Turkish Kaleidoscope Jenny White 2021-05-04 A powerful graphic novel that traces Turkey’s descent into political violence in the 1970s through the experiences of four students on opposing sides of the conflict. Turkish Kaleidoscope tells the stories of four university students, Pathosagonists as they name themselves, a society that is at odds by violent political factions. It is 1975 and Turkey is on the verge of civil war. Faruk and Orhan are from conservative shopkeeping families in eastern Anatolia that share a sense of new possibilities. Nuray is the daughter of villagers who have migrated to the provincial city where Yunus, the son of a rich businessman, was raised in central poverty. While attending medical school in Ankara, Faruk draws a reluctant Orhan into a “wing-nationalist group” while Nuray and Yunus join the Left. Against a backdrop of escalating violence, the four students fall in love, have their hearts broken, get married, raise families, and struggle to get on with their lives. But the consequences of these decisions will follow them through their lives as their children begin the story anew, skewed through the kaleidoscope of historical events. Inspired by Jenny White’s own experiences as a student in Turkey during this tumultuous period as well as original oral histories of those who lived the events, Turkish Kaleidoscope’s exploration of factionalism has its own emotional and cultural logic that defies geographical explanations.

Mots de L’histoire

Jacques Rancière 1994 History in our day is still a story, and yet one from which we expect to tell the truth—not just the facts, the names and events of the past, but the invisible order and forces behind them. How can the language of history balance these seemingly contrary tasks—the narrative, the scientific, and the political? This is the question Jacques Rancière explores in “The names of history,” a meditation on the poetics of historical knowledge. In the works of writers from Jules Michelet to Fernand Braudel, Rancière traces an ongoing revolution in historical study, a movement that challenged, in the practice of language, the opposition of science and literature. By way of a commentary on Erich Auerbach, he shows how fictional narrative intertwines with historical narrative to produce a “truth” that retains mythical elements. The poetics of knowledge Rancière develops here is an attempt to identify the literary procedures by which historical discourse escapes literature and gives itself the status of a science. His book is also an appreciation of Braudel, whose work in the Annales school greatly advanced this project. Rancière follows and extends Braudel’s discursive production of new agencies of history, which accounts for both the material conditions in which history takes place and the language in which it is written.

But the book also explores the necessity of such narratives, as well as the creative possibilities implicit within the “failed elegy,” all while examining the various ways that self-destruction can turn into self-preservation.
