Post-Hindu India Kancha Isaiha 2009-11-17 Kancha Isaiha, the author of the best selling book Why I am Not a Hindu, pens a thought-provoking critique of Brahmanism and the caste system in India, while anticipating the death of Hinduism as a direct consequence of, what he says, is its anti-scientific and anti-nationalistic stance. The book, a result of the author's transcendental experiences and meditations, not only provides a sociopolitical analysis of Hinduism but also takes a refreshing look at the necessity of encouraging indigenous scientific thought for the sake of national progress. With piercing critiques and lucid explanations, the book addresses some of the most essential sociopolitical and productive potential of the Dalit-Bahujan communities. The author says this oppressive system of spiritual fascism is detrimental to both the future of religion and the nation-state. He thus criticizes the idea of spiritual fascism and sets Hinduism in the context of contemporary India's materialistic needs.

On a micro-analytical level, it is based on a thorough study of the productive knowledge systems of the Dalit-Bahujan communities of Andhra Pradesh, and provides a detailed day-to-day analysis of the scientific technology and socio-economic conditions in the social and cultural history of India. The book addresses the argument that it shows how Hinduism fails to negotiate between faith and reason, unlike other major religions of the world. Kancha Isaiha critiques the intellectual imagination of the dominant communities and inspires the marginalized communities to develop their own productive knowledge system and to understand the process of that knowledge system.
