Information systems have been around since 1950s. Dauderis 2019 This textbook, originally by D. Amann and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the IFRS to reflect the Generally Accepted Accounting Principles of the United States (US GAAP)

Loose Leaf for Financial Accounting Robert Libby 2018-09-09 Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and that one is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

Accounting Charles T. Horngren 2010-01-01 Experience More “I Get It” Moments both Inside and Outside of the Classroom

Horngren’s student oriented approach allows instructors to “Plan for Success” by improving student success and better classroom management. This new edition received substantial input from students who provided insights on how to improve the text from their perspective.

Survey of Accounting Carl S. Warren 2001 This text provides a contemporary introduction to accounting and accounting systems. It covers the essence of both financial and managerial accounting in a non-procedural, non-debit and credit manner. After a brief introduction to financial statement preparation, the remainder of the text focuses on controls and the use of accounting information in decision making.
