A triumph of failed ideas: European models of capitalism in the crisis Steffen Lehndorff 2012 The current crisis in Europe is being labelled, in mainstream media and politics, as a 'public debt crisis'. The bottom-line of the book is that the subprime crisis is a product of 'capitalism itself.'

When confronted with an ethical dilemma, most of us like to think we would stand up for our principles. But we are not as ethical as we think we are. In Blind Spots, leading business ethicists Max Bazerman and Ann Tenbrunsel examine the ways we can become more ethical, bridging the gap between who we are and who we want to be. From Enron and the tobacco industry, to sales of the defective Ford Pinto, the downfall of Bernard Madoff, and the Challenger space shuttle disaster, the authors investigate the nature of ethical failures in the business world and beyond, and illustrate how we can become more ethical. Rather than just trying to make the right decision, they explain why traditional approaches to ethics don’t work, the book considers how blind spots like ethical fading—the removal of ethics from the decision–making process—have led to tragedies and scandals such as the Challenger space shuttle disaster, steriod use in Major League Baseball, the crash in the financial markets, and the energy crisis. The authors demonstrate how ethical standards shift, how we neglect to notice and act on the unethical behavior of others, and how compliance initiatives can encourage unethical behavior. They argue that scandals will continue to emerge unless such approaches take into account the psychology of individuals faced with ethical dilemmas. Distinguishing our “should self” (the person who knows what is right) from our “want self” (the person who ends up making decisions), the authors point out ethical sinkholes that create questionable actions. Suggesting innovative individual and group strategies for dealing with ethical failures, the authors show us how to secure a place for ethics in our workplaces, institutions, and daily lives.
