[The Dog Stars](#) Peter Heller

2013-05-07 NATIONAL BESTSELLER • In this "end-of-the-world novel more like a rapturous beginning" (San Francisco Chronicle), Hig somehow survived the flu pandemic that killed everyone he knows. His gripping story is "an ode to friendship between two men ... the strong bond between a human and a dog, and a reminder of what is worth living for" (Minneapolis Star-Tribune). Hig's wife is gone, his friends are dead, and he lives in the hangar of a small abandoned airport with his dog, Jasper, and a mercurial, gun-toting misanthrope named Bangle. But when a random transmission beams through the radio of his 1956 Cessna, the voice ignites a hope deep inside him that a better life exists outside their tightly controlled perimeter. Risking everything, he flies past his point of no return and follows its static-broken trail, only to find something that is both better and worse than anything he could ever hope for.

No One Is Talking About This
Patricia Lockwood 2021-02-16
FINALIST FOR THE 2021 BOOKER PRIZE & A NEW YORK TIMES TOP 10 BOOK OF 2021
WINNER OF THE DYLAN THOMAS PRIZE "A book that reads like a prose poem, at once sublime, profane, intimate, philosophical, witty and, eventually, deeply moving." —New York Times Book Review, Editors' Choice
"Wow. I can't remember the last time I laughed so much reading a book. What an inventive and startling writer...I'm so glad I read this. I really think this book is remarkable." —David Sedaris
From "a formidably gifted

writer" (The New York Times Book Review), a book that asks: Is there life after the internet? As this urgent, genre-defying book opens, a woman who has recently been elevated to prominence for her social media posts travels around the world to meet her adoring fans. She is overwhelmed by navigating the new language and etiquette of what she terms "the portal," where she grapples with an unshakable conviction that a vast chorus of voices is now dictating her thoughts. When existential threats--from climate change and economic precariousness to the rise of an unnamed dictator and an epidemic of loneliness--begin to loom, she posts her way deeper into the portal's void. An avalanche of images, details, and references accumulate to form a landscape that is post-sense, post-irony, post-everything. "Are we in hell?" the people of the portal ask themselves. "Are we all just going to keep doing this until we die?" Suddenly, two texts from her mother pierce the fray: "Something has gone

wrong," and "How soon can you get here?" As real life and its stakes collide with the increasingly absurd antics of the portal, the woman confronts a world that seems to contain both an abundance of proof that there is goodness, empathy, and justice in the universe, and a deluge of evidence to the contrary. Fragmentary and omniscient, incisive and sincere, *No One Is Talking About This* is at once a love letter to the endless scroll and a profound, modern meditation on love, language, and human connection from a singular voice in American literature.

Anything Goes Theodore Dalrymple 2011-02-01 A collection of never-before-seen pieces from one of Britain's most respected, admired and controversial commentators. Drawing on his vast experience as an inner-city doctor, Theodore Dalrymple, sometimes described as 'the Orwell of our times', examines the state of the NHS, the education system, British crime and criminal justice and, of

course, politics. Eagerly awaited by his many fans, his stories dissect modern Britain in the way only Theodore Dalrymple can.

So Little Done Theodore Dalrymple 2004-12-01

Admirable Evasions Theodore Dalrymple 2015-03-24 In *Admirable Evasions*, Theodore Dalrymple explains why human self-understanding has not been bettered by the false promises of the different schools of psychological thought. Most psychological explanations of human behavior are not only ludicrously inadequate oversimplifications, argues Dalrymple, they are socially harmful in that they allow those who believe in them to evade personal responsibility for their actions and to put the blame on a multitude of scapegoats: on their childhood, their genes, their neurochemistry, even on evolutionary pressures. Dalrymple reveals how the fashionable schools of psychoanalysis, behaviorism, modern neuroscience, and evolutionary psychology all

prevent the kind of honest self-examination that is necessary to the formation of human character. Instead, they promote self-obsession without self-examination, and the gross overuse of medicines that affect the mind. *Admirable Evasions* also considers metaphysical objections to the assumptions of psychology, and suggests that literature is a far more illuminating window into the human condition than psychology could ever hope to be.

Factfulness Hans Rosling 2018-04-03 INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But *Factfulness* does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates “*Factfulness* by Hans Rosling, an outstanding international

public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually

some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an

energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017. [The Daily Show \(The Book\)](#) Chris Smith 2016-11-22 NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and

adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on

and off the set of one of America's most groundbreaking shows.

An Intelligent Person's Guide to

Medicine Theodore Dalrymple

2001 Health is one of those

subjects that seems easy to define and then, the closer one gets, is more and more difficult

to understand. Does the health of a schizophrenic really

improve by being sedated and

kept in an asylum? Is a course

of Prozac or psychotherapy

aimed to make someone happy

really a medicine? These

incompatible views are most

visible in the NHS which has

over the decades become the

focus of all these projections of

health. At the expense of the

taxpayer many are being cured

while there is no money for

some of those who have

physical ailments in a real

sense. In this book, Theodore

Dalrymple sets out to tear into

the myths that he believes our

politicians have created, with

anecdotes from his own

experience as a doctor.

Litter Theodore Dalrymple
2011-01-01 What does it mean for our culture when your country is covered with trash? Writer Theodore Dalrymple drove four hundred miles along a motorway and found practically every yard of roadside to be littered with rubbish flapping in the wind like Buddhist prayer flags, which prompted him to write this heart-felt polemic about modern Britain.

Letters from Russia Marquis de Custine 2014-06-26 The Marquis de Custine's unique perspective on a vast, fascinating country in the grip of oppressive tyranny In 1839, encouraged by his friend Balzac, Custine set out to explore Russia. His impressions turned into what is perhaps the greatest and most influential of

all books about Russia under the Tsars. Rich in anecdotes as much about the court of Tsar Nicholas as the streets of St Petersburg, Custine is as brilliant writing about the Kremlin as he is about the great northern landscapes. An immediate bestseller on publication, Custine's book is also a central book for any discussion of 19th century history, as - like de Tocqueville's *Democracy in America* - it dramatizes far broader questions about the nature of government and society.

Saving the Planet and Other Stories Theodore Dalrymple
2021-01-20 Human life is filled with predicaments. In these eight stories, Theodore Dalrymple examines how people struggle with everyday conflicts and frustrations - or create them for others. The challenges of modern life are revealed to be both tragic and amusing in these enthralling stories touching on the nature of contemporary society, its character and characters. Theodore Dalrymple

is a retired doctor and psychiatrist who has written many books, including *Life at the Bottom*, *Admirable Evasions* and *Around the World in the Cinemas of Paris*.

Half-Earth: Our Planet's Fight for Life Edward O. Wilson
2016-03-07 "An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." —Jedediah Purdy, *New Republic* In his most urgent book to date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), *Half-Earth* argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the

planet that can still be reclaimed—such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others—Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

Our Culture, What's Left of it Theodore Dalrymple 2005

This new collection of essays bears the unmistakable stamp of Theodore Dalrymple's bracingly clear-sighted view of the human condition. In these twenty-six pieces, Dr. Dalrymple ranges over literature and ideas, from Shakespeare to Marx, from the break-down of Islam to the legalization of drugs. The book includes "When Islam Breaks Down," named by David Brooks of the *New York Times* as the best journal article of 2004. Informed by years of medical practice in a wide variety of settings, Dr. Dalrymple's acquaintance with the outer limits of human experience allows him to discover the universal in the local and the

particular, and makes him impatient with the humbug and obscurantism that have too long marred our social and political discourse. His essays are incisive yet undogmatic, beautifully composed and devoid of disfiguring jargon. Our Culture, What's Left of It is a book that restores our faith in the central importance of literature and criticism to our civilization.

Believe in People Charles Koch 2020-11-17 A surprising take on how you can help tackle the really big problems in society—from one of America's most successful entrepreneurs. People are looking for a better way. Towering barriers are holding millions of people back, and the institutions that should help everyone rise are not doing the job. Crumbling communities. One-size fits all education. Businesses that rig the economy. Public policy that

stifles opportunity and emboldens the extremes. As a result, this country is quickly heading toward a two-tiered society. Today's challenges call for nothing short of a paradigm shift – away from a top-down approach that sees people as problems to be managed, toward bottom-up solutions that empower everyone to realize their potential and foster a more inclusive society. Such a shift starts by asking: What would it mean to truly believe in people? Businessman and philanthropist Charles Koch has devoted his life to answering that question. Learn what he's discovered during his 60-year career to help you apply the principles of empowerment in your life, in your business, and in society. By learning from the social movements and applying the principles that have enabled social progress throughout history, Koch has achieved more than he dreamed possible – building one of the world's most successful companies and founding Stand Together, one of America's most innovative

philanthropic communities. Stand Together CEO Brian Hooks and Koch show how the only way to solve the really big problems – from poverty and addiction to harmful business practices and destructive public policy – is for each and every one of us to find and take action in our unique role as part of the solution. Full of compelling examples of what works – including several first-person accounts from individuals whose lives have been transformed – Koch and Hooks’ refreshing approach promotes partnership instead of partisanship and speaks to people from different perspectives and all walks of life. They show that no injustice is too tough to overcome if you share a deep belief in people, are willing to unite with anyone to do right, and work to empower others from the bottom up.

Sarah Robert Gottlieb
2010-09-21 Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her

amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

Farewell Fear Theodore
Dalrymple 2012 *Farewell Fear*
is a collection of Theodore
Dalrymple's finest essays
written for New English Review
between 2009 and 2012. His
first such collection was
Anything Goes (2011). Once
encountered, Theodore
Dalrymple has become for
many of us a shared treasure-
the cultured, often mordantly
funny social commentator who
was for many years a

psychiatrist at a British prison. This collection of recent essays captures Dalrymple at his best, ruminating at one moment about why poisoners tend to be more interesting than other kinds of murderers and at another why Tony Blair's mind reminds him of an Escher drawing. No one else writes so engagingly and so candidly about the world as it is, not as the politically correct would have it be. -- Dr. Charles Murray author of *Coming Apart* and *The Bell Curve*

Naming the Elephant James W. Sire 2004-05-06 In this companion volume to *The Universe Next Door*, James W. Sire offers his refined definition of a worldview and addresses key questions about the history of worldview thinking, the existential and intellectual formation of worldviews, the public and private dimensions of worldviews and how worldview thinking can help us navigate an increasingly pluralistic universe.

Life at the Bottom Theodore Dalrymple 2001 This is a searing account of life in the

underclass and why it persists as it does, written by a British psychiatrist who treats the poor in a slum hospital and a prison in England. Dr. Dalrymple's key insight is that long-term poverty is caused not by economics but by a dysfunctional set of values.

Days Without End Sebastian Barry 2017-01-24 COSTA BOOK OF THE YEAR AWARD WINNER LONGLISTED FOR THE 2017 MAN BOOKER PRIZE "A true leftfield wonder: Days Without End is a violent, superbly lyrical western offering a sweeping vision of America in the making."—Kazuo Ishiguro, Booker Prize winning author of *The Remains of the Day* and *The Buried Giant* From the two-time Man Booker Prize finalist Sebastian Barry, "a master storyteller" (Wall Street Journal), comes a powerful new

novel of duty and family set against the American Indian and Civil Wars Thomas McNulty, aged barely seventeen and having fled the Great Famine in Ireland, signs up for the U.S. Army in the 1850s. With his brother in arms, John Cole, Thomas goes on to fight in the Indian Wars—against the Sioux and the Yurok—and, ultimately, the Civil War. Orphans of terrible hardships themselves, the men find these days to be vivid and alive, despite the horrors they see and are complicit in. Moving from the plains of Wyoming to Tennessee, Sebastian Barry's latest work is a masterpiece of atmosphere and language. An intensely poignant story of two men and the makeshift family they create with a young Sioux girl, Winona, *Days Without End* is a fresh and haunting portrait of the most fateful years in American history and is a novel never to be forgotten.

Life at the Bottom Theodore Dalrymple 2001 Theodore Dalrymple argues that long-term poverty is caused not by economics but by a

dysfunctional set of values, one that is continually reinforced by an elite culture searching for victims.

Reclaiming Our Health Michelle A. Gourdine 2011-04-26 “An interactive and empowering book” to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans “are affected by serious diseases and health conditions at far greater rates than other Americans.” In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk

of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, “I wrote this book to empower our community to solve our own health problems and save our own lives.”

**Making the Modern World:
Materials and**

Dematerialization Vaclav Smil
2016-12-04 How much further should the affluent world push its material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in *Making the Modern World: Materials and Dematerialization*. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. *Making the Modern World: Materials and Dematerialization* considers the principal materials used throughout history, from wood

and stone, through to metals, alloys, plastics and silicon, describing their extraction and production.

Not With a Bang But a Whimper Theodore Dalrymple
2010-03-16 Cultural Decline, global politics.

Arc of Justice Kevin Boyle
2007-04-01 An electrifying story of the sensational murder trial that divided a city and ignited the civil rights struggle In 1925, Detroit was a smoky swirl of jazz and speakeasies, assembly lines and fistfights. The advent of automobiles had brought workers from around the globe to compete for manufacturing jobs, and tensions often flared with the KKK in ascendance and violence rising. Ossian Sweet, a proud Negro doctor-grandson of a slave-had made the long climb from the ghetto to a home of his own in a previously all-white neighborhood. Yet just after his arrival, a mob gathered outside his house; suddenly, shots rang out: Sweet, or one of his defenders, had accidentally killed one of the whites threatening their

lives and homes. And so it began—a chain of events that brought America's greatest attorney, Clarence Darrow, into the fray and transformed Sweet into a controversial symbol of equality. Historian Kevin Boyle weaves the police investigation and courtroom drama of Sweet's murder trial into an unforgettable tapestry of narrative history that documents the volatile America of the 1920s and movingly re-creates the Sweet family's journey from slavery through the Great Migration to the middle class. Ossian Sweet's story, so richly and poignantly captured here, is an epic tale of one man trapped by the battles of his era's changing times. *Arc of Justice* is the winner of the 2004 National Book Award for Nonfiction.

Now a classic of its genre, *The End of Poverty* distills more than thirty years of experience to offer a uniquely informed vision of the steps that can transform impoverished countries into prosperous ones. Marrying vivid storytelling with rigorous analysis, Sachs lays out a clear conceptual map of the world economy. Explaining his own work in Bolivia, Russia, India, China, and Africa, he offers an integrated set of solutions to the interwoven economic, political, environmental, and social problems that challenge the world's poorest countries. Ten years after its initial publication, *The End of Poverty* remains an indispensable and influential work. In this 10th anniversary edition, Sachs presents an extensive new foreword assessing the progress of the past decade, the work that remains to be done, and how each of us can help. He also looks ahead

across the next fifteen years to 2030, the United Nations' target date for ending extreme poverty, offering new insights and recommendations.

The Beginning and the End

Clément Vidal 2014-05-16 In this fascinating journey to the edge of science, Vidal takes on big philosophical questions: Does our universe have a beginning and an end or is it cyclic? Are we alone in the universe? What is the role of intelligent life, if any, in cosmic evolution? Grounded in science and committed to philosophical rigor, this book presents an evolutionary worldview where the rise of intelligent life is not an accident, but may well be the key to unlocking the universe's deepest mysteries. Vidal shows how the fine-tuning controversy can be advanced with computer simulations. He also explores whether natural or artificial selection could hold on a cosmic scale. In perhaps his boldest hypothesis, he argues that signs of advanced extraterrestrial civilizations are already present in our astrophysical data. His

conclusions invite us to see the meaning of life, evolution and intelligence from a novel cosmological framework that should stir debate for years to come.

The Bookish Life of Nina Hill

Abbi Waxman 2019-07-09 Instant USA Today bestseller! "Abbi Waxman is both irreverent and thoughtful."—#1 New York Times bestselling author Emily Giffin "Meet our bookish millennial heroine—a modern-day Elizabeth Bennet, if you will... Waxman's wit and wry humor stand out. She is funny and imaginative, and "Bookish" lands a step above run-of-the-mill romantic comedy fare."—The Washington Post "Abbi Waxman offers up a quirky, eccentric romance that will charm any bookworm.... For anyone who's ever wondered if their greatest romance might come between the pages of books they read, Waxman offers a heartwarming tribute to that possibility."-- Entertainment Weekly The author of Other People's Houses and The Garden of Small Beginnings delivers a

quirky and charming novel chronicling the life of confirmed introvert Nina Hill as she does her best to fly under everyone's radar. Meet Nina Hill: A young woman supremely confident in her own...shell. The only child of a single mother, Nina has her life just as she wants it: a job in a bookstore, a kick-butt trivia team, a world-class planner and a cat named Phil. If she sometimes suspects there might be more to life than reading, she just shrugs and picks up a new book. When the father Nina never knew existed suddenly dies, leaving behind innumerable sisters, brothers, nieces, and nephews, Nina is horrified. They all live close by! They're all—or mostly all—excited to meet her! She'll have to Speak. To. Strangers. It's a disaster! And as if that wasn't enough, Tom, her trivia nemesis, has turned out to be cute, funny, and deeply interested in getting to know her. Doesn't he realize what a terrible idea that is? Nina considers her options. 1. Completely change her name and appearance. (Too drastic,

plus she likes her hair.) 2. Flee to a deserted island. (Hard pass, see: coffee). 3. Hide in a corner of her apartment and rock back and forth. (Already doing it.) It's time for Nina to come out of her comfortable shell, but she isn't convinced real life could ever live up to fiction. It's going to take a brand-new family, a persistent suitor, and the combined effects of ice cream and trivia to make her turn her own fresh page.

Spoilt Rotten Theodore Dalrymple 2011-05-01 In 'Spoilt Rotten', well-known social commentator Theodore Dalrymple grinds his axe at our child-centric culture where children have become the yardstick of everything we do, safe driving, education, taking of responsibility (none), sentimentality (everywhere).

False Positive Theodore Dalrymple 2019-06-25 The New England Journal of Medicine is one of the most important general medical journals in the world. Doctors rely on the conclusions it publishes, and most do not have the time to

look beyond abstracts to examine methodology or question assumptions. Many of its pronouncements are conveyed by the media to a mass audience, which is likely to take them as authoritative. But is this trust entirely warranted? Theodore Dalrymple, a doctor retired from practice, turned a critical eye upon a full year of the Journal, alert to dubious premises and to what is left unsaid. In *False Positive*, he demonstrates that many of the papers it publishes reach conclusions that are not only flawed, but obviously flawed. He exposes errors of reasoning and conspicuous omissions apparently undetected by the editors. In some cases, there is reason to suspect actual corruption. When the Journal

takes on social questions, its perspective is solidly politically correct. Practically no debate on social issues appears in the printed version, and highly debatable points of view go unchallenged. The Journal reads as if there were only one possible point of view, though the American medical profession (to say nothing of the extensive foreign readership) cannot possibly be in total agreement with the stances taken in its pages. It is thus more megaphone than sounding board. There is indeed much in the *New England Journal of Medicine* that deserves praise and admiration. But this book should encourage the general reader to take a constructively critical view of medical news and to be wary of the latest medical doctrines.
