**Newman's Billing and Coding Specialist Study Guide**

Xaiver Newman 2012-01-01 Medical coding professionals provide a key step in the medical billing process. Every time a patient receives professional health care in a physician’s office, hospital outpatient facility or ambulatory surgical center (ASC), the provider must document the services provided. The medical coder will abstract the information from the documentation, assign the appropriate codes, and create a claim to be paid, whether by a commercial payer, the patient, or CMS. While the medical coder and medical biller may be the same person or may work closely together to make sure all invoices are paid properly, the medical coder is primarily responsible for abstracting and assigning the appropriate coding on the claims. In order to accomplish this, the coder checks a variety of sources within the patient's medical record, (i.e. the transcription of the doctor's notes, ordered laboratory tests, requested imaging studies and other sources) to verify the work that was done. Then the coder must assign CPT codes, ICD-9 codes and HCPCS codes to both report the procedures that were performed and to provide the medical biller with the information necessary to process a claim for reimbursement by the appropriate insurance agency. This text is intended to dispel any ambiguity prior to taking your national certification. This text contains over 400 preparatory examination questions, covering ICD-9, ICD-10, Revenue cycle, Medical report extrapolation assignments, HCPCS, UB04, and CPT.

Documentation Guidelines for Evaluation and Management Services
* American Medical Association 1995
* Student Study Guide for use with Administrative Medical Assisting A Workforce Readiness Approach
* Terri Wyman 2011-06-02 This Student Study Guide provides students with an opportunity to review and master the concepts and skills introduced in the textbook, Administrative Medical Assisting: A Workforce Readiness Approach. Together, the textbook and the Student Study Guide form a complete learning package.

Administrative Medical Assisting: A Workforce Readiness Approach will prepare students to have on their billing staffs’ desks the following: Guides to help them think about what they would do in real-life situations. Laboratory assignments at the beginning of each chapter give readers a guide on each chapter’s procedures, including guidelines on how many practices are required, which study guide pages correlate to the procedure, and which procedures are also in the procedural videos. Key term assessment tests readers’ knowledge of the terms presented in the main text. Evaluation of Learning questions assess readers’ progress and are an excellent tool to prepare for the certification exam. Practice for Competency checklists help readers practice each of their clinical skills. Pharmacology math exercises give readers a chance to practice their basic math skills in a way that relates to their future job. Chapter assignment tables at the beginning of each chapter guide readers through the textbook and study guide chapters, and provides a great tracking device for recording progress of textbook reading assignments and study guide activity assignments. NEW! Updated material aligned to most current CAAHEP and ABHES competencies ensures success and employability for today’s medical assistants. NEW! Material from the chapter on nutrition is also incorporated into the accompanying study guide material. NEW! Updated content on emergency preparedness and medical records ensure readers are up-to-date on these key topics. NEW! Application to Simchart for the Medical Office where appropriate allows readers to prepare for the real world by working on Elsevier’s own educational EHR. NEW! Expanded A&P key terminology sections give readers ample A&P key term practice.

Virtual Medical Office for Insurance Workbook with Access Card
* Elsevier 2016-02-01 Practice medical coding and billing without leaving the classroom! Virtual Medical Office for Insurance includes 15 virtual patient encounters to help you develop the critical thinking and decision-making skills you’ll need to work as an insurance billing specialist. Virtual Medical Office begins each study guide lesson with a reading assignment from your text, and then provides online exercises for practice with coding procedures and diagnoses, filing insurance claims, problem solving for rejected claims, catching common coding errors, and much more. VMO provides a safe environment in which you can practice what you are learning in the text! 15 unique cases highlight CAAHEP and ABHES competencies with exercises relating to different payers, different billing situations, and common coding errors. Nearly two hours of video include five videos for each case: one at check-in, three in the exam room, and one at checkout, providing opportunities to practice and learn how patients are processed through the medical office. Realistic data includes medical records for each case, an office policy manual, a fee schedule, a daysheet, and more. A study guide (available in print and on Evolve) complements the videos with lessons that correlate reading assignments with patients in the virtual practice. Promotes active learning as you collect information from a variety of sources to make coding and billing decisions. Encourages critical thinking as you sharpen problem-solving skills and troubleshoot rejected claims. Offers proofreading practice by asking you to spot and correct common coding errors, as in real practice. Augments knowledge of HIPAA by letting you compare the policy manual, the contents of each case’s medical record, and what actually happens in the videos. Makes lessons available online, allowing you to complete assignments and submit them from the comfort of your own computer and instructor. Focuses on key objectives through brief, manageable chunks of information. introduces the VMO software with a detailed tour of the medical office. Includes a detailed office tour to make it easier to use the VMO software and the online study guide. UPDATED content reflects changes in the main text and in the medical
The HCISPP certification is a globally-recognized, vendor-neutral exam for healthcare information security and privacy professionals, created and administered by ISCX. This new HCISPP certification, focused on health care information security and privacy, is similar to the CISSP, but it has only six domains and is narrowly targeted to the specific demands of health care information security. Time Virtue and Justin Rainey have created the HCISPP Study Guide to walk you through all the material covered in the exam’s Common Body of Knowledge. The six domains are covered completely and as concisely as possible with an eye to acing the exam. Each of the six domains has its own chapter that includes material to aid the test-taker in passing the exam, as well as a chapter devoted entirely to test-taking skills, sample exam questions, and exam strategy. The guide’s structure is designed to put you on the forefront of health care information privacy and security with the HCISPP Study Guide and this valuable certification. Provides the most complete and effective study guide to prepare you for passing the HCISPP exam - contains only what you need to pass the test, and no fluff! Completely aligned with the six Common Body of Knowledge domains on the exam, walking you step by step through understanding each domain and successfully answering the exam questions. Optimize your study guide with this straightforward approach - understand the key objectives, pass the test, and you will feel like you’ve already taken it.
