German Submachine Guns, 1918-1945 Luc Guillou 2018-04-28 Germany's World War I- and World War II-era submachine guns are all featured in this fully illustrated book. Early Bergmann models are presented first showing their development from the MP18, through to the MP35, followed by discussions of the Schmeisser MP28, Steyr MP34, and Erma "EMP." An extensive chapter on the famous MP38/40 features a close look at production numbers, manufacturers, and markings. Foreign and late-war models are also presented, showing the wide variety of SMGs used by the Wehrmacht during WWII. The book concludes with the legendary and influential MKb42, MP43/1, MP44, and StG44 series of assault rifles. Their wartime use is shown in superb period photography and clear, up-close color images. Accessories such as magazines, ammunition, pouches, and silencers are featured throughout the book, as well as rarely seen WWI- and WWII-related uniform and equipment items.

The Didascalicon of Hugh of St. Victor Hugh (of Saint-Victor) 1991 This is the first complete translation into English of Hugh of St. Victor's Didascalicon, composed in the late 1130's.

The Makarov Pistol Henry C Brown 2016-09-23 The Makarov Pistol entered service as the primary service pistol in the armed forces and security services of the Soviet Union in 1951. It continues to serve in the forces of the Russian Federation, and the former Soviet Union, and of nations around the world. It has been estimated that some 5 million Makarov pistols had been produced in the Soviet Union and Russian Federation alone up 2002, and production continues for military, police and civil markets in Russia to this day. Additionally, the Makarov Pistol was also produced under license in East Germany, Bulgaria and China. The Makarov Pistol has served around the world in conflicts and security duties in all climates and terrains, and can claim the distinction of being the first firearm to be carried into space. Despite the large numbers and the widespread use of the Makarov Pistol, it remained a rare and little known firearm among western collectors until the end of the Cold War. In the 1990s however, large numbers of Makarov Pistols, accessories and its previously unobtainable 9x18mm cartridge were exported to the west with the end of the Cold War and the collapse of the Eastern Bloc, opening up a new field of firearms collecting. While collectors have been documenting and recording the many aspects of the Makarov Pistol over the last 25 years, this information has never been systematically consolidated into a handy reference book - until now. This book documents the Makarov Pistols produced by the Soviet Union and Russian Federation, and the Pistole M, the version produced in East Germany. This is the first volume of a two volume series documenting the history, features, manufacturing variations and markings of the Makarov Pistol, its accessories, documentation and other collectibles available to the collector. This is a book by collectors, for collectors, and it is the first comprehensive collector's review of the Makarov Pistol.

Stalingrad Antony Beevor 1999-05-01 The Battle of Stalingrad was not only the psychological turning point of World War II: it also changed the face of modern warfare. From Antony Beevor, the internationally bestselling author of D-Day and The Battle of Arnhem. In August 1942, Hitler's huge Sixth Army reached the city that bore Stalin's name. In the five-month siege that followed, the Russians fought to hold Stalingrad at any cost; then, in an astonishing reversal, encircled and trapped their Nazi enemy. This battle for the ruins of a city cost more than a million lives. Stalingrad conveys the experience of soldiers on both sides, fighting in inhuman conditions, and of civilians trapped on an urban battlefield. Antony Beevor has interviewed survivors and discovered completely new material in a wide range of German and Soviet archives, including prisoner interrogations and reports of desertions and executions. As a story of cruelty, courage, and human suffering, Stalingrad is unprecedented and unforgettable. Historians and reviewers worldwide have hailed Antony Beevor's magisterial Stalingrad as the definitive account of World War II's most harrowing battle.

Manual of the Automatic Rifle (Chauchat) Drill - United States. Army. American Expeditionary Forces 1918

The FN MAG Machine Gun Chris McNab 2018-07-26 For six decades, the 7.62mm FN MAG has been a dominant general-purpose machine gun (GPMG) in worldwide arsenals. Three qualities have guaranteed this enduring status - reliability, ease of operation, and firepower. Several nations have license-produced the weapon as their standard GPMG, including the British (as the L7) and the Americans (M240), and in total more than 80 nations have adopted the FN MAG. The machine gun has also been modified extensively for vehicular, naval, and aircraft platforms, demonstrating versatility in the air, on sea, and on land. In this book, Chris McNab charts the technical evolution of this extraordinary weapon, created by Belgian company Fabrique Nationale d'Herstal. From the jungles of South East Asia, to the deserts of the Middle East, and the icy battlefields of the Falklands, this study explores the origins, development, combat use, and legacy of the FN MAG machine gun, a dominant weapon in its field for more than a half-century.

The Encyclopedia of Handheld Weapons James Marchington 2002-07-01 A guide to pistols, revolvers, rifles, shotguns, knives, daggers, bayonets, and other handheld weapons that includes over 350 entries.

Arms Trafficking and Colombia Kim Cragin 2003-10-24 Colombia has experienced significant political instability and violence over the past century due to a number of factors, including the proliferation of small-arms trafficking. The authors identify the sources and routes used by arms traffickers to acquire, buy, sell, receive, transfer, and ship weapons. They also examine the various groups and individuals who purchase and use these munitions. The authors examine Colombia's political conflict through the lens of small-arms trafficking and conclude with policy implications for the United States.

Eichmann in Jerusalem Hannah Arendt 1970

World Report on Violence and Health World Health Organization 2002 This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

It Stephen King 2016-01-01 It: Chapter Two—now a major motion picture! Stephen King’s terrifying, classic #1 New York Times bestseller, “a landmark in American literature” (Chicago Sun-Times)—about seven adults who return to their hometown to confront a nightmare they had first stumbled on as teenagers...an evil without a name: It. Welcome to Derry, Maine. It’s a small city, a place as hauntingly familiar as your own hometown. Only in Derry the haunting is real. They were seven teenagers when they first stumbled upon the horror. Now they are grown-up men and women who have gone out into the big world to gain success and happiness. But the promise they made twenty-eight years ago calls them reunite in the same place where, as teenagers, they battled an evil creature that preyed on the city’s children. Now, children are being murdered again and their repressed memories of that terrifying summer return as they prepare to once again battle the monster lurking in Derry’s sewers. Readers of Stephen King know that Derry, Maine, is a place with a deep, dark hold on the author. It reappears in many of his books, including Bag of Bones, Hearts in Atlantis, and 11/22/63. But it all starts with It. “Stephen King’s most mature work” (St. Petersburg Times), “It will overwhelm you...to be read in a well-lit room only” (Los Angeles Times).

The Pregnancy Instruction Manual Sarah Jordan 2014-11-11 At last! A comprehensive guide to worry-free pregnancy! Bringing a baby into the world is one of life’s defining moments. But there’s no getting around it: Being pregnant can feel overwhelming. Fortunately, The Pregnancy Instruction Manual is here to answer all of your most pressing questions. Will the morning sickness ever go away? How big is my baby at 26 weeks? Are beef jerky cravings normal? How do I ward off the unwanted tummy-touch era? And most of all, will I ever get a good night’s rest again? Expectant parents will find the answers here courtesy of veteran mom Sarah Jordan and certified OB-GYN (and three time dad) David Ufberg.

Bonica's Management of Pain Jane C. Ballantyne 2018-11-19 Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This exhaustively comprehensive edition of the classic Bonica’s Management of Pain, first published 65 years ago, expertly combines the scientific underpinnings of pain with clinical management. Completely revised, it discusses a wide variety of pain conditions—including neuropathic pain, pain due to cancer, and acute pain situations—for adults as well as children. An international group of the foremost experts provides comprehensive, current, clinically oriented coverage of the entire field. The contributors describe contemporary clinical practice and summarize the evidence that guides clinical practice.

All About Dogs Patti Chiappa 2017-07-31 We love our pets. Dogs have always been man’s best friend. Our loyal companions, our protectors. They have served us in our homes, in wartime, and the blind. They love us unconditionally. They would lay down their life for us. The domestic dog is a member of the genus Canis (canines) that forms part of the wolf-like canids. New research seems to show that the dog’s high sociability may be affected by the same genes as in humans. Dogs perform many roles for people, such as hunting, herding, pulling loads, protection, assisting police and military, companionship and, more recently, aiding handicapped individuals. This influence on human society has given them the sobriquet “man’s best friend." In this book, you will read about famous dogs,

different type of dog breeds, what to fed your dog, how to train your new puppy, dog names, best animal hospitals in the U.S.A., what not to fed your dog, where to get a service dog, signs that your dog may be sick and much more. If you love dogs, this book was written for you!

Guns and how They Work Ian V. Hogg 1979 This book is about how guns work. Leaving aside, for the moment, the moral and psychological aspects, whatever else you may think of firearms, you have to admit that they are remarkable mechanical achievements. We have, in this book, tried to bring out some of the mechanics of firearms and show how the various technical problems were overcome, whilst not losing sight of the broad spectrum of historical development. Highlighted in the book are twenty-four of those guns worthy of the title "famous" because of their performance, their historical significance, or sheer charisma. For those unfamiliar with some of the terms and verbal shorthand associated with firearms, we have appended a section at the end of the book which will explain the mysteries of calibre notation and conversion. - Introduction.

The Second World War Antony Beevor 2012-06-05 A masterful and comprehensive chronicle of World War II, by internationally bestselling historian Antony Beevor. Over the past two decades, Antony Beevor has established himself as one of the world’s premier historians of WWII. His multi-award winning books have included Stalingrad and The Fall of Berlin 1945. Now, in his newest and most ambitious book, he turns his focus to one of the bloodiest and most tragic events of the twentieth century, the Second World War. In this searing narrative that takes us from Hitler’s invasion of Poland on September 1st, 1939 to V-J day on August 14, 1945 and the war’s aftermath, Beevor describes the conflict and its global reach -- one that included every major power. The result is a dramatic and breathtaking single-volume history that provides a remarkably intimate account of the war that, more than any other, still commands attention and an audience. Thrillingly written and brilliantly researched, Beevor’s grand and provocative account is destined to become the definitive work on this complex, tragic, and endlessly fascinating period in world history, and confirms once more that he is a military historian of the first rank.

Odontoiatria restaurativa. Procedure di trattamento e prospettive future Franco Brenna 2012 With more than 2,080 vibrant, full-color clinical photographs, this book presents the Italian Academy of Conservative Dentistry’s authoritative coverage of endodontics, cosmetics, prosthodontics, traumatology, and general operative principles with unparalleled visual detail. This atlas-style resource guides you step-by-step through essential procedures and presents realistic case scenarios to help you deepen your understanding of restorative principles and successfully apply your knowledge to patient treatment. More than 2,200 world-class photographs provide rich clinical detail to enhance your understanding of commonly encountered conditions. Step-by-step procedures in each chapter are integrated with interesting case studies to clarify techniques and help you confidently apply concepts in the clinical setting. Summary boxes provide fast access to key chapter content. Clinical approach reflects the trusted expertise of the Accademia Italiana di Conservativa (Italian Academy of Conservative Dentistry) and familiarizes you with the latest scientific research and treatment techniques.

German Daggers of World War II - A Photographic Reference Thomas M. Johnson 2005-03 This four volume set by Thomas M. Johnson, a leading collector and authoritative researcher, has been compiled to serve as a useful and authoritative reference on the daggers of Nazi Germany, and have been designed to aid not only the beginning collector, but also the seasoned advanced collector and specialist. These volumes are the result of many years of arduous research conducted on both sides of the Atlantic, and are a scholarly study that is more than a perfunctory annotation and illustration of the known basic patterns. Also, the series is a study of a culture and the crafts that actually produced the blades, as well as being a manual in the art of collecting them. The embracing scope is both educational and recreational and it adds a whole new dimension to this popular collecting subject as a whole. Within these books one will see coverage of the historical background; the manufacturing techniques; constructional information; the actual basic patterns; variations and rarities; the art of collecting, and a whole host of other salient facts of absorbing interest.

Warsaw Pact Infantry and Its Weapons John Ivor Headon Owen 1976

The Teen Owner's Manual Sarah Jordan 2014-07-22 At Last! A Comprehensive Guide to Understanding Teens Hormones. Rebellion. Moodiness. Peer pressure. No parent can be fully prepared for all the challenges associated with adolescence. Fortunately, The Teen Owner's Manual is here to answer your most pressing questions: How can I teach my teenager to make smart decisions? How do I keep her safe on the Web? How do I get him to communicate? How and when should I talk to her about sex? Whatever your concerns, you'll find the answers right here—courtesy of parenting author Sarah Jordan and adolescent medicine specialist Dr. Janice Hillman.

Less Than Nothing Slavoj Zizek 2012-05-22 For the last two centuries, Western philosophy has developed in the shadow of Hegel, an influence each new thinker struggles to escape. As a consequence, Hegel’s absolute idealism has become the bogeyman of philosophy, obscuring the fact that he is the defining philosopher of the historical transition to modernity, a period with which our own times share startling similarities. Today, as global capitalism comes apart at the seams, we are entering a new period of transition. In Less Than Nothing, the product of a career-long focus on the part of its author, Slavoj Žižek argues it is imperative we not simply return to Hegel but that we repeat and exceed his triumphs, overcoming his limitations by being even more Hegelian than the master himself. Such an approach not only enables Žižek to diagnose our present condition, but also to engage in a critical dialogue with key strands of contemporary thought—Heidegger, Badiou, speculative realism, quantum physics, and cognitive sciences. Modernity will begin and end with Hegel.

ANTI-DuRING Friedrich Engels, Clemens Palme Dutt 1900-01-01

Memories, Dreams, Reflections C. G. Jung 2011-01-26 An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. Memories, Dreams, Reflections is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung’s VII Sermones ad Mortuos.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Redes sin causa Lovink, Geert 2016-12-20 Con la gran mayoría de los usuarios de Facebook atrapados en un frenesi de friending, liking y commenting, ¿en qué momento podemos desconectar para comprender las consecuencias de nuestras infosaturadas vidas? ¿Qué nos obliga a participar tan diligentemente con los sistemas de redes sociales? Redes sin causa examina nuestra obsesión colectiva con la identidad y la autogestión, junto con la fragmentación y la información de sobrecarga endémica de la cultura contemporánea en línea.Con escasez de teoría sobre las consecuencias sociales y culturales de los servicios en línea más populares, Lovink ofrece un análisis crítico pionero de nuestro sobrevalorado mundo en red a partir de estudios de casos en los motores de búsqueda, video online, blogging, radio digital, activismo en los media y la saga de Wikileaks. Este libro ofrece un poderoso mensaje a profesionales de los medios y a los teóricos: colectivamente vamos a dar rienda suelta a nuestra capacidad crítica para influir en el diseño de la tecnología y en los espacios de trabajo, si no queremos desaparecer en la nube. Incisivo pero nunca pesimista, Lovink, partiendo de su larga experiencia en la investigación de medios de comunicación, nos ofrece una crítica de las estructuras políticas y poderes conceptuales incluidos en las tecnologías que dan forma a nuestra vida cotidiana.
1434 Gavin Menzies 2008-06-03 Poses a controversial argument that China initiated the Renaissance, in a painstakingly researched chronicle that cites the appearance of Chinese ambassadors in early fifteenth-century Tuscany who met with Pope Eugenius IV and shared history-influencing maps and technology. 150,000 first printing.

For Your Eyes Only Ben Macintyre 2009-04-06 A riveting look into the world of James Bond and his creator.

Walther Pistols John Walter 2022-04-28 While the PP and PPK were intended for police work, the Walther P 38 was produced for the Germany military; all three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP (Polizeipistole), a double-action semi-automatic pistol intended for the law-enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931. Intended to replace the P 08 Luger, the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II, but never entirely replaced the Luger in German service. All three pistols went on to have lengthy and varied service across the world after 1945. Both the PP and the PPK remain in production today, while the P 38 re-emerged as the P1 and equipped West German forces from 1963 until 2004, when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants, such as the tiny .25 ACP Modell 9.

Red Horizons Ion Mihai Pacepa 1990-04-15 A Communist spy chief reveals the unbridled and oppressive power wielded by the Party in Romania and other Eastern Bloc countries
