Steak Mark Schatzker 2010-04-29 The definitive book on steak has never been written—until now. "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs—a breed revived by the Nazis after four hundred years of extinction—Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, Steak is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

_Maneuver Warfare Handbook_ William S Lind 2018-05-30 Maneuver warfare, often controversial and requiring operational and tactical innovation, poses perhaps the most important doctrinal questions currently facing the conventional military forces of the U.S. Its purpose is to defeat the enemy by disrupting the opponent's ability to react, rather than by physical destruction of forces. This book develops and explains the theory of maneuver warfare and offers specific tactical, operational, and organizational recommendations for improving ground combat forces. The authors translate concepts too often vaguely stated by maneuver warfare advocates into concrete doctrine. Although the book uses the Marine Corps as a model, the concepts, tactics, and doctrine discussed apply to any ground combat force.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

proven strategies: option condors.

Thomas Nelson Page, author of short stories, novels, essays, and poetry, is best known for his role as literary spokesman for the glories of the Old South. Gordon Keith begins: Gordon Keith was the son of a gentleman. And this fact, like the cat the honest miller left to his youngest son, was his only patrimony. As in that case also, it stood to the possessor in the place of a good many other things. It helped him over many rough places. He carried it with him as a devoted Romanist wears a sacred scapular next to the heart. See other titles by this author available from Kessinger Publishing.

Culture + the State: Alternative Interventions Gabrielle Eva Marie Zezulka-Mailloux 2003

Introduction to Econometrics Christopher Dougherty 2002 Econometrics, the application of statistical principles to the quantification of
economic models, is a compulsory component of European economics degrees. This text provides an introduction to this complex topic for students who are not outstandingly proficient in mathematics. It does this by providing the student with an analytical and an intuitive understanding of the classical linear regression model. Mathematical notation is kept simple and step-by-step verbal explanations of mathematical proofs are provided to facilitate a full understanding of the subject. The text also contains a large number of practical exercises for students to follow up and practice what they have learnt. Originally published in the USA, this new edition has been substantially updated and revised with the inclusion of new material on specification tests, binary choice models, tobit analysis, sample selection bias, nonstationary time series, and unit root tests and basic cointegration. The new edition is also accompanied by a website with Powerpoint slideshows giving a parallel graphical treatment of topics treated in the book, cross-section and time series data sets, manuals for practical exercises, and lecture note extending the text.

Literature for Our Times 2012-01-01
Literature for Our Times offers the widest range of essays on present and future directions in postcolonial studies ever gathered together in one volume. Demonstrating the capacity of different approaches and methodologies to ‘live together’ in a spirit of ‘convivial democracy’, these essays range widely across regions, genres, and themes to suggest the many different directions in which the field is moving. Beginning with an engagement with global concerns such as world literatures and cosmopolitanism, translation, diaspora and migrancy, established and emerging critics demonstrate the ways in which postcolonial analysis continues to offer valuable ways of
analysing the pressing issues of a globalizing world. The field of Dalit studies is added to fundamental interests in gender, race, and indigeneity, while the neglected site of the post-colonial city, the rising visibility of terrorism, and the continuing importance of trauma and loss are all addressed through an analysis of particular texts. In all of these approaches, the versatility and adaptability of postcolonial theory is seen at its most energetic. **Greater Cincinnati Religious Peacemakers**

Various Religious Leaders from Greater Cincinnati 2021-09 Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seem therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

**Flight from Famine** Donald MacKay 2009-03-23

Winner of the 1991 QSPELL Prize for Non-fiction

One of Canada’s founding peoples, the Irish arrived in the Newfoundland fishing stations as early as the seventeenth century. By the eighteenth century they were establishing farms and settlements from Nova Scotia to the Great Lakes. Then, in the 1840s, came the failures of Ireland’s potato crop, which people in the west of Ireland had depended on for survival. "And that," wrote a Sligo countryman, "was the beginning of the great trouble and famine that destroyed Ireland." Flight from Famine is the moving account of a Victorian-era tragedy that has echoes in our own time but seems hardly credible in the light of Ireland’s modern prosperity. The famine survivors who helped build Canada in the years that followed Black ’47 provide a testament to courage, resilience, and perseverance. By the time of Confederation, the Irish population of Canada was second only to the French, and four million Canadians can claim proud Irish descent.
