Child Psychology William G. Doerner 2014-02-06 Victimology, Seventh Edition, introduces to students in the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Miller tell the story of how the criminal justice system affects crime victims and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community.

This New edition uses the theoretical foundation of victimology to establish a clear conceptual framework and then expands on the concepts and their applications, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to be a toll, and the examiners efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue. Online supplements are available for both students and professors. A new chapter on explaining victimology is provided for both beginning and advanced students. The author, a seasoned practitioner, provides an in-depth overview of key issues. The book helps students to deconstruct victimology and gain a deeper understanding of the complex dynamics of victimization.
