Bones of the Fair Andrea K Höst 2013-12-01 Darest stands on the verge of a Golden Age. The revival of the Rathen line and a blood price won from the Fair has drawn a flood of visitors eager to snatch their share of changing fortune – or at least one of the fabulous prizes offered at the Spring Festival. Among those coaxed back to the once-failing kingdom is Gentian Calder, daughter of Shapers. Before she can decide whether to risk her life by staying, news arrives to put all other considerations aside. The Atlaran Ambassador and half the heirs of the western kingdoms have disappeared on Darest's border. Gentian agrees to join

the Diamond Coeurveur and his apprentice in a rush to join the search. Will they find the missing? A plot against Darest? Or uncover older secrets, buried deep? Keywords: fantasy, high fantasy, fantasy romance, epic fantasy, fae, australian author

Intercourse Andrea Dworkin 2009-09-17 Intercourse is a book that moves through the sexed world of dominance and submission. It moves in descending circles, not in a straight line, and as in a vortex each spiral goes down deeper. Its formal model is Dante's Inferno; its lyrical debt is to Rimbaud; the equality it envisions is rooted in the dreams of women, silent generations, pioneer voices, lone rebels, and masses who agitated, demanded, cried out, broke laws, and even begged. The begging was a substitute for retaliatory violence: doing bodily harm back to those who use or injure you. I want women to be done with begging. The public censure of women as if we are rabid because we speak without apology about the world in which we live is a strategy of threat that usually works. Men often react to women's words - speaking and writing - as if they were acts of violence; sometimes men react to women's words with violence. So we lower our voices. Women whisper. Women apologize. Women shut up. Women trivialize what we know. Women shrink. Women pull back. Most women have experienced enough dominance from men - control, violence, insult, contempt - that no threat seems empty. Intercourse does not say, forgive me and love me. It does not say, I forgive you, I love you. For a woman writer to thrive (or, arguably, to survive) in these current hard times, forgiveness and love must be subtext. No. I say no. Intercourse is search and assertion, passion and fury; and its form - no less than its content - deserves critical scrutiny and respect.----- PREFACE

How to Change Your Mind Michael Pollan 2019-05-14 Now on Netflix as a 4-part documentary series! "Pollan keeps you turning the pages . . . cleareyed and assured." -New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, How to Change Your Mind is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and

unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Uglies Scott Westerfeld 2011-05-03 A fresh repackaging of the bestselling Uglies books...the series that started the whole dystopian trend!

The Pyramids of London Andrea K Hst 2015-02-28 In a world where lightning sustained the Roman Empire, and Egypt's vampiric god-kings spread their influence through medicine and good weather, tiny Prytennia's fortunes are rising with the ships which have made her undisputed ruler of the air. But the peace of recent decades is under threat. Rome's automaton-driven wealth is waning along with the New Republic's supply of power crystals, while Sweden uses fear of Rome to add to her Protectorates. And Prytennia is under attack from the wind itself. Relentless daily attacks destroy crops, buildings, and lives, and neither the weather vampires nor Prytennia's Trifold Goddess have been able to find a way to stop them. With events so grand scouring the horizon, the deaths of Eiliff and Aedric Tenning raise little interest. The official verdict is accident: two careless automaton makers, killed by their own construct. The Tenning children and Aedric's sister, Arianne, know this cannot be true. Nothing will stop their search for what really happened. Not even if, to follow the first clue, Aunt Arianne must sell herself to a vampire. --- Book 1 of a 5 book series.

The WEIRDest People in the World Joseph Henrich
2020-09-08 A New York Times Notable Book of 2020 A

Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising

details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Where Wizards Stay Up Late Matthew Lyon 1999-08-19

Twenty five years ago, it didn't exist. Today, twenty million people worldwide are surfing the Net. *Where Wizards Stay Up Late* is the exciting story of the pioneers responsible for creating the most talked about, most influential, and most far-reaching communications breakthrough since the invention of the telephone. In the 1960's, when computers were regarded as mere giant calculators, J.C.R. Licklider at MIT saw them as the ultimate communications devices. With Defense Department funds, he and a band of visionary computer whizzes began work on a nationwide, interlocking network of computers. Taking readers behind the scenes, *Where Wizards Stay Up Late* captures the hard work, genius, and happy accidents of their daring, stunningly successful venture.

Clueless in Academe Gerald Graff 2008-10-01 Gerald Graff argues that our schools and colleges make the intellectual life seem more opaque, narrowly specialized, and beyond normal learning capacities than it is or needs to be. Left clueless in the academic world, many students view the life of the mind as a secret society for which only an elite few qualify. In a refreshing departure from standard diatribes against academia, Graff shows how academic unintelligibility is unwittingly reinforced not only by academic jargon and obscure writing, but by the disconnection of the curriculum and the failure to exploit the many connections between academia and popular culture.

Finally, Graff offers a wealth of practical suggestions for making the culture of ideas and arguments more accessible to students, showing how students can enter the public debates that permeate their lives.

Abhorsen Garth Nix 2009-10-06 In the final book in the Old Kingdom trilogy, master of fantasy and globally bestselling author Garth Nix returns to the fantastic world of Sabriel for an unforgettable conclusion.

"Breathtaking, bittersweet, and utterly unforgettable."
* After centuries in captivity, the Destroyer is nearly free. Beneath the earth, a malignant force lies waiting, greedy for freedom from its ancient prison. As the Old Kingdom falls once more into a realm of darkness and terror, the people look desperately to the Abhorsen, the scourge of the Dead, to save them. Yet Abhorsen Sabriel is lost, missing in Ancelstierre. Only Lirael has any chance of stopping the Destroyer. With her companions Sameth, Mogget and the Disreputable Dog, she travels across the Old Kingdom in a race against time, battling Shadow Hands and dark necromancers to reach Ancelstierre before it is too late. But what hope can one young woman have against a terrible evil with the power to destroy life itself? This eagerly awaited conclusion to Garth Nix's extraordinary trilogy of Old Kingdom books is a complex and vividly imagined story, powerful, terrifying and compelling. "Terror, courage, bitterness, love, desperation, and sacrifice all swirl together in an apocalyptic climax that pits both Life and Death together against the destruction of everything."

Stained Glass Monsters Andrea K Höst 2011-01 Creatures from the Eferum are a world-wide problem: creeping through tears in the fabric of space, they feast on every unprotected human they can find. Tyrland has a

solution in the Kellian: faster and stronger than humans, they are Tyrland's clawed, shadowy monster hunters. But no matter how faithfully they serve, or how true their sworn word, they are too different, too separate, to ever be entirely trusted. Rennyn Claire is a complication. Secretive and obscenely powerful, she knows entirely too much about a massive new threat to Tyrland's safety. Worst of all, she is linked to a past that the Kellian would rather forget. All three of these things – monsters, Kellian, and an entirely overpowered mage – are about to land in Kendall Stockton's lap. The last thing Kendall wants is to try to play conscience to someone who can swat her like a bug. But innocent lives are at stake, and no-one else seems willing to ask if what is necessary is the right thing to do. And who, exactly, is the monster? Keywords: fantasy, high fantasy, fantasy romance, epic fantasy, australian author

Medair Andrea K Höst 2011 The complete epic fantasy "Medair" duology, containing the Aurealis Awards finalist "The Silence of Medair" and the heart-rending conclusion "Voice of the Lost". Time stole Victory. Medair an Rynstar returned too late to drive back the Ibisian invasion. Centuries too late. When friend and enemy have become the same thing, what use are the weapons Medair planned to use to protect her Empire? There is no magic, no artefact, no enchanted trinket which can undo the past. But no matter how Medair wishes to hide from the consequences of her failure, there are those who will not allow her the luxury of denying the present. Her war is already lost, but she carries weapons which could change the course of new battles. With the skirmishes of war beginning, and hunters in near pursuit, it is her conscience Medair cannot escape.

Whose side should she be on? What is she really running from? From the Aurealis Awards judges' report: "You can read Silence of Medair for its strong, conflicted heroine, its playful subversion of fantasy tropes, or its deep, detailed analysis of the nature of racism. If not, just read it for the beautifully crafted prose." Keywords: fantasy, high fantasy, fantasy romance, epic fantasy, australian author

Voice of the Lost Andrea K. Höst 2011-09 "Five hundred years after the Empire she served fell before the Ibisian invasion, Medair has betrayed her Emperor's memory by helping the descendants of the invaders...Assasins, armies, and desperate magic complicate Mediar's plan of escape. She has learned that you can never return to your past, or run from the consequences of your actions, but can she find a way to live in defeat?"--Back cover.

I'm Trying to Love Spiders Bethany Barton 2019-07-02 The Official Spider Test. What do you do when you see a spider? a. Lay on a BIG spidey smoocheroo. b. Smile, but back away slowly. c. Grab the closest object, wind up, and let it fly. d. Run away screaming. If you chose b, c, or d, then this book is for you! (If you chose a, you might be crazy.) I'm Trying to Love Spiders will help you see these amazing arachnids in a whole new light, from their awesomely excessive eight eyes, to the seventy-five pounds of bugs a spider can eat in a single year! And you're sure to feel better knowing you have a better chance of being struck by lightning than being fatally bit by a spider. Comforting, right? No? Either way, there's heaps more information in here to help you forget your fears . . . or at least laugh a lot!

And All the Stars Andrea K Höst Come for the apocalypse. Stay for cupcakes. Die for love. Madeleine Cost is

working to become the youngest person ever to win the Archibald Prize for portraiture. Her elusive cousin Tyler is the perfect subject: androgynous, beautiful, and famous. All she needs to do is pin him down for the sittings. None of her plans factored in the Spires: featureless, impossible, spearing into the hearts of cities across the world – and spraying clouds of sparkling dust into the wind. Is it an alien invasion? Germ warfare? They are questions everyone on Earth would like answered, but Madeleine has a more immediate problem. At Ground Zero of the Sydney Spire, beneath the collapsed ruin of St James Station, she must make it to the surface before she can hope to find out if the world is ending. Warning: Contains swearing, sexual situations, and Australians. Keywords: science fiction, ya, young adult, young adult science fiction, science fiction romance, teen, alien invasion, apocalypse, sydney, australian author

Champion of the Rose Andrea K Höst 2010 Soren Armitage is an anachronism. Proclaimed Rathen Champion by the Rathen Rose, intended to support the rule of a Rathen King or Queen. But there are no Rathens. Resigned to symbolising only Darest's faded glories, Soren is not prepared for the sudden appearance of a Rathen. Now she must find and support the heir despite the machinations of the kingdom's regent, sylvan curses, and the strange behaviour of once-dormant protective enchantments. While the odds seem stacked against her, Soren is determined to do her best to live up to the name of Rathen Champion. But what is she to do when it seems that there is something very wrong with her Rathen? Can she trust the person she is meant to protect? Keywords: fantasy, high fantasy, fantasy romance, epic fantasy, fae, australian author

Mercy Andrea Dworkin 1993-01-12 A controversial novel by the author of *Pornography*, *Intercourse* and *Ice & Fire*. *Mercy* is an intelligent and courageous woman who, as a nine-year-old girl, was molested by a man in a dark theatre. The repercussions of this act follow her through her life. Gloria Steinem says of Dworkin: "In every century, there are a handful of writers who help the human race evolve. Andrea is one of them".

That's the Joint! Murray Forman 2004 Spanning 25 years of serious writing on hip-hop by noted scholars and mainstream journalists, this comprehensive anthology includes observations and critiques on groundbreaking hip-hop recordings.

Lab Rat One Andrea K Höst 2011 Can she ever be "Just Cass" again? In the months since Cassandra Devlin walked off Earth onto another planet, she has grappled with everything from making blankets to helping psychics battle the memories of monsters. Not able to find a way home, she has instead gained friends and a purpose. Unfortunately, that purpose brings with it the pressure of being more than a little valuable, and those she has befriended are also her guards, ordered to explore and control her abilities to find out just what it is a touchstone can do. Test subject was not the career path Cass had been planning. With no privacy, too-frequent injuries, and the painful knowledge that she must always be an assignment to her Setari companions, Cass can only wish for some semblance of normality and control. And as her abilities become more and more dangerous, tests and training may be the only thing capable of protecting Cass from herself. Keywords: science fiction, ya, young adult, young adult science fiction, science fiction romance, teen, psychics, space adventure, portal fantasy, australian author

Cassandra Andrea K Höst Part 3 of the Touchstone Trilogy. Cassandra Devlin doesn't know what she's for. But she knows she's running out of time. Since Cass was rescued from the abandoned world of Muina, the Aussie teen has proven more than useful to the people of Tare. Expeditions to their home world no longer end in slaughter. The teaching city of Kalasa has been unlocked. After years of searching for answers, they are starting to make progress. But space is tearing itself apart. Ionoth attack in ever-greater numbers. And "the useful stray" has been injured so many times that the Tarens hesitate to use her for fear of losing her. With one particular Taren now her most important person, Cass is determined to contribute everything she can, and hopes to find some answers of her own. What is the link between Muina and Earth? Why are the reclusive Nurans so interested in 'rescuing' her? And what role in the crisis do the inhuman Cruzatch play? Can Cass keep herself together long enough to find out? Keywords: science fiction, ya, young adult, young adult science fiction, science fiction romance, teen, psychics, space adventure, portal fantasy, australian author

We Are Best Friends: Animals in Society Leslie Irvine 2019-10-01 Friendships between humans and non-human animals were once dismissed as sentimental anthropomorphism. After decades of research on the emotional and cognitive capacities of animals, we now recognize human-animal friendships as true reciprocal relationships. Friendships with animals have many of the same characteristics as friendships between humans. Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being. Both friends develop ways of communicating apart from, or in addition to, spoken

language.

This Is Your Brain on Music Daniel J. Levitin 2006-08-03 In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music—its performance, its composition, how we listen to it, why we enjoy it—and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals: • How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world • Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre • That practice, rather than talent, is the driving force behind musical expertise • How those insidious little jingles (called earworms) get stuck in our head A Los Angeles Times Book Award finalist, *This Is Your Brain on Music* will attract readers of Oliver Sacks and David Byrne, as it is an unprecedented, eye-opening investigation into an obsession at the heart of human nature.

Hungry for Peace Keith McHenry 2013-03-01 The de facto how-to manual of the international Food Not Bombs movement, which provides free food to the homeless and hungry and has branches in countries on every continent except Antarctica, this book describes at length how to set up and operate a Food Not Bombs chapter. The guide considers every aspect of the operation, from food collection and distribution to fund-raising, consensus decision making, and what to do when the police arrive.

It contains detailed information on setting up a kitchen and cooking for large groups as well as a variety of delicious recipes. Accompanying numerous photographs is a lengthy section on the history of Food Not Bombs, with stories of the jailing and murder of activists, as well as premade handbills and flyers ready for photocopying.

Stray Andrea K Höst 2011 On her last day of high school, Cassandra Devlin walked out of exams and into a forest. Surrounded by the wrong sort of trees, and animals never featured in any nature documentary, Cass is only sure of one thing: alone, she will be lucky to survive. The sprawl of abandoned blockish buildings Cass discovers offers her only more puzzles. Where are the people? What is the intoxicating mist which drifts off the buildings in the moonlight? And why does she feel like she's being watched? Increasingly unnerved, Cass is overjoyed at the arrival of the formidable Setari. Whisked to a world as technologically advanced as the first was primitive, where nanotech computers are grown inside people's skulls, and few have any interest in venturing outside the enormous whitestone cities, Cass finds herself processed as a 'stray', a refugee displaced by the gates torn between worlds. Struggling with an unfamiliar language and culture, she must adapt to virtual classrooms, friends who can teleport, and the ingrained attitude that strays are backward and slow. Can Cass ever find her way home? And after the people of her new world discover her unexpected value, will they be willing to let her leave? Keywords: science fiction, ya, young adult, young adult science fiction, science fiction romance, teen, psychics, space adventure, portal fantasy, australian author

In Arcadia Andrea K Höst One does not simply walk onto another planet. At least not without the help of a

daughter who has developed unlikely powers, fought an intra-dimensional war, and then arranged for a family relocation to a futuristic clone of Earth. Laura Devlin would gladly have paid any price to have her daughter back, so living in a techno-paradise with spaceship views is merely an added bonus. And a dream come true. But Arcadian paradises do not come without complications. Laura's include a plethora of psychic grandchildren. Interplanetary diplomacy. Her daughter's immense fame. And KOTIS, the military watchdog that seems to consider Laura's entire family government property. Forewarned by her daughter's experiences, Laura had anticipated as many problems as she could, and didn't doubt her ability to cope with the rest. But she had not planned on Gidds Selkie, a military officer 'chipped from flint' and not at all the sort of man lifelong geek Laura had ever imagined would find her interesting. Burned in the past, Laura is surprised to find herself tempted. Is this a new start to go with a new world? Or a mismatch doomed to failure?

Human Computer Confluence Andrea Gaggioli 2015-12 Human computer confluence is a research area aimed at developing an effective, even transparent, bidirectional communication between humans and computers, which has the potential to enable new forms of sensing, perception, interaction, and understanding. This book provides a groundbreaking collection of chapters exploring the science, technology and applications of HCC, bringing together experts in neuroscience, psychology and computer science.

The Book of Firsts Karan K Anders 2021-05-21 Three boys, the 'kings' of the school. One cynical newcomer. An outrageous competition. When Mika Niles overhears the details of "The Book of Firsts" she's at first bemused,

then scornful, then intrigued. Judging which of three very handsome young men is best at kissing, and...? With no time in her final year for serious attachments, a series of lunchtime trysts is more than tempting – and an opportunity like this might never come her way again. But this light-hearted game is also a scandalous secret, and few can play with fire and walk away unscathed.

To Life! Linda Weintraub 2012-09-01 This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

Encyclopedia of Management Theory Eric H. Kessler 2013-03-01 In discussing a management topic, scholars, educators, practitioners, and the media often toss out the name of a theorist (Taylor, Simon, Weber) or make a sideways reference to a particular theory (bureaucracy, total quality management, groupthink) and move on, as if assuming their audience possesses the necessary background to appreciate and integrate the reference. This is often far from the case. Individuals are frequently forced to seek out a hodgepodge of sources varying in quality and presentation to provide an overview of a particular idea. This work is designed to serve as a core reference for anyone interested in the essentials of contemporary management theory. Drawing together a team of international scholars, it examines the global landscape of the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses to thoughtfully apply them. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook.

And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Features and Benefits: Two volumes containing over 280 signed entries provide users with the most authoritative and thorough reference resources available on management theory, both in terms of breadth and depth of coverage. Standardized presentation format, organized into categories based on validity and importance, structures entries so that readers can assess the fundamentals, evolution, and impact of theories. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Management Theory allows readers to easily chart directions and trends in thought and theory from early times to the present. An appendix with Central Management Insights allows readers to easily understand, compare, and apply major theoretical messages of the field. Suggestions for Further Reading at the end of each entry guide readers to sources for more detailed research and discussion. Key themes include: Nature of Management Managing People, Personality, and Perception Managing Motivation Managing Interactions Managing Groups Managing Organizations Managing Environments Strategic Management Human Resources Management International Management and Diversity Managerial Decision Making, Ethics, and Creativity Management Education, Research, and Consulting Management of Operations, Quality, and Information Systems Management of Entrepreneurship Management of Learning and Change Management of Technology and Innovation Management and

The Book of Iowa Films Marty Knepper 2014-08-04 This is
the first comprehensive history of films made in or
about Iowa. It reflects some twenty years of collecting,
lecturing, and talking with some of Iowa's current
generation of independent filmmakers. It covers the span
from 1918 to 2013 and gives important background
information on dozens of high profile films such as the
STATE FAIR films of 1933 and 1945, THE BRIDGES OF
MADISON COUNTY, FIELD OF DREAMS, and many others. It is
designed as a companion for the State Historical
Society's blockbuster "Hollywood in the Heartland"
exhibition in Des Moines that is scheduled to run at
least through 2016. The book has an interpretive essay
covering the entire history as well as paragraph length
descriptions of each film. A user-friendly feature is
the Index of Films, which makes it easy to locate
discussions of individual films. Marty Knepper is a
featured commentator on video screens in the "Hollywood
in the Heartland" exhibition.

Stealth Democracy John R. Hibbing 2002-08-29 Americans
often complain about the operation of their government,
but scholars have never developed a complete picture of

people's preferred type of government. In this provocative and timely book, Hibbing and Theiss-Morse, employing an original national survey and focus groups, report the governmental procedures Americans desire. Contrary to the prevailing view that people want greater involvement in politics, most citizens do not care about most policies and therefore are content to turn over decision-making authority to someone else. People's wish for the political system is that decision makers be empathetic and, especially, non-self-interested, not that they be responsive and accountable to the people's largely nonexistent policy preferences or, even worse, that the people be obligated to participate directly in decision making. Hibbing and Theiss-Morse conclude by cautioning communitarians, direct democrats, social capitalists, deliberation theorists, and all those who think that greater citizen involvement is the solution to society's problems.

The Silence of Medair Andrea K. Höst 2010 Time stole victory. Medair an Rynstar returned too late to drive back the Ibisian invasion. Centuries too late. When friend and enemy have become the same thing, what use are the weapons Medair planned to use to protect her Empire? There is no magic, no artefact, no enchanted trinket which can undo the past. But no matter how Medair wishes to hide from the consequences of her failure, there are those who will not allow her the luxury of denying the present. Her war is already lost, but she carries weapons which could change the course of new battles. With the skirmishes of war beginning, and hunters in near pursuit, it is her conscience Medair cannot escape. Whose side should she be on? What is she really running from?

Radical Embodied Cognitive Science Anthony Chemero

2011-08-19 A proposal for a new way to do cognitive science argues that cognition should be described in terms of agent-environment dynamics rather than computation and representation. While philosophers of mind have been arguing over the status of mental representations in cognitive science, cognitive scientists have been quietly engaged in studying perception, action, and cognition without explaining them in terms of mental representation. In this book, Anthony Chemero describes this nonrepresentational approach (which he terms radical embodied cognitive science), puts it in historical and conceptual context, and applies it to traditional problems in the philosophy of mind. Radical embodied cognitive science is a direct descendant of the American naturalist psychology of William James and John Dewey, and follows them in viewing perception and cognition to be understandable only in terms of action in the environment. Chemero argues that cognition should be described in terms of agent-environment dynamics rather than in terms of computation and representation. After outlining this orientation to cognition, Chemero proposes a methodology: dynamical systems theory, which would explain things dynamically and without reference to representation. He also advances a background theory: Gibsonian ecological psychology, "shored up" and clarified. Chemero then looks at some traditional philosophical problems (reductionism, epistemological skepticism, metaphysical realism, consciousness) through the lens of radical embodied cognitive science and concludes that the comparative ease with which it resolves these problems, combined with its empirical promise, makes this approach to cognitive science a rewarding one. "Jerry Fodor is my favorite philosopher,"

Chemero writes in his preface, adding, "I think that Jerry Fodor is wrong about nearly everything." With this book, Chemero explains nonrepresentational, dynamical, ecological cognitive science as clearly and as rigorously as Jerry Fodor explained computational cognitive science in his classic work *The Language of Thought*.

Private Empire Steve Coll 2012-05-01 From the award-winning and bestselling author of *Ghost Wars* and *Directorate S*, an "extraordinary" and "monumental" exposé of Big Oil (*The Washington Post*) Includes a profile of current Secretary of State and former chairman and chief executive of ExxonMobil, Rex Tillerson In this, the first hard-hitting examination of ExxonMobil—the largest and most powerful private corporation in the United States—Steve Coll reveals the true extent of its power. *Private Empire* pulls back the curtain, tracking the corporation's recent history and its central role on the world stage, beginning with the Exxon Valdez accident in 1989 and leading to the Deepwater Horizon oil spill in the Gulf of Mexico in 2010. The action spans the globe—featuring kidnapping cases, civil wars, and high-stakes struggles at the Kremlin—and the narrative is driven by larger-than-life characters, including corporate legend Lee "Iron Ass" Raymond, ExxonMobil's chief executive until 2005, and current chairman and chief executive Rex Tillerson, President-elect Donald Trump's nomination for Secretary of State. A penetrating, news-breaking study, *Private Empire* is a defining portrait of Big Oil in American politics and foreign policy.

Cabaniss 2013-03-22 How do our patients come to be the way they are? What forces shape their conscious and unconscious thoughts and feelings? How can we use this information to best help them? Constructing psychodynamic formulations is one of the best ways for mental health professionals to answer questions like these. It can help clinicians in all mental health settings understand their patients, set treatment goals, choose therapeutic strategies, construct meaningful interventions and conduct treatment. Despite the centrality of psychodynamic formulation to our work with patients, few students are taught how to construct them in a clear systematic way. This book offers students and practitioners from all fields of mental health a clear, practical, operationalized method for constructing psychodynamic formulations, with an emphasis on the following steps: DESCRIBING problems and patterns REVIEWING the developmental history LINKING problems and patterns to history using organizing ideas about development. The unique, up-to-date perspective of this book integrates psychodynamic theories with ideas about the role of genetics, trauma, and early cognitive and emotional difficulties on development to help clinicians develop effective formulations. *Psychodynamic Formulation* is written in the same clear, concise style of *Psychodynamic Psychotherapy: A Clinical Manual* (Wiley 2011). It is reader friendly, full of useful examples, eminently practical, suitable for either classroom or individual use, and applicable for all mental health professionals. It can stand alone or be used as a companion volume to the *Clinical Manual*.

The Champagne Widow: Gripping and Heartbreaking French Historical Fiction Helen Frupp 2021-03-04 She plucks a perfectly ripe grape, glowing golden in the moonlight. In that moment she knows her life will be full of joy and sorrow: harvest feasts and heartbreak, the thrill of the season's first sip and the bitter threat of betrayal. But if her success could taste this sweet, she would have it no other way. France, 1805. In the sleepy town of Reims, recently widowed Nicole Clicquot is struggling to run her winemaking business alone. Her rival and owner of the largest vineyard in Champagne, calculating Monsieur Moët, is sure she'll accept his offer of marriage. But one look at her little daughter running happily through the vines that could one day be hers, and Nicole knows she could never share her late husband's legacy. Taking courage from the chalk soil beneath her boots, and the heat of the soft French sun, Nicole vows to save the vineyard herself by making the best champagne the world has ever tasted. But toiling

over the harvest day and night and the constant disapproval of her gossiping neighbours take their toll on Nicole. Only her husband's oldest friend, Louis, believes she can do this alone. One magical night, as a shooting star illuminates their way under a velvet sky, Nicole gazes up at his warm smile and wonders if, with Louis by her side, her champagne would taste even finer... because isn't the best wine made with love? Then Moët, still bitter over Nicole's rejection, discovers her secret method of making crystal-clear champagne, and the House of Clicquot could lose everything. Did Louis betray her trust, and was she wrong to open her heart again? And with Napoleon's wars looming on the horizon, can she save her vineyards, and her daughter, from ruin? Fans of *Chocolat*, *Carnegie's Maid*, *Dinah Jeffries* and anyone longing to sip champagne under the stars will adore this stunning historical read, inspired by the true story of how Nicole Clicquot blazed her own path to build the world's greatest champagne house: *Veuve Clicquot*.
