Biomechanics in Ergonomics

The handbook provides a comprehensive overview of the latest research and developments in the field of ergonomic design and provides practical guidance for the design of safer and more ergonomic equipment.

The book presents the proceedings of the 20th Congress of the International Ergonomics Association (IEA 2018), held on August 26-30, 2018, in Budapest, Hungary. The conference focused on the latest research and developments in the field of ergonomics, with a particular emphasis on safety and health in the workplace.

The 27th EG-ICE International Congress on Ergonomics in ICE Design

The conference featured a wide range of presentations and workshops, with topics ranging from the design of ergonomic equipment to the use of human factors in the development of new technologies.

The book also includes a section on the future of ergonomics, with a focus on emerging trends such as the use of artificial intelligence and the design of more sustainable products.
