the cross-cultural relevance of these findings. And since it is hardly any investigations in non-Judeo-Christian cultures. The present study can help by throwing light on

questionnaires that survey religiosity and paranormal beliefs and experiences. Paranormal beliefs and experiences surveyed included sacred as well as

(882) and women (918) with an average age of about 20 years. The subjects are predominantly Hindu (85%), with 12% Christian and 3% Muslim student

Bernadine Zweber 1993 The Relationship Between Type, as Identified by the Myers-Briggs Type Indicator, and Other Factors of Tenth Graders at Coon Rapids High School Foundations of Psychological Testing authors Sandra A. McIntire and Leslie A. Miller aim to prepare students to be informed consumers—as test users or test takers—not to teach students to
test/assessment procedure and then provide a case example or examples to show how assessment data can be meaningfully incorporated into the counseling

and the potential for modifying intellectual styles. Applications, and several illuminating case reports.

Students in a Baccalaureate Construction Program Richard Anthony Vomela 1994 The testing of Type as a Variable During the graduate program of psychology, industry, industrial

research and development, and business. Additional data are given for the MBTI and its 16 Personality Factor (16PF) equivalent. The second and third editions of the book

with international participation. The present volume is a compilation of the major presentations at the conference and workshop, which are appropriately

awaited. Parapsychology, considered as the discipline to study psi(psychic abilities), is essentially the science of siddhis (extraordinary human abilities). Yoga & Parapsychology 2000

4 subsections, Business has 13 subsections. Does not contain reliability, validity, and normative data. Use the

students for conducting culturally competent psychological assessment for clinicians, educators, and researchers.

Tests in Print VI is the sum total of the current and most recent available information in a variety of psychology, education, business, and related fields. Tests in Print also feature information on the construction, use, and validity of the tests being considered. Tests in Print is the first source of information on over four thousand instruments.

The Handbook of Multicultural Assessment: A Multivariate Analysis of Myers’ and Briggs’ Personality Types in Terms of Vocational Interests Tamar L. Fein 2000

are the best free, helpful, and scientifically robust assessments available, typically used for professional students in psychology, education, business, and related fields. The handbook also features information on the construction, use, and validity of the tests being considered. Tests in Print is the first source of information on over four thousand instruments.

The Handbook of Multicultural Assessment: A Multivariate Analysis of Myers’ and Briggs’ Personality Types in Terms of Vocational Interests Tamar L. Fein 2000

fits a pressing need for a comprehensive bibliography of all commercially available English language tests is print. Although these volumes are useful in and of themselves, their maximum usefulness lies in the availability and content of the Mental Measurements Yearbooks. Although information on available tests and specific test bibliographies is valuable, the greatest service which Tests in Print can perform is to encourage test users to choose tests more wisely by consulting the MMY test reviews, test reviews from journals, and the professional literature on the construction, use, and validity of the tests being considered. Tests in Print is first and foremost for information on over four thousand instruments.
