GNU Emacs Lisp Reference Manual 12 Bill Lewis 2015-11-06 Most of the GNU Emacs text editor is written in the programming language called Emacs Lisp. You can write new code in Emacs Lisp and install it as an extension to the editor. Some of the best features in Emacs are written as Emacs Lisp code. This is a full computer programming language in its own right. You can use it as would you any other programming language. Because Emacs Lisp is designed for use in an editor, it has special features for scanning and parsing text as well as features for handling files, buffers, displays, subprocesses, and so on. Emacs Lisp is closely integrated with the edition facilities; thus, editing commands can have features that can also conveniently be called from Lisp programs, and parameters for customization are ordinary Lisp variables. This manual attempts to be a full description of Emacs Lisp. For a beginner's introduction to Emacs Lisp, see An Introduction to Emacs Lisp Programming, by Bob Chasell, also published by the Free Software Foundation. This manual presumes considerable familiarity with the use of Emacs for editing; see The GNU Emacs Manual for basic information. Generally speaking, the earlier chapters describe features of Emacs Lisp that have counterparts in many programming languages, and later chapters describe features that are peculiar to Emacs Lisp or relate specifically to editing. This is the GNU Emacs Lisp Reference Manual, corresponding to Emacs version 24.5. As Emacs Lisp became such a big project over the years, we had to split this reference manual in two parts that are two separate physical books. To keep it consistent with our digital manual, the references and page numbers cover both physical books as it were. Therefore please note that you probably want to have both parts.

Win Every Argument Melodi Haan 2022-11-15 In Win Every Argument, award-winning British-American journalist Melodi Haan shows you how to argue, debate and master public speaking. No one ever goes into an argument intending to lose. Indeed, it is no exaggeration to say that every single person on the face of the planet - women and men, young and old, rich and poor, believers and non-believers - has an argument. And they're everywhere. Whether it is in the comments section on Facebook, or in the House of Parliament, or at the dinner table. We cannot escape the human urge, need, and - yes - desire to argue. But arguing itself tends to get a bad rap. It’s blamed for everything from political polarization to marital breakdown. But Melodi Haan has turned arguing into an art form, and contends that debate and argument is the lifeforce of democracy, as well as the surest way to establish the truth. Arguments can help us solve problems and show us things we haven’t considered before. An intrinsically valid demonstration. Anyone can win an argument. Melodi Haan will teach you how.
