The Greening of Theology Steven Bouma-Prediger 1995 This volume examines the contributions of three contemporary theologians - Rosemary Radford Ruether, Joseph Sittler, and Jürgen Moltmann -- to the development of Christian ecological theology. Against the charge that the Christian tradition is ecologically bankrupt, the author demonstrates the intellectual and spiritual resources available within Christianity for addressing ecological issues. Of particular interest are Ruether's doctrine of God and her emphasis on ecojustice, Sittler's cosmic Christology and reconception of the relation between nature and grace, and Moltmann's doctrine of the Holy Spirit and argument for social trinitarianism. Beyond evaluating the issues raised by Ruether, Sittler, and Moltmann, the author presents sixteen theses or desiderata for any adequate Christian ecological theology.

Abnormal Psychology Richard P. Halgin 2007 Focused, fresh, and engaging, this text captures student interest and facilitates comprehension through the widespread use of current and highly relevant clinical case studies. The fully-revised fifth edition maintains the integrative approach to treatment using the biopsychosocial model, the emphasis on cases, and the succinct coverage that have been the foundations of the text's success. It now features a more focused approach than previous editions, with the goal of presenting only the most relevant research and clinical material.

A Bright Red Scream Marilee Strong 1999-10-01 "I highly recommend [A Bright Red Scream], because it's beautifully written and . . . so candid." —Amy Adams, star of HBO's Sharp Objects in Entertainment Weekly Self-mutilation is a behavior so shocking that it is almost never discussed. Yet estimates are that upwards of eight million Americans are chronic self-injurers. They are people who use knives, razor blades, or broken glass to cut themselves. Their numbers include the actor Johnny Depp, Girl Interrupted author Susanna Kaysen, and the late Princess Diana. Mistakenly viewed as suicide attempts or senseless masochism—even by many health professionals—"cutting" is actually a complex means of coping with emotional pain. Marilee Strong explores this hidden epidemic through case studies, startling new research from psychologists, trauma experts, and neuroscientists, and the heartbreaking insights of cutters themselves—who range from troubled teenagers to middle-age professionals to grandparents. Strong explains what factors lead to self-mutilation, why cutting helps people manage overwhelming fear and anxiety, and how cutters can heal both their internal and external wounds and break the self-destructive cycle. A Bright Red Scream is a groundbreaking, essential resource for victims of self-mutilation, their families, teachers, doctors, and therapists.

The Psychology of Superheroes Robin S. Rosenberg 2008-02-09 This latest installment in the Psychology of Popular Culture series turns its focus to superheroes. Superheroes have survived and fascinated for more than 70 years in no small part due to their psychological depth. In The Psychology of Superheroes, almost two dozen psychologists get into the heads of today's most popular and intriguing superheroes. Why do superheroes choose to be superheroes? Where does Spider-Man's altruism come from, and what does it mean? Why is there so much prejudice against the X-Men, and how could they have responded to it, other than the way they did? Why are super-villains so aggressive? The Psychology of Superheroes answers these questions, exploring the inner workings our heroes usually only share with their therapists.

Authoritative Guide to Self-Help Resources in Mental Health John C. Norcross 2000-08-10
Self-help materials have become a prime source of psychological advice for millions of Americans. While many self-help resources provide high-quality information, others may be misleading, inaccurate, or even harmful. This indispensable volume reveals which are the good ones, and why. Based on the results of 5 acclaimed national studies involving over 2,500 mental health professionals, the book reviews and rates 600+ self-help books, autobiographies, and popular films. In addition, hundreds of Internet sites are described and evaluated by a clinical psychologist, and valuable listings are provided of national and online support groups. The concluding chapter presents practical guidelines for selecting an effective self-help resource. Addressing 28 prevalent clinical disorders and life challenges—from ADHD, Alzheimer's, and anxiety disorders, to marital problems and mood disorders, to weight management and women's issues—this timely book will be tremendously useful to consumers and professionals alike.
The Birth of the Mind Gary Fred Marcus 2004 A psychologist offers a detailed study of the genetic underpinnings of human thought, looking at the small number of genes that contain the instructions for building the vastly complex human brain to determine how these genes work, common misconceptions about genes, and their implications for the future of genetic engineering.

Practical Applications of Psychology Anthony F. Grasha 1983
Complex Cognition IBM Professor of Psychology and Education Robert J. Sternberg, PhD 2001 The other, a contrasting and more contemporary approach, is the model of "bounded rationality," according to which people are surprisingly irrational, or at best arational, in their thinking, often deriving ill-conceived shortcuts that lead them to wrong conclusions. This text is a synthesis of these two approaches, combining the best elements of each to offer a radically inclusive new theory. It emphasizes multiple points of view, including the objective, but also the subjective views of the self and others.
The Man Who Mistook His Wife For A Hat: And Other Clinical Tales Oliver Sacks 1998
Presents a series of stories about men and women who, representing both medical and literary oddities, raise fundamental questions about the nature of reality.
Exploring the Self Dan Zahavi 2000-01-01 The aim of this volume is to discuss recent research into self-experience and its disorders, and to contribute to a better integration of the different
empirical and conceptual perspectives. Among the topics discussed are questions like 'What is a self?,' 'What is the relation between the self-givenness of consciousness and the givenness of the conscious self?','How should we understand the self-disorders encountered in schizophrenia?' and 'What general insights into the nature of the self can pathological phenomena provide us with?' Most of the contributions are characterized by a distinct phenomenological approach. The chapters by Butterworth, Strawson, Zahavi, and Marbach are general in nature and address different psychological and philosophical aspects of what it means to be a self. Next Eilan, Parnas, and Sass turn to schizophrenia and ask both how we should approach and understand this disorder, and, more specifically, what we can learn about the nature of selfhood and existence from psychopathology. The chapters by Blakemore and Gallagher present a defense and a criticism of the so-called model of self-monitoring, respectively. The final three chapters by Cutting, Stanghellini, Schwartz and Wiggins represent anthropologically oriented attempts to situate pathologies of self-experience. (Series B) Liespotting Pamela Meyer 2011-09-13 GET TO THE TRUTH People--friends, family members, work colleagues, salespeople--lie to us all the time. Daily, hourly, constantly. None of us is immune, and all of us are victims. According to studies by several different researchers, most of us encounter nearly 200 lies a day. Now there's something we can do about it. Liespotting links three disciplines--facial recognition training, interrogation training, and a comprehensive survey of research in the field--into a specialized body of information developed specifically to help business leaders detect deception and get the information they need to successfully conduct their most important interactions and transactions. Some of the nation's leading business executives have learned to use these methods to root out lies in high stakes situations. Liespotting for the first time brings years of knowledge--previously found only in the intelligence community, police training academies, and universities--into the corporate boardroom, the manager's meeting, the job interview, the legal proceeding, and the deal negotiation. WHAT'S IN THE BOOK? Learn communication secrets previously known only to a handful of scientists, interrogators and intelligence specialists. Liespotting reveals what's hiding in plain sight in every business meeting, job interview and negotiation: • The single most dangerous facial expression to watch out for in business & personal relationships • 10 questions that get people to tell you anything • A simple 5-step method for spotting and stopping the lies told in nearly every high-stakes business negotiation and interview • Dozens of postures and facial expressions that should instantly put you on Red Alert for deception • The telltale phrases and verbal responses that separate truthful stories from deceitful ones • How to create a circle of advisers who will guarantee your success Writing in Focus Senior Professor In-East Institute Florian Coulmas 1983 The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. The series considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. Psychology DAVID G. MYERS 2020-08-24 From its beginnings to this remarkably fresh and current new edition, Myers and DeWall's Psychology has found extraordinarily effective ways to involve students with the remarkable research underlying our understanding of human behavior. But while the content and learning support evolves edition after edition, the text itself continues to be shaped by basic goals David Myers established at the outset, including to connect students to high-impact research, to focus on developing critical thinking skills, and to present a multicultural perspective on psychology, so students can see themselves in the context of a wider world. This new edition offers 2100 research citations dated 2015-2020, making these the most up-to-date introductory psychology course resources available. With so many exciting new findings, and every chapter
updated with current new examples and ideas, students will see the importance and value of psychological research, and how psychology can help them make sense of the world around them. The abundant, high quality teaching and learning resources in LaunchPad and in Achieve Read & Practice, carefully matched to the text content, help students succeed, while making life easier and more enjoyable for instructors.

**Atlas of Cities** Paul Knox 2014-08-24 Examines different cities from all over the world and looks at their physical, economic, social, and political structure, as well as their relationships to each other and where future urbanization might be headed.

**Health Psychology** Richard O. Straub 2006-12-22 In its first edition, Richard Straub's text was acclaimed for its solid scientific approach, emphasis on critical thinking, real-world applications, exquisite anatomical art, and complete media/supplements package. The thoroughly updated new edition builds on those strengths to provide an even more effective introduction to the psychology behind why we get sick, how we stay well, how we react to illness, and how we relate to the health care system and health care providers.
