Look Into Bible Series - James Graham Kettle 2020-11-15 'Look Into' materials provide the reader with an overview of scripture at a level to help personal knowledge and application for the individual, together with Bible study and sermon material for the hard-working church leader. 'Look Into' series are intended to provide an overview of Bible books and pick out main topics. In this way, the reader is left with a real flavour of the specific Biblical subject, with the hope that, in due time, he/she might be encouraged into a deeper study. These studies from the book of James meet our aim and focus the reader on the need to study, learn and apply the unspoken word of God. Why? Because we live in a time when the Word of God has never been easier to obtain, yet it is a time when that same Word is so little understood. This creates one of the greatest dangers to the Church that is from within, not from outside.

The Art of Change: Transforming Lean Software Development Mary Poppendieck 2009-10-21 Building on their breakthrough bestsellers Lean Software Development and CMMI for Software Engineering, Mary and Tom Poppendieck's newest book show software leaders and team members exactly how to drive high-value change throughout a software organization-and make it stick. They go far beyond generic implementation guidelines, demonstrating exactly how to make lean work in real projects, environments, and team structures. The Poppendieck organizations this book around a crucial yet unspoken mental construct that shapes our perspectives and controls our behavior in ways we rarely notice. For software leaders and team members, some frames lead to long-term failure, while others offer a strong foundation for success. Drawing on decades of experience, the authors present twenty-four frames that offer a coherent, complete framework for leading lean software development. You'll discover powerful new ways to act as competency leader, product champion, improvement mentor, front-line leader, and even visionary. Systems thinking: focusing on customers, bringing predictability to demand, and revamping policies that cause inefficiency: Technical excellence: Implementing lean-dependency architectures, TDD, and evolutionary development processes, and promoting deeper developer expertise Reliable delivery: managing your biggest risks more effectively, especially the risk of no caretaker: System improvement: solving problems, sharing the knowledge Great people: finding and growing professionals with purpose, passion, and pride Aligned leaders: getting your entire leadership team on the same page From the
