Computer Accounting with Sage 50 2019 Carol Yacht 2019-04-22 A perennial bestseller, Carol Yacht's *Computer Accounting with Sage 50 2019*, continues to lead the market by incorporating real-world businesses; step-by-step directions; numerous screen illustrations; challenging exercises and projects; and a website with additional resources. In *Computer Accounting with Sage 50 2019*, students learn about the relationship between Sage 50 software and fundamental accounting principles, procedures, and business processes. For more than 40 years, Sage 50 (formerly Peachtree) has produced award-winning accounting software. The Sage family of software products is the leading global supplier of business management solutions and services. Sage operates in 24 countries and serves 6 million small and medium-sized businesses. Accountant-recommended Sage 50 supports the success of their customers' businesses. Businesses that use Sage 50 include retail stores, healthcare, human resources, construction, real estate, transportation, payment processing, nonprofit, manufacturing, public utilities, legal, medical, accounting firms, home office, and personal record keeping.

Sage 50 Student Guide for Fundamental Accounting Principles Ken Shaw 2013-05-13

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
