02-09 What do all human languages have in common and in what ways are they different? How can language be used to trace different peoples and their past? Are certain languages similar because of common descent or language contact? Assuming no prior knowledge of linguistics, this textbook introduces readers to the rich diversity of human languages, familiarizing students with the variety and typology of languages around the world. Linguistic terms and concepts are explained, in the text and in the glossary, and illustrated with simple, accessible examples. Eighteen language maps and numerous language family charts enable students to place a language geographically or genealogically. A supporting website includes additional language maps and sound recordings that can be used to illustrate the peculiarities of the sound systems of various languages. 'Test yourself' questions throughout the book make it easier for students to analyze data from unfamiliar languages.

**Ethnic Groups and Boundaries** Fredrik Barth 1998-03-11 When originally published in Norway, *Ethnic Groups and Boundaries* marked the transition to a new era of ethnic studies. Today this much-cited classic is regarded as the seminal volume from which stems much current anthropological thinking about ethnicity. *Ethnic Groups and Boundaries* opens with Barths invaluable thirty-page essay that introduces students to important theoretical issues in the analysis of ethnic groups. Following is a collection of seven essays the results of a symposium involving a small group of Scandinavian social anthropologistsintended to illustrate the application of Barths analytical viewpoints to different sides of the problems of polyethnic organization in various ethnographic areas, including Norway, Sudan, Ethiopia, Mexico, Afghanistan, and Laos.

**The Trouble with Human Nature** Elizabeth D. Whitaker 2017-02-03 *The Trouble with Human Nature* brings together biological and cross-cultural evidence to critically examine common preconceptions and challenge popular assumptions about human nature. It sets out to counter genetic and evolutionary myths about human variation and behavior, drawing on both biological and cultural anthropology, as well as from other disciplines including psychology, economics, and sociology. The chapters address the interrelated topics of health and disease, gender and other differences, and violence and conflict. The analysis calls into question the presumed natural foundation for social inequalities and sheds light on both the constraints and possibilities inherent in the human condition. This book provides students of human diversity and evolution with an excellent resource to better approach questions relating to human nature. It will also be of interest to those taking courses in social, cultural, and biological anthropology, as well as public health, medical anthropology, sociology, gender studies, psychology, and kinship studies.

**Loose Leaf Mirror for Humanity** Conrad Phillip Kottak 2019-10-04 This concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. Mirror for Humanity is a perfect match for cultural anthropology courses that use readings or ethnographies along with a

main text.

**Mirror for Humanity** Conrad Phillip Kottak 2022 "Mirror for Humanity is intended to provide a concise, readable introduction to cultural anthropology. Its shorter length increases the instructor's options for assigning additional reading-case studies, readers, and other supplements-in a semester course. Mirror also can work well in a quarter system, for which traditional texts may be too long"--

**Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond** Tombul, I??l 2021-05-28 Orientalism is about much more than just information gathered about the East within its general postcolonial period. In this period, orientalism is a Western discourse that dominated and shaped the view of the East. There is "otherization" in the way the West has historically looked at the East and within the information presented about it. These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media. Cinema, television, news, newspaper, magazine, internet, social media, photography, literature, and more are transforming the way the East is presented and viewed. Under the headings of post-orientalism, neo-orientalism, or self-orientalism, these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond. The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender, race, religion, and culture that make up orientalist theory. The chapters focus on how orientalism is presented in the media, cinema, TV, photography, and more. This book is ideal for communications theorists, media analysts, practitioners, researchers, academicians, and students working in fields that include mass media, communications, film studies, ethnic studies, history, sociology, and cultural studies.

**The Essence of Anthropology** William A. Haviland 2015-02-04 THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a

framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Dancing Skeletons** Katherine A. Dettwyler 2013-09-26 One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, Dancing Skeletons presents informal, engaging, and oftentimes dramatic stories that relate the author's experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions, Dettwyler explores such diverse topics as ethnocentrism, culture shock, population control, breastfeeding, child care, the meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page "Q&A with the Author" in which Dettwyler responds to typical questions she has received individually from students who have been assigned Dancing Skeletons as well as audience questions at lectures on various campuses. The new 23-page "Update on Mali, 2013" chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest.
