Anthropology Carol R. Ember 2006-04  
[In this book, the authors] are interested not only in what humans are and were like; [but they are] also interested in why they got to be that way, in all their variety. When there are alternative explanations, [the authors] try to communicate the necessity to evaluate them logically as well as on the basis of the available evidence. Throughout the book, [they] try to communicate that no idea, including ideas put forward in textbooks, should be accepted even tentatively without supporting tests that could have gone the other way. - Pref.

**Decolonizing Anthropology** Faye Venetia Harrison 1997 Decolonizing Anthropology is part of a broader effort that aims to advance the critical reconstruction of the discipline devoted to understanding humankind in all its diversity and commonality. The utility and power of a decolonized anthropology must continue to be tested and developed. May the results of ethnographic

probes--the data, the social and cultural analysis, the theorizing, and the strategies for knowledge application--help scholars envision clearer paths to increased understanding, a heightened sense of intercultural and international solidarity, and last, but certainly not least, world transformation.  
**Cross-Cultural Research Methods** Carol R. Ember 2009-07-16 Without ethnography, cross-cultural comparison would not be possible. But without cross-cultural comparison, we would know nothing of what may be universal or variable across human cultures, or why variation exists. Cross-Cultural Research Methods is an introductory teaching tool that shows students and potential researchers how to describe, compare, and analyze patterns that occur in different cultures, that is, how to form and test anthropological, sociological, psychological, medical, or political hypotheses about cultural variation.  
*Human Adaptability* Emilio F. Moran 2009-04-27 Designed to help students understand the multiple levels at

which human populations respond to their surroundings, this essential text offers the most complete discussion of environmental, physiological, behavioral, and cultural adaptive strategies available. Among the unique features that make *Human Adaptability* outstanding as both a textbook for students and a reference book for professionals are a complete discussion of the development of ecological anthropology and relevant research methods; the use of an ecosystem approach with emphasis on arctic, high altitude, arid land, grassland, tropical rain forest, and urban environments; an extensive and updated bibliography on ecological anthropology; and a comprehensive glossary of technical terms. Entirely new to the third edition are chapters on urban sustainability and methods of spatial analysis, with enhanced emphasis throughout on the role of gender in human-adaptability research and on global environmental change as it affects particular ecosystems. In addition, new sections in each chapter guide students to websites that provide access to relevant material, complement the text's coverage of biomes, and suggest ways to become active in environmental issues.

**The Essence of Anthropology** William A. Haviland 2015-02-04 THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections

that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world.

Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. **Politics of Culture in Iran** Nematollah Fazeli 2006-08-21 This first full-length study of the history of Iranian anthropology charts the formation and development of anthropology in Iran in the twentieth century. The text examines how and why anthropology and culture became part of wider socio-political discourses in Iran, and how they were appropriated, and rejected, by the pre- and post-revolutionary regimes. The author highlights the three main phases of Iranian anthropology, corresponding broadly to three periods in the social and political development of Iran: \*the period of nationalism: lasting approximately from the constitutional revolution (1906-11) and the end of the Qajar dynasty until the end of Reza Shah's reign (1941) \*the period of Nativism: from the 1950s until the Islamic revolution (1979) \*the post-revolutionary period. In addition,

the book places Iranian anthropology in an international context by demonstrating how Western anthropological concepts, theories and methodologies affected epistemological and political discourses on Iranian anthropology.

*Cultural Anthropology 18e* KOTTAK 2018-09-13 A leading name in anthropology, Conrad Philip Kottak continues to define student learning in the cultural anthropology course. *Cultural Anthropology* offers an up-to-date holistic introduction to anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. The program presents anthropology's core concepts and also demonstrates anthropology's relevance to the 21st-century world we inhabit. Revisions to the 18th edition of *Cultural Anthropology* were extensively informed by student data, collected anonymously by McGraw-Hill's adaptive learning system. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

**Cultural Evolution** Gary M. Feinman 2012-12-06 Drawing on Kent Flannery's forty years of cross-cultural research in the area, the contributors to this collection reflect the current diversity of contemporary approaches to the study

of cultural evolutionary processes. Collectively the volume expresses the richness of the issues being investigated by comparative theorists interested in long-term change, as well as the wide variety of data, approaches, and ideas that researchers are employing to examine these questions.

**Yanomami** Rob Borofsky 2005-01-31 Yanomami raises questions central to the field of anthropology - questions concerning the practice of fieldwork, the production of knowledge, and anthropology's intellectual and ethical vision of itself. Using the Yanomami controversy - one of anthropology's most famous and explosive imbroglios - as its starting point, this book considers how fieldwork is done, how professional credibility and integrity are maintained, and how the discipline might change to address central theoretical and methodological problems. Both the most up-to-date and thorough public discussion of the Yanomami controversy. [Life-Span Human Development](#) Carol K. Sigelman 2017-03-14 Known for its clear, straightforward writing, grounding in current research, and well-chosen visuals and examples, Sigelman and Rider's text combines a topical organization at the chapter level and a consistent chronological presentation within each chapter. Each chapter focuses on a domain of development and traces developmental trends and influences in that domain from infancy to old age. Each chapter also includes sections on infancy, childhood, adolescence, and adulthood. The blend of topical and chronological approaches helps students grasp key transformations that occur in each period of the life span. Other staples of the text are its emphasis on theories and their application to different aspects of development and its focus on the

interplay of nature and nurture in development. This edition expands its examination of both biological bases of and sociocultural influences on life-span development. **On Being Different** Conrad Phillip Kottak 2003 On Being Different provides an up-to-date, comprehensive, and interdisciplinary account of diversity and multiculturalism in the United States and Canada. Kottak and Kozaitis clarify essential issues, themes, and topics in the study of diversity, including ethnicity, religion, gender, and sexual orientation. The book also presents an original theory of multiculturalism, showing how human agency and culture work to organize and change society. The authors use rich and varied ethnographic examples, from North America and abroad, to help students apply the material to their own lives, and thus gain a better understanding of diversity and multiculturalism.

**Anthropology of Landscape** Christopher Tilley 2017-02-01 An Anthropology of Landscape tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work:

conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

**Satisfying Zambian Hunger for Culture**

Mwizenge S. Tembo 2012-09-01 The Southern African country of Zambia with 72 tribes has experienced tremendous social turmoil during the last 48 years. The 13 million citizens migrated into the cities and professionals immigrated and scattered abroad in a growing Diaspora. The diversity of the Zambian society and globalization has created a cultural crisis. Satisfying Zambian Hunger for Culture discusses social and political history, gender rites of passage, food, religion, witchcraft, and recommendations for contemporary life in the 21st century. The 17 chapter book puts the diverse Zambian African tribal customs, culture and technology into the modern digital age.

**Children and Peace** Nikola Balvin 2019-10-20 This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity,

intergenerational transitions and memories of war, and multiculturalism), as well as contemporary issues such as Europe's "migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different contexts. The volume also provides solutions and hope through its focus on youth empowerment and peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists, policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as the UN.

**Gendered Lives** Julia T. Wood 2018-01-01 Well-written and well-researched by leading gender communication scholars Julia T. Wood and Natalie Fixmer-Oraiz, *GENDERED LIVES: COMMUNICATION, GENDER, & CULTURE*, 13th Edition, provides the latest theories, research and

pragmatic information to help readers think critically about gender and society. The book demonstrates the multiple and often interactive ways a person's views of masculinity and femininity are shaped within contemporary culture. It offers balanced coverage of different sexes, genders and sexual orientations. Reflecting emerging trends and issues, the new edition includes expansive coverage of men's issues, an integrated emphasis on social media and a stronger focus on gender in the public sphere. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Loose Leaf Mirror for Humanity** Conrad Phillip Kottak 2019-10-04 This concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. *Mirror for Humanity* is a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text.

*Society in Focus* William E. Thompson 2018-11-13 *Society in Focus: An Introduction to Sociology*, Ninth Edition, is intended for the introduction to sociology course taught at the freshman/sophomore level.

*Mirror for Humanity* Conrad Phillip Kottak 2022 "Mirror for Humanity" is intended to provide a concise, readable introduction to cultural anthropology. Its shorter length increases the instructor's options for assigning additional reading-case studies, readers, and other supplements-in a semester course. *Mirror* also can work well in a quarter system, for which traditional

texts may be too long"--

Emigrating Beyond Earth Cameron M Smith 2012-06-09 Emigrating Beyond Earth puts space colonization into the context of human evolution. Rather than focusing on the technologies and strategies needed to colonize space, the authors examine the human and societal reasons for space colonization. They make space colonization seem like a natural step by demonstrating that if we will continue the human species' 4 million-year-old legacy of adaptation to difficult new environments. The authors present many examples from the history of human expansion into new environments, including two amazing tales of human colonization - the prehistoric settlement of the upper Arctic around 5,000 years ago and the colonization of the Pacific islands around 3,000 years ago - which show that space exploration is no more about rockets and robots than Arctic exploration was about boating!

*(un)Common Sounds* Roberta R. King 2014-11-18 In troubled times of heightened global tensions and conflict, *(un)Common Sounds: Songs of Peace and Reconciliation among Muslims and Christians* explores the contribution of music and the performing arts to peacebuilding and interfaith dialogue in interreligious settings. It asks the simple but endlessly complex question: How is music and song used in our faiths and daily lives to foster peace and reconciliation? Focusing on the two largest world religions that together comprise more than 55% of the world's population, the essays address the complexities of embodied, lived religious traditions by moving across and linking a range of disciplines: ethnomusicology (the intersection of music and culture), peacemaking, Islamic studies, and Christian theology. Based on research in the Middle East, North Africa, and

Indonesia, context-specific case studies serve to identify and reflect on the significant roles of music and the performing arts in fostering sustainable peace. *(un)Common Sounds* investigates the dynamics of peacebuilding and interfaith dialogue as they relate to music's transformative roles in conflict and post-conflict settings. Classroom tested, *(un)Common Sounds* also provides discussion questions and projects for each chapter, a companion Web site ([www.songsforpeaceproject.org](http://www.songsforpeaceproject.org)), and an available documentary film to enhance learning in the academy, nongovernmental organizations, and religious groups.

Ethnobiology E. N. Anderson 2012-02-14 The single comprehensive treatment of the field, from the leading members of the Society of Ethnobiology The field of ethnobiology—the study of relationships between particular ethnic groups and their native plants and animals—has grown very rapidly in recent years, spawning numerous subfields. Ethnobiological research has produced a wide range of medicines, natural products, and new crops, as well as striking insights into human cognition, language, and environmental management behavior from prehistory to the present. This is the single authoritative source on ethnobiology, covering all aspects of the field as it is currently defined. Featuring contributions from experienced scholars and sanctioned by the Society of Ethnobiology, this concise, readable volume provides extensive coverage of ethical issues and practices as well as archaeological, ethnological, and linguistic approaches. Emphasizing basic principles and methodology, this unique textbook offers a balanced treatment of all the major subfields within ethnobiology,

allowing students to begin guided research in any related area—from archaeoethnology to ethnomycology to agroecology. Each chapter includes a basic introduction to each topic, is written by a leading specialist in the specific area addressed, and comes with a full bibliography citing major works in the area. All chapters cover recent research, and many are new in approach; most chapters present unpublished or very recently published new research. Featured are clear, distinctive treatments of areas such as ethnozoology, linguistic ethnobiology, traditional education, ethnoecology, and indigenous perspectives. Methodology and ethical action are also covered up to current practice. Ethnobiology is a specialized textbook for advanced undergraduates and graduate students; it is suitable for advanced-level ethnobotany, ethnobiology, cultural and political ecology, and archaeologically related courses. Research institutes will also find this work valuable, as will any reader with an interest in ethnobiological fields.

**Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond** Tombul, I??l 2021-05-28 Orientalism is about much more than just information gathered about the East within its general postcolonial period. In this period, orientalism is a Western discourse that dominated and shaped the view of the East. There is “otherization” in the way the West has historically looked at the East and within the information presented about it. These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media. Cinema, television, news, newspaper, magazine, internet, social media, photography, literature, and more are transforming the way the East is

presented and viewed. Under the headings of post-orientalism, neo-orientalism, or self-orientalism, these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond. The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender, race, religion, and culture that make up orientalist theory. The chapters focus on how orientalism is presented in the media, cinema, TV, photography, and more. This book is ideal for communications theorists, media analysts, practitioners, researchers, academicians, and students working in fields that include mass media, communications, film studies, ethnic studies, history, sociology, and cultural studies.

*Ya, nomamö, the Fierce People* Napoleon A. Chagnon 1977 "Yaṅomamö culture, in its major focus, reverses the meanings of "good" and "desirable" as phrased in the ideal postulates of the Judaic-Christian tradition. A high capacity of rage, a quick flash point, and a willingness to use violence to obtain one's ends are considered desirable traits. Much of the behavior of the Yaṅomamö can be described as brutal, cruel, treacherous, in the value-laden terms of our own vocabulary. The Yaṅomamö themselves, however, as Napoleon Chagnon came to intimately know them in the year and a half he lived with them, do not all appear to be mean and treacherous. As individuals, they seem to be people playing their own cultural game, with internal feelings that at times may be quite divergent from the demands placed upon them by their culture. This case study furnishes valuable

data for phrasing questions about the relationship between the individual and his culture."-- Foreword.

**Societal Resilience and Response to Contagious Diseases and Pandemics**

Abdrabo, Amal Adel 2022-03-04 For the first time in modern human history, the response to a global health crisis was required among all countries no matter their wealth, size, or economic status. Every country was impacted by the COVID-19 pandemic, and as it surged across the world, it took many lives with it. Thus, it is essential to study the ability of human societies to cope with the changes caused by pandemics. Societal Resilience and Response to Contagious Diseases and Pandemics adopts and maintains an interdisciplinary-transdisciplinary approach to investigating societal resilience. This book builds upon different insights of what has already been done for humanity to survive the spread of a deadly pandemic. Covering topics such as the role of healthcare professionals, political economy, and consumption culture, it is an essential resource for professionals, business leaders, policymakers, professors, graduate students, researchers, and academicians.

*Mirror for Humanity: A Concise Introduction to Cultural Anthropology*  
Conrad Kottak 2013-09-10 Written by a prominent scholar in the field, Conrad Phillip Kottak, this concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. While maintaining its connection with students through relevant examples, the combination of brevity, readability, and trusted content makes *Mirror for Humanity* a perfect match for cultural anthropology courses that use readings or ethnographies along with

a main text.

Reflexive Ethnography Charlotte Aull Davies 2012-08-06 Reflexive Ethnography is a unique guide to ethnographic research for students of anthropology and related disciplines. It provides practical and comprehensive guidance to ethnographic research methods, but also encourages students to develop a critical understanding of the philosophical basis of ethnographic authority. Davies examines why reflexivity, at both personal and broader cultural levels, should be integrated into ethnographic research and discusses how this can be accomplished for a variety of research methods. This revised and updated second edition includes: a new chapter on internet-based research and 'interethnography' chapters on selection of topics and methods, data collection and analysis, and ethics and politics of research practical advice on writing up ethnographic study new and updated research examples. Postmodernist relativism can lead to an over-emphasis on reflexivity that denies the possibility of social research. Reflexive Ethnography utilises postmodernist insights – incorporation of different standpoints, exposure of the intellectual tyranny of meta-narratives – but proposes that reflexive ethnographic research be undertaken from a realist perspective. Reflexive Ethnography will help students to use and understand ethnographic research practices that fully incorporate reflexivity without abandoning claims to develop valid knowledge of social reality.

**Thanks for Watching** Patricia G. Lange 2019-11-15 YouTube hosts one billion visitors monthly and sees more than 400 hours of video uploaded every minute. In her award winning book,

Thanks for Watching, Patricia G. Lange offers an anthropological perspective on this heavily mediated social environment by analyzing videos and the emotions that motivate sharing them. She demonstrates how core concepts from anthropology—participant-observation, reciprocity, and community—apply to sociality on YouTube. Lange's book reconceptualizes and updates these concepts for video-sharing cultures. Lange draws on 152 interviews with YouTube participants at gatherings throughout the United States, content analyses of more than 300 videos, observations of interactions on and off the site, and participant-observation. She documents how the introduction of monetization options impacted perceived opportunities for open sharing and creative exploration of personal and social messages. Lange's book provides new insight into patterns of digital migration, YouTube's influence on off-site interactions, and the emotional impact of losing control over images. The book also debunks traditional myths about online interaction, such as the supposed online/offline binary, the notion that anonymity always degrades public discourse, and the popular characterization of online participants as over-sharing narcissists. YouTubers' experiences illustrate fascinating hybrid forms of contemporary sociality that are neither purely mediated nor sufficient when conducted only in person. Combining intensive ethnography, analysis of video artifacts, and Lange's personal vlogging experiences, the book explores how YouTubers are creating a posthuman collective characterized by interaction, support, and controversy. In analyzing the tensions between YouTubers' idealistic goals of sociality and the site's need for monetization, Thanks

for Watching makes crucial contributions to cultural anthropology, digital ethnography, science and technology studies, new media studies, communication, interaction design, and posthumanism. For its perceptive analysis of video blogging for self-expression and sociality, Thanks for Watching received the Franklyn S. Haiman Award for Distinguished Scholarship in Freedom of Expression (2020), from the National Communication Association.

**Ethnic Groups and Boundaries** Fredrik Barth 1998-03-11 When originally published in Norway, Ethnic Groups and Boundaries marked the transition to a new era of ethnic studies. Today this much-cited classic is regarded as the seminal volume from which stems much current anthropological thinking about ethnicity. Ethnic Groups and Boundaries opens with Barths invaluable thirty-page essay that introduces students to important theoretical issues in the analysis of ethnic groups. Following is a collection of seven essays the results of a symposium involving a small group of Scandinavian social anthropologists intended to illustrate the application of Barths analytical viewpoints to different sides of the problems of polyethnic organization in various ethnographic areas, including Norway, Sudan, Ethiopia, Mexico, Afghanistan, and Laos.
