Focusing on what goes right, rather than on what goes wrong, changes the definition of safety from 'avoiding that something goes wrong' to 'ensuring that everything goes right'. More precisely, Safety-II is the ability to succeed under varying conditions, so that the number of intended and acceptable outcomes is as high as possible. From a Safety-II perspective, the purpose of safety management is to ensure that as many as possible goes right, in the sense that everyday acceptable performance, rather than with regard to how they can fail, as traditional risk analysis does. This book analyses and explains the principles behind both approaches and uses this to consider the past and future of safety management practices. The analysis makes use of common examples and cases from domains such as aviation, nuclear power production, process management and health care. The final chapters explain the theoretical and practical consequences of the new perspective on the level of day-to-day operations as well as on the level of strategic management (Safety culture). Safety-I and Safety-II is written for all professionals responsible for their organisation's safety, from strategic planning on the executive level to day-to-day operations in the field. It presents the detailed and tested arguments for a transformation from protective to productive safety management.

Resilient Health Care Professor Robert L Wears 2015-09-28 Properly performing health care systems require concepts and methods that match their complexity. Resilience engineering provides that capability. It focuses on a system's overall ability to sustain required operations under both expected and unexpected conditions rather than on individual features or qualities. This book contains contributions from international experts in health care, organisational studies and patient safety, as well as resilience engineering. Whereas current safety approaches primarily aim to reduce the number of things that go wrong, Resilient Health Care aims to increase the number of things that go right.

The revision brings the guidance up to date with changes in health and safety law and new developments in relation to equipment, facilities and supervision arrangements.

Success Intermediate Stuart Mckinlay 2012-05-17 Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...found to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Human Resource Management in Construction Projects Martin Loosemore 2003-12-08 Although construction is one of the most labour-intensive industries, people management issues are given inadequate attention. Furthermore, the focus of attention with regards to HR has been on the strategic aspects of HRM function - yet most problems and operational issues arise on projects. The book is aimed at project managers and students of project management who, until now, have been handed the responsibility for human resources management without adequate knowledge or training. The issues addressed in this book are internationally relevant, and are of fundamental concern to both students and practitioners involved in the management of construction projects. A Grammar of Mishnaic Hebrew M. H. Segal 2001-10-17 This volume has two objectives: first, to provide students of early Rabbinic literature with a fairly complete grammar of the dialect of that literature; and secondly, to demonstrate the organic connexion of this Mishnaic dialect with Biblical Hebrew, and its relative independence of contemporary Aramaic, at least in the field of grammar. A good deal of material belonging to comparative grammar has, therefore, been introduced, and constant reference is made to the standard authority in the English language on the grammar of Biblical Hebrew, viz. Dr. Cowley's edition of Gesenius-Kautsch's Hebrew Grammar. --from the Preface Contents: Introduction Part I: Phonology and Orthography Part II: Morphology Part III: Syntax Interpersonal Verbs and Interpersonal Behavior Charles Egerton Osgood 1968 The report provides a summary of the research to date on the semantics of interpersonal verbs and the applications of the information obtained to cross-cultural studies of interpersonal norms and behaviors. A theory of interpersonal perception and behavior in relation to the meanings of interpersonal verbs in the language is presented. (Author).

Human Resource Management for the Hospitality and Tourism Industries Dennis Nickson 2007-02-19 Human Resource Management for the Hospitality and Tourism Industries takes an integrated look at HRM policies and practices in the tourism and hospitality industries. Utilising existing human resource management (HRM) theory and practice, it contextualises it to the tourism and hospitality industries by looking at the specific employment practices of these industries, such as how to manage tour reps or working in the airline industry. It initially sets the scene with a broad review of the evidence of HRM practice within the tourism and hospitality industries. Having identified the broader picture, the text then begin to focus much more explicitly on a variety of HR policies and practices such as: recruitment and selection; the effects of ICT, skills required specific for the industry and the nature of advertising; legislation and equal opportunities; illegal discrimination and managing diversity; staff health and welfare; violence in the workplace; working time directives, smoking and alcohol and drug misuse; remuneration strategies in the industry; the ‘cafeteria award’ approach; minimum wage and tipping.

Throughout higher education assessment is changing, driven by increased class size, changing curricula and the need to support students better. At the same time assessment regulations and external quality assurance demands are constraining assessment options, driven by worries about standards, reliability and plagiarism. Innovative Assessment in Higher Education explores the difficulty of changing assessment in sometimes unhelpful contexts. Topics discussed include: problems with traditional assessment methods, rationales behind different kinds of innovation in assessment, complex assessment contexts in which teachers attempt to innovate, innovation in assessment within a range of academic settings, theoretical and empirical support for innovations within higher education. More than a ‘how to do it’ manual, this book offers a unique mix of useful pragmatism and scholarship. A vital resource for higher education teachers and their educational advisors, it provides a fundamental analysis of the role and purpose of assessment and how change can be managed without compromising standards.
