The same focus company, such as Walmart, Cedar Fair, American Eagle, National Beverage, Under Armour, or General Mills, is used throughout the entire chapter so that students can see how the concepts and calculations apply to a real-world company they are already familiar with"--

Ethical Obligations and Decision Making in Accounting Steven M. Mintz 2008 Ethical Obligations and Decision-Making in Accounting gives students a robust ethical framework that is crucial for accountants in the post-Enron era. Incorporating the principles of the AICPA code and other systems of ethics, Mintz and Morris show accounting students how a commitment to ethics can enable accounting professionals to meet their ethical obligations both to investors and creditors. No other book so comprehensively examines the elements of the financial reporting system - including the ethics of the internal control environment and the effectiveness of board of director and audit committee oversight - that determine the ethical standard of the accounting process.

Financial Reporting and Analysis Lawrence Revsine 2008-06-30 Financial Reporting & Analysis (FR&A) by Revsine/Collins/Johnson/Mittelstaedt emphasizes both the process of financial reporting and the analysis of financial statements. This book employs a true "user" perspective by discussing the contracting and decision implications of accounting and this helps readers understand why accounting choices matter to whom. Revsine, Collins, Johnson, and Mittelstaedt train their readers to be good financial detectives, able to read, use, and interpret the statements and most importantly understand how and why managers can utilize the flexibility in GAAP to manipulate the numbers for their own purposes.

Financial Accounting 6e with Annual Report Robert Libby 2008-07-17 Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

Introduction to Financial Accounting

Henry Dauderis 2019

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).
