Criteria for Excellence 1987 The Search for Excellence in Science Education was inaugurated in 1982 to carry out the National Science Foundation's 1981 initiative, Project Synthesis. The Search establishes criteria for excellence and applies them to actual programs in one or several fields each year. In each area the Search identifies hallmarks of excellence in terms of goals, curriculum, instruction, evaluation, and teacher qualifications. This document, the "Criteria for Excellence," and the science exemplars in 16 areas include: kindergarten through sixth grade science; middle/junior high school science; earth science; physical science; biology; chemistry; physics; science/technology/society; environmental education; energy education; inquiry science; science teaching and career awareness; science in non-school settings; preservice elementary teacher education; preservice secondary teacher education; and science supervision. And as if all that weren't enough, she must put up with her gregarious and over-bearing 67-year-old mother as a housemate. Afraid that if this goes on, she'll finally unravel completely, Anviksha decides that she needs a break - a Bollywood style, solo-trip across Europe kind of break. What she doesn't expect is that her mother, Smita Punjabi, will insist on coming along. **Business Process Management Workshops** Stefanie Rinderle-Ma 2010-04-01 Business process management (BPM) constitutes one of the most exciting search areas in computer science and the BPM Conference together with its workshops provides a distinct platform for presenting the latest research and showing future directions in this area. These proceedings contain the final v-sions of papers accepted for the workshops held in conjunction with the 7th International Conference on Business Process Management (BPM 2009). The BPM 2009 conference and workshops took place in Ulm, Germany. We received many interesting workshop proposals, eight of which were selected. Ultimately the workshops ran on September 7, 2009 featuring highly interesting keynotes, inspiring scienti?c presentations, and fruitful discussions. The history of ?ve years of BPM workshops in a row proves the continued success of the workshop program. First International Workshop on Empirical Research in Business Process Management(ER-BPM 2009). The ER-BPM 2009 workshop addressed the demand for empirical research methods such as experimental or case studies to BPM and invited fellow colleagues to investigate both the potential and the limitations of BPM methods and technologies in practice. The ER-BPM workshop aimed at closing the gap in knowledge on process management and at discussing empirical research in the space of BPM and associated phenomena. 12th International Workshop on Reference Modeling (RefMod 2009). **Fundamentals of Weed Science** Robert Zimdahl 2012-12-02 Fundamentals of Weed Science provides an introduction to the basic principles of weed science for undergraduate courses. It discusses several aspects of weed biology and control, and traces the history of herbicide development. The book begins with an introduction to weeds, covering their definition, characteristics, harmful aspects, and the cost of weed control. This is followed chapters on weed classification, the uses of weeds, weed biology, weed ecology, allelopathy, the significance of plant competition, weed management and control methods, and biological weed control. Later chapters deal with herbicides the most important weed control tools and the ones with the greatest potential for untoward effects. Students of weed science must understand herbicides and the factors governing their use as well as the potential for misuse. These chapters discuss chemical weed control, the properties and uses of herbicides, factors affecting herbicide performance, herbicide application, herbicide formulation, ecological impact of herbicides, pesticide registration and legislation, weed management systems, and the
future of weed science.

**Selected Writings** Mikhail Alekseevich Kuzmin 2005 This book consists largely of previously untranslated work. Kuzmin was a master of many genres: poet, dramatist, writer of narrative prose, and influential literary manifestos. All these facets of Kuzmin’s creativity are represented in this volume, which traces his development from a decadent to a key figure of Russia’s artistic underground during the repression of the Soviet period. A cycle of poems, Thrall (1919), published here for the first time in English, provides the book with its dominant theme. Thrall is a leitmotif of Kuzmin’s early love poetry, where it signifies a lover’s impassioned submission. Kuzmin the playwright is represented here by his only full-length drama, The Death of Nero (1929); Kuzmin the prose writer by two short stories that exemplify contrasting periods of his evolution. The collection also contains two literary manifestos that played pivotal roles in the development of Russian letters. -- Bucknell University Press.

Microbial Interventions in Agriculture and Environment
Dhananjaya Pratap Singh 2020-12-09
Microbial communities and their functions play a crucial role in the management of ecological, environmental and agricultural health on the Earth. Microorganisms are the key identified players for plant growth promotion, plant immunization, disease suppression, induced resistance and tolerance against stresses as the indicative parameters of improved crop productivity and sustainable soil health. Beneficial belowground microbial interactions with the rhizosphere help plants mitigate drought and salinity stresses and alleviate water stresses under the unfavorable environmental conditions in the native soils. Microorganisms that are inhabitants of such environmental conditions have potential solutions for them. There are potential microbial communities that can degrade xenobiotic compounds, pesticides and toxic industrial chemicals and help remediate even heavy metals, and thus they find enormous applications in environmental remediation. Microbes have developed intrinsic metabolic capabilities with specific metabolic networks while inhabiting under specific conditions for many generations and, so play a crucial role. The book Microbial Interventions in Agriculture and Environment is an effort to compile and present a great volume of authentic, high-quality, socially-viable, practical and implementable research and technological work on microbial implications. The whole content of the volume covers protocols, methodologies, applications, interactions, role and impact of research and development aspects on microbial interventions and technological outcomes in prospects of agricultural and environmental domain including crop production, plan-soil health management, food & nutrition, nutrient recycling, land reclamation, clean water systems and agro-waste management, biodegradation & bioremediation, biomass to bioenergy, sanitation and rural livelihood security. The covered topics and sub-topics of the microbial domain have high implications for the targeted and wide readership of researchers, students, faculty and scientists working on these areas along with the agri-activists, policymakers, environmentalists, advisors etc. in the Government, industries and non-government level for reference and knowledge generation.

The Swallows of Kabul
Yasmina Khadra 2007-12-18
Set in Afghanistan's capital city of Kabul, this extraordinary novel "puts a human face on the suffering inflicted by the Taliban" (San Francisco Chronicle), taking readers into the seemingly divergent lives of two couples—and depicting with compassion and exquisite details the mentality of Islamic fundamentalists and the complexities of the Muslim world. Mohsen comes from a family of wealthy shopkeepers whom the Taliban has destroyed; Zunaira, his wife, exceedingly beautiful, was once a brilliant teacher and is now no longer allowed to leave her home without an escort or covering her face. Intersecting their world is Atiq, a prison keeper, a man who has sincerely adopted the Taliban ideology and struggles to keep his faith, and his wife, Musarrat, who once rescued Atiq and is now dying of sickness and despair. Desperate, exhausted Mohsen wanders through Kabul when he is surrounded...
by a crowd about to stone an adulterous woman. Numbed by the hysterical atmosphere and drawn into their rage, he too throws stones at the face of the condemned woman buried up to her waist. With this gesture the lives of all four protagonists move toward their destinies. Yasmina Khadra brings readers into the hot, dusty streets of Kabul and offers them an unflinching but compassionate insight into a society that violence and hypocrisy have brought to the edge of despair.
