Cultural Anthropology Gary Ferraro 2017-03-06 CULTURAL ANTHROPOLOGY: AN APPLIED PERSPECTIVE, Canadian Edition, goes beyond providing a comprehensive overview of the discipline and fully integrates the application of the theories, insights, and methods of cultural anthropology to contemporary situations. The authors recognize that cultures-Canadian and abroad-are in a constant state of flux and are continually interacting with each other both locally and globally. To capture this dynamic and to enhance student learning and illustrate the relevance of cultural anthropology in our everyday lives, current topics include the growth of information technologies, innovations such as multi-sited field research, reflexive and intersubjective approaches, human relations with the environment, religious and political conflict, medical anthropology, climate change, international migration, urbanization, development, and business anthropology. Student engagement is reinforced with strong pedagogical features and themes that encourage readers to reflect and think critically about issues like community and social responsibility, economics, and the environment. MindTap, a fully online learning solution, combines all learning tools-readings, multimedia, activities, and assessments-into a single Learning Path that guides the student through the curriculum and brings anthropology to life!

Politics of Culture in Iran Nematollah Fazeli 2006-08-21 This first full-length study of the history of Iranian anthropology charts the formation and development of anthropology in Iran in the twentieth century. The text examines how and why anthropology and culture became part of wider socio-political discourses in Iran, and how they were appropriated, and rejected, by the pre- and post-revolutionary regimes. The author highlights the three main phases of Iranian anthropology, corresponding broadly to three periods in the social and political development of Iran: *the period of nationalism: lasting approximately from the constitutional revolution (1906-11) and the end of the Qajar dynasty until the end of Reza Shah's reign (1941) *the period of Nativism: from the 1950s until the Islamic revolution (1979) *the post-revolutionary period. In addition, the book places Iranian anthropology in an international context by demonstrating how Western anthropological concepts, theories and methodologies affected epistemological and political discourses on Iranian anthropology.

Gendered Lives Julia T. Wood 2018-01-01 Well-written and well-researched by leading gender communication scholars Julia T. Wood and Natalie Fixmer-Oraiz, GENDERED LIVES: COMMUNICATION, GENDER, & CULTURE, 13th Edition, provides the latest theories, research and pragmatic information to help readers think critically about gender and society. The book demonstrates the multiple and often interactive ways a person's views of masculinity and femininity are shaped within contemporary culture. It offers balanced coverage of different sexes, genders and sexual orientations. Reflecting emerging trends and issues, the new edition includes expansive coverage of men's issues, an integrated emphasis on social media and a stronger focus on gender in the public sphere. Plants and People Alexandre Chevalier 2014-04-30 This first monograph in the EARTH series, The dynamics of non-industrial agriculture: 8,000 years of resilience and innovation, approaches the great variety of agricultural practices in human terms. It focuses on the relationship between plants and people, the complexity of agricultural processes and their organisation within particular communities and societies. Collaborative European research among archaeologists, archaeobotanists, ethnographers, historians and agronomists using a broad analytical scale of investigation seeks to establish new common ground for integrating different approaches. By means of interdisciplinary examples, this book showcases the relationship between people and plants across wide ranging and diverse spatial and temporal milieus, including crop diversity, the use of wild foodstuffs, social context, status and choices of food plants.

Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond Tombul, I??l 2021-05-28 Orientalism is about much more than just information gathered about the East within its general postcolonial period. In this period, orientalism is a Western discourse that dominated and shaped the view of the East. There is "otherization" in the way the West has historically looked at the East and within the information presented about it. These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media. Cinema, television, news, newspaper, magazine, internet, social media, photography, literature, and more are transforming the way the East is presented and viewed. Under the headings of post-orientalism, neo-orientalism, or self-orientalism, these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond. The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender, race, religion, and culture that make up orientalist theory. The chapters focus on how orientalism is presented in the media, cinema, TV, photography, and more. This book is ideal for communications theorists, media analysts, practitioners, researchers, academicians, and students working in fields that include mass media, communications, film studies, ethnic studies, history, sociology, and cultural studies.

The Essence of Anthropology William A. Haviland 2015-02-04 THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements

support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. On Being Different Conrad Phillip Kottak 2003 On Being Different provides an up-to-date, comprehensive, and interdisciplinary account of diversity and multiculturalism in the United States and Canada. Kottak and Kozaitis clarify essential issues, themes, and topics in the study of diversity, including ethnicity, religion, gender, and sexual orientation. The book also presents an original theory of multiculturalism, showing how human agency and culture work to organize and change society. The authors use rich and varied ethnographic examples, from North America and abroad, to help students apply the material to their own lives, and thus gain a better understanding of diversity and multiculturalism.

Cultural Evolution Gary M. Feinman 2012-12-06 Drawing on Kent Flannery's forty years of cross-cultural research in the area, the contributors to this collection reflect the current diversity of contemporary approaches to the study of cultural evolutionary processes. Collectively the volume expresses the richness of the issues being investigated by comparative theorists interested in long-term change, as well as the wide variety of data, approaches, and ideas that researchers are employing to examine these questions.

Ethnobiology E. N. Anderson 2012-02-14 The single comprehensive treatment of the field, from the leading members of the Society of Ethnobiology The field of ethnobiology-the study of relationships between particular ethnic groups and their native plants and animals-has grown very rapidly in recent years, spawning numerous subfields. Ethnobiological research has produced a wide range of medicines, natural products, and new crops, as well as striking insights into human cognition, language, and environmental management behavior from prehistory to the present. This is the single authoritative source on ethnobiology, covering all aspects of the field as it is currently defined. Featuring contributions from experienced scholars and sanctioned by the Society of Ethnobiology, this concise, readable volume provides extensive coverage of ethical issues and practices as well as archaeological, ethnological, and linguistic approaches. Emphasizing basic principles and methodology, this unique textbook offers a balanced treatment of all the major subfields within ethnobiology, allowing students to begin guided research in any related area-from archaeoethnology to ethnomycology to agroecology. Each chapter includes a basic introduction to each topic, is written by a leading specialist in the specific area addressed, and comes with a full bibliography citing major works in the area. All chapters cover recent research, and many are new in approach; most chapters present unpublished or very recently published new research. Featured are clear, distinctive treatments of areas such as ethnozoology, linguistic ethnobiology, traditional education, ethnoecology, and indigenous perspectives. Methodology and ethical action are also covered up to current practice. Ethnobiology is a specialized textbook for advanced undergraduates and graduate students; it is suitable for advanced-level ethnobotany, ethnobiology, cultural and political ecology, and archaeologically related courses. Research institutes will also find this work valuable, as will any reader with an interest in ethnobiological fields.

Mirror for Humanity: A Concise Introduction to Cultural Anthropology Conrad Kottak 2013-09-10 Written by a prominent scholar in the field, Conrad Phillip Kottak, this concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. Reflexive Ethnography Charlotte Aull Davies 2012-10-02 First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company. *Anthropology* Carol R. Ember 2006-04 [In this book, the authors] are interested not only in what humans are and were like; [but they are] also interested in why they got to be that way, in all their variety. When there are alternative explanations, [the authors] try to communicate the necessity to evaluate them logically as well as on the basis of the available evidence. Throughout the book, [they] try to communicate that no idea, including ideas put forward in textbooks, should be accepted even tentatively without supporting tests that could have gone the other way. -Pref.

Emigrating Beyond Earth Cameron M Smith 2012-06-09 Emigrating Beyond Earth puts space colonization into the context of human evolution. Rather than focusing on the technologies and strategies needed to colonize space, the authors examine the human and societal reasons for space colonization. They make space colonization seem like a natural step by demonstrating that if we will continue the human species' 4 million-year-old legacy of adaptation to difficult new environments. The authors present many examples from the history of human expansion into new environments, including two amazing tales of human colonization - the prehistoric settlement of the upper Arctic around 5,000 years ago and the colonization of the Pacific islands around 3,000 years ago - which show that space exploration is no more about rockets and robots than Arctic exploration was about boating!

A History of Christianity in Indonesia Jan Sihar Aritonang 2008 Indonesia is the home of the largest single Muslim community of the world. Its Christian community, about 10% of the population, has until now received no overall description in English. Through cooperation of 26 Indonesian and European scholars, Protestants and Catholics, a broad and balanced picture is given of its 24 million Christians. This book sketches the growth of Christianity during the Portuguese period (1511-1605), it presents a fair account of developments under the Dutch colonial administration (1605-1942) and is more elaborate for the period of the Indonesian Republic (since 1945). It emphasizes the regional differences in this huge country, because most Christians live outside the main island of Java. Muslim-Christian relations, as well as the tensions between foreign missionaries and local theology, receive special attention.

Derived from his bestselling Cultural Anthropology, 6/E, Kottak has condensed and updated 19 chapters into 14, with conceptual and textual reorganization. The organization is intended to cover core and basics, while also illustrating prominent current issues. Reflecting the world itself, anthropology seems to change at an increasing pace. Mirror for Humanity provides a fully-up-to-date, affordable alternative.

(un)Common Sounds Roberta R. King 2014-11-18 In troubled times of heightened global tensions and conflict, (un)Common Sounds: Songs of Peace and Reconciliation among Muslims and Christians explores the contribution of music and the performing arts to peacebuilding and interfaith dialogue in interreligious settings. It asks the simple but endlessly complex question: How is music and song used in our faiths and daily lives to foster peace and reconciliation? Focusing on the two largest world religions that together comprise more than 55% of the world's population, the essays address the complexities of embodied, lived religious traditions by moving across and linking a range of disciplines: ethnomusicology (the intersection of music and culture), peacemaking, Islamic studies, and Christian theology. Based on research in the Middle East, North Africa, and Indonesia, context-specific case studies serve to identify and reflect on the significant roles of music and the performing arts in fostering sustainable peace. (un)Common Sounds investigates the dynamics of peacebuilding and interfaith dialogue as they relate to music's transformative roles in conflict and post-conflict settings. Classroom tested, (un)Common Sounds also provides discussion questions and projects for each chapter, a companion Web site (www.songsforpeaceproject.org), and an available documentary film to enhance

learning in the academy, nongovernmental organizations, and religious groups. **Cultural Anthropology 18e** KOTTAK 2018-09-13 A leading name in anthropology, Conrad Phillip Kottak continues to define student learning in the cultural anthropology course. Ethnic Groups and Boundaries Fredrik Barth 1998-03-11 When originally published in Norway, Ethnic Groups and Boundaries marked the transition to a new era of ethnic studies. Today this much-cited classic is regarded as the seminal volume from which stems much current anthropological thinking about ethnicity. Ethnic Groups and Boundaries opens with Barths invaluable thirty-page essay that introduces students to important theoretical issues in the analysis of ethnic groups. Following is a collection of seven essays the results of a symposium involving a small group of Scandinavian social anthropologists intended to illustrate the application of Barths analytical viewpoints to different sides of the problems of polyethnic organization in various ethnographic areas, including Norway, Sudan, Ethiopia, Mexico, Afghanistan, and Laos.

Mirror for Humanity Conrad Phillip Kottak 2019 "This concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. Societal Resilience and Response to Contagious Diseases and Pandemics Abdrabo, Amal Adel 2022-03-04 For the first time in modern human history, the response to a global health crisis was required among all countries no matter their wealth, size, or economic status. Every country was impacted by the COVID-19 pandemic, and as it surged across the world, it took many lives with it. Thus, it is essential to study the ability of human societies to cope with the changes caused by pandemics. Societal Resilience and Response to Contagious Diseases and Pandemics adopts and maintains an interdisciplinary-transdisciplinary approach to investigating societal resilience. This book builds upon different insights of what has already been done for humanity to survive the spread of a deadly pandemic. Covering topics such as the role of healthcare professionals, political economy, and consumption culture, it is an essential resource for professionals, business leaders, policymakers, professors, graduate students, researchers, and academicians.

Folklore of Wells Sir Rustom Pestonji Masani 1918

Thanks for Watching Patricia G. Lange 2019-11-15 YouTube hosts one billion visitors monthly and sees more than 400 hours of video uploaded every minute. In her award winning book, Thanks for Watching, Patricia G. Lange offers an anthropological perspective on this heavily mediated social environment by analyzing videos and the emotions that motivate sharing them. She demonstrates how core concepts from anthropology-participant-observation, reciprocity, and community-apply to sociality on YouTube. Lange's book reconceptualizes and updates these concepts for video-sharing cultures. Lange draws on 152 interviews with YouTube participants at gatherings throughout the United States, content analyses of more than 300 videos, observations of interactions on and off the site, and participant-observation. She documents how the introduction of monetization options impacted perceived opportunities for open sharing and creative exploration of personal and social messages. Lange's book provides new insight into patterns of digital migration, YouTube's influence on off-site interactions, and the emotional impact of losing control over images. The book also debunks traditional myths about online interaction, such as the supposed online/offline binary, the notion that anonymity always degrades public discourse, and the popular characterization of online participants as over-sharing narcissists. YouTubers' experiences illustrate fascinating hybrid forms of contemporary sociality that are neither purely mediated nor sufficient when conducted only in person. Combining intensive ethnography, analysis of video artifacts, and Lange's personal vlogging experiences, the book explores how YouTubers are creating a posthuman collective characterized by interaction, support, and controversy. In analyzing the tensions between YouTubers' idealistic goals of sociality and the site's need for monetization, Thanks for Watching makes crucial contributions to cultural anthropology, digital ethnography, science and technology studies, new media studies, communication, interaction design, and posthumanism. For its perceptive analysis of video blogging for self-expression and sociality, Thanks for Watching received the Franklyn S. Haiman Award for Distinguished Scholarship in Freedom of Expression (2020), from the National Communication Association.

Anthropology of Landscape Christopher Tilley 2017-02-01 An Anthropology of Landscape tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain. **Life-Span Human Development** Carol K. Sigelman 2017-03-14 Known for its clear, straightforward writing, grounding in current research, and well-chosen visuals and examples, Sigelman and Rider's text combines a topical organization at the chapter level and a consistent chronological presentation within each chapter. Each chapter focuses on a domain of development and traces developmental trends and influences in that domain from infancy to old age. Each chapter also includes sections on infancy, childhood, adolescence, and adulthood. The blend of topical and chronological approaches helps students grasp key transformations that occur in each period of the life span. Other staples of the text are its emphasis on theories and their application to different aspects of development and its focus on the interplay of nature and nurture in development. This edition expands its examination of both biological bases of and sociocultural influences on life-span development. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Decolonizing Anthropology** Faye Venetia Harrison 1997 Decolonizing Anthropology is part of a broader effort that aims to advance the critical reconstruction of the discipline devoted to understanding humankind in all its diversity and commonality. The utility and power of a decolonized anthropology must continue to be tested and developed. May the results of ethnographic probes--the data, the social and cultural analysis, the theorizing, and the strategies for knowledge application--help scholars envision clearer paths to increased understanding, a heightened sense of intercultural and international solidarity, and last, but certainly not least, world transformation.
