Elisa Braden  
2016-08-30  
What a girl wants... Miss Viola Darling always gets what she wants. Always. And what she wants more than anything is to marry James Kilbrenner, the Earl of Tannenbrook. And she has her heart set on James. If only he will bend to a bit of persuasion. Is an earl like no other... James Kilbrenner knows how determined the entirely-too-beautiful Miss Darling can be—the daft woman cornered him at a perfectly respectable dinner and mangled his cravat before he could escape. He has no desire to marry, less desire to be pursued, and will certainly not kiss her kissable lips until they are both breathless, no matter how tempted he may be. And only the right one will do... Thrown in her path by a meddling marchioness, James finds himself under sensual siege from a tiny, flirtatious sprite who puts both his heart and his vow to remain unwed at risk. And when scandal looms, he learns the hard way that a man can resist only so long before the indomitable Miss Darling gets her way.

**Birds of Belize**

H. Lee Jones 2010-03-01

“Fills a major gap in the bird identification literature . . . A must for birders planning a trip to this friendly patch of Central America.” —The Curious Naturalist

With nearly six hundred identified species of birds—and an average of five “new” species discovered annually—Belize is becoming a birding hotspot for amateur and professional birders from around the globe. Thousands of birders visit the country each year to enjoy Belize’s amazing abundance and variety of both temperate and tropical birds in natural habitats that remain largely unspoiled. But until now, despite the growing need for an authoritative identification guide, birders have had to rely on regional field guides that offer only limited information on Belizean birds. Birds of Belize provides the first complete guide to the identification of all currently known species—574 in all. The birds are grouped by families, with an introduction to each family that highlights its uniquely identifying characteristics and behaviors. The species accounts include all the
details necessary for field identification: scientific and common names, size, plumage features, thorough voice descriptions, habitat, distribution, and status in Belize. Full color, expertly drawn illustrations by noted bird artist Dana Gardner present male and female, juvenile and adult, and basic and alternate plumages to aid visual identification throughout the year, while 234 range maps show the birds’ distribution and seasonality in Belize. A comprehensive bibliography completes the volume. “A first-class book that will enable users to identify any bird they encounter in Belize.” —Victor Emanuel, President, Victor Emanuel Nature Tours

**Parentology** Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to
change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Parentology
effectively equips parents with the latest knowledge about how to raise children, and it is presented in a way that is entertaining and thought-provoking. Conley’s experiments are both entertaining and informative, and he uses humor to make serious points about parenting.

**Spiritual Purification in Islam**
Gavin Picken 2011-03-21

Purification of the soul is a principle that is central to understanding Islamic spirituality but despite this, relatively little has been written explicitly in the Islamic tradition regarding this discrete method of spiritual purification. This book examines the work of a scholar of this discipline, al-Hārith al-Muhāsibī, who lived and worked during the classical Islamic period under the Abbāsids. Although al-Muhāsibī was well known for his skills in many disciplines, including the Qur’ān, Prophetic narration and scholastic theology, it is his mastery in the field of Islamic spirituality and moral psychology for which he is best remembered. Assessing the extent to which the political, social and economic factors played a part in his life and work, Gavin Picken provides a comprehensive overview of his work and its great significance in the development of Islamic spirituality. Reconstructing his life in chronological order and providing the most comprehensive appraisal of his works to date, it explores a facet of al-Muhāsibī’s teaching which as yet has not been studied, namely his understanding, concept and methodology regarding the purification of the soul within the Islamic paradigm. As such, it will be of great interest not only to researchers and students of Sufism but also to scholars of comparative spirituality and mysticism.
