Rethinking Civilizational Analysis Said Arjomand 2004-06-09 Although the concept of 'civilization' has deep roots in the social sciences, there is an urgent need to re-think it for contemporary times. Rethinking Civilizational Analysis points to an exhaustion in using 'the nation state' and 'world system' as the basic macro-units of social analysis because they do not get to grips with the 'soft power' variable of cultural factors involved in global aspects of development.

Free Radicals in Biology William Pryor 2012-12-02 Free Radicals in Biology, Volume V covers the mechanisms for the generation of free radicals. This volume contains eight chapters that discuss the biology and chemistry of oxy-radicals in mitochondria and the radical-mediated metabolism of xenobiotics. The opening chapter describes the mechanisms of free radical production in enzymatically promoted lipid peroxidation, generally in microsomes or microsomal lipids. The subsequent chapters explore the biochemistry and biology of plant and animal lipoxygenases; the production of superoxide and hydrogen peroxide in mitochondria; and the biological role of these species in mitochondria and related systems. The discussions then shift to the effects of superoxide production in white blood cells, with an emphasis on the role of the oxygen-dependent reactions of the important phagocytic cells, the monocytes, and the polymorphonuclear leukocytes. This volume further covers the formation and the role of oxy-radicals in the red blood cell, which is a very useful system for studying the protection of biological tissue against radical-mediated damage. A chapter presents a comprehensive review of the production of free radicals during the metabolism of xenobiotics. The last chapters provide an overview of the enzymology, biological functions, and free radical chemistry of glutathione peroxidase. These chapters also examine a number of genotoxicological principles and the effect of antioxidants in aging. Chemists, biologists, and physiologists will find this book of great value.

Pocket Guide to Restorative Justice Petra Walls 2007-12-15 This pocket-sized guide can be taken conveniently to meetings, interviews and visits, to be used as a quick reference point for information about the practical application of restorative justice. The book covers every stage of the process, from how a facilitator should prepare for taking a new case, through initial contacts with victim and offender and facilitating meetings, to recording and evaluating a case. While acknowledging throughout the different possible ways of proceeding, the authors provide example prompts for steps such as writing to a victim for the first time, talking to the victim and offender ahead of their meeting, and initiating meetings. They use jargon-free language and provide helpful task checklists for speed and ease of reference. This is an invaluable companion for youth offending team workers, probation officers, prison staff, police, referral order volunteers, mediators and any professional needing to know about restorative justice.

Quantum Leadership:Building Better Partnerships for Sustainable Health Tim Porter-O’Grady 2014-04-01 Quantum Leadership: Transdisciplinary leadership in complex systems Quantum Leadership: Building Better Partnerships for Sustainable Health, Fourth Edition skillfully prepares graduate students to thrive in a world of healthcare reform, complexity, and essential caring service. The Fourth Edition focuses on the current concepts of leadership, data, and research related to the complexities of leadership. The text also emphasizes the importance of principle-driven approaches and minimizes specific procedure-based solutions. This text is a seminal work around the complexity leadership as it applies to healthcare. There are very few other references that have the clarity, depth, and detail essential to enumerate this topic in healthcare organizations. It is especially valuable for graduate programs and CPNP programs as it provides a foundation for contemporary leadership and emphasizes the characteristics necessary to lead complex organizations. The Fourth Edition presents an additional chapter on the complexity of leadership in health care reform in an effort to incorporate the newest requirements of the Patient Protection Affordable Care Act in a manner that is relevant to leadership development and capacity. Case studies found within each chapter help reinforce translational work while new application exercises found in the "The Quantum Workbook" are an excellent supplement for learning. Additional updates to the text include: chapter podcasts, additional translational and learning material related to chapter case studies. Lastly, all references have been revised and updated to reflect the most current evidence around learning leadership.
