The Adult Learner Malcolm S. Knowles 2014-12-05 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles’s pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centered approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. This eighth edition has been thoughtfully updated in terms of structure, content, and style. On top of this, online material and added chapter-level reflection questions make this classic text more accessible than ever. The new edition includes: Two new chapters: Neuroscience and Andragogy, and Information Technology and Learning. Updates throughout the book to reflect the very latest advancements in the field. A companion website with instructor aids for each chapter.
If you are a researcher, practitioner or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning that you should not be without.

*The Lost Boy* Dave Pelzer 2010-01-01 Imagine a young boy who has never had a loving home. His only possessions are the old, torn clothes he carries in a paper bag. The only world he knows is one of isolation and fear. Although others had rescued this boy from his abusive alcoholic mother, his real hurt is just beginning -- he has no place to call home. This is Dave Pelzer's long-awaited sequel to *A Child Called "It"*. In *The Lost Boy*, he answers questions and reveals new adventures through the compelling story of his life as an adolescent. Now considered an F-Child (Foster Child), Dave is moved in and out of five different homes. He suffers shame and experiences resentment from those who feel that all foster kids are trouble and unworthy of being loved just because they are not part of a "real" family. Tears, laughter, devastation and hope create the journey of this little lost boy who searches desperately for just one thing -- the love of a family.

*An Introduction to Theories of Personality*
Robert Ewen B 2014-01-21

This 7th Edition helps students unravel the mysteries of human behavior through its highly readable introduction to the ideas of the most...
significant personality theorists. Engaging biographical sketches begin each chapter, and unique capsule summaries help students review key concepts. Theories come alive through the inclusion of quotations from the theorists’ writings and numerous applications such as dream interpretation, psychopathology, and psychotherapy.

Significant changes in the 7th edition include an extended discussion of the practical applications of personality theory, with an emphasis on guidelines that can help people increase their self-knowledge, make better decisions, and live more fulfilling lives. Fictionalized but true-to-life examples illustrating the perils of inadequate self-knowledge include college students, parents, terrorists, business executives, and politicians, while other examples show the positive outcomes that can result from a better understanding of one’s unconscious. This 7th edition also includes a more extensive discussion of how a lack of self-understanding caused difficulties for such noted theorists as Freud and Erikson, and a new section that explains how behavior can be strongly influenced by the situation as well as by one’s personality.

Finally, a new interactive web site provides practice test questions and other topics of interest.
Alexandra Daddario An achingly honest debut novel of memory, self-destruction, and relationships set in contemporary Tokyo Sometimes, when I’m staring down a room of Japanese stewardesses-in-training, looking across a sea of shiny black coifs, a chorus line of stockinged legs, knees together, toes to the side, when I’m chanting, “Sir, you are endangering yourself and other passengers!” I think I should have let my brother stab me . . . Margaret is doing everything in her power to forget home. And Tokyo’s red light district—teeming with intoxicants, pornography, and seedy love hotels—is almost enough to keep at bay memories of her brother Frank’s descent into schizophrenia. But sobriety brings the past flooding back, along with a pervasive fear that she, too, is destined to battle mental illness. Working as an English specialist at a training academy for Japanese stewardesses by day, and losing herself at night in drugs, alcohol, and S&M fueled sex in the arms of anonymous men, Margaret numbs her loneliness with self destruction, wondering when she’ll take things too far. And when she falls for a married man who is part of Tokyo’s illicit underworld, their relationship might finally force her hand. . . .

Textbook of Human Development — A Lifespan Development Approach

Insights Dr. R. Krishnamurthi 2016-12-07

We see a lot but do we observe what we see to gain insights? When we do not observe what we see, seeing something through our mental eyes becomes very remote. Insight is seeing something through our mental eyes. Definitely, this book reduces the distance between seeing things through physical and mental eyes. Most of the insights have emotions and thoughts that have day to day appeals. The readers can associate themselves with the insights and identify themselves in the situations, events, and characters presented in these insights. The readers can get insights...
into ten Ps. Perception, performance, perseverance, personality, perspective, persuasion, philosophy, power, psychology, and preferences. Life is intended to be insightful. Everyday experiences make one’s life insightful.

Encyclopedia of Mental Health 2015-09-15
Encyclopedia of Mental Health, Second Edition, tackles the subject of mental health, arguably one of the biggest issues facing modern society. The book presents a comprehensive overview of the many genetic, neurological, social, and psychological factors that affect mental health, also describing the impact of mental health on the individual and society, and illustrating the factors that aid positive mental health. The book contains 245 peer-reviewed articles written by more than 250 expert authors and provides essential material on assessment, theories of personality, specific disorders, therapies, forensic issues, ethics, and cross-cultural and sociological aspects.
Both professionals and libraries will find this timely work indispensable. Provides fully up-to-date descriptions of the neurological, social, genetic, and psychological factors that affect the individual and society. Contains more than 240 articles written by domain experts in the field. Written in an accessible style using terms that an educated layperson can understand. Of interest to public as well as research libraries with coverage of many important topics, including marital health, divorce, couples therapy, fathers, child custody, day care and day care providers, extended families, and family therapy. "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do...
math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

**Theories of Personality**

Richard M. Ryckman 2012-03-13
Thoroughly updated to include the latest research available, THEORIES OF PERSONALITY, 10E takes a
unique theory by theory approach that carefully guides students through major theories on their way to a comprehensive understanding of personality. Richard Ryckman's student-friendly writing style offers a straightforward presentation of major theories, helping readers more easily distinguish between them. The text begins by providing a framework that defines personality and emphasizes the science of personality—including the interrelation between research and theory. Next it introduces each major theoretical position with an objective overview of the theorist's basic concepts and principles. It concludes by noting the ways in which the different theories stimulate additional research efforts and by presenting five current research trends resulting from the work of these earlier theorists. The result is a text that merges the best of classic and contemporary research to equip students with a solid working knowledge of personality.

Child Growth and Development Elizabeth B. Hurlock 2013-10 This is a new release of the original 1949 edition.

Life Space Management P S Siwach 2014-09-30 Life Space Management is a book that throws up a new concept of enhancing individual & organisational effectiveness by managing the parameters of Life Space, a word coined by Kurt Lewin. Our entire effectiveness
in life depends on how well we create space with others in the environment. All of us intrinsically yet unknowingly practice the art of creating the right space, whenever we interact with others. Our entire relationship blooms and grows or diminishes based on the quantum of life space we create with them. The author has researched on this new subject and put across his views to help the reader evolve and grow more effective in life.

All stages are important in a person’s life, whether it is infancy, childhood, adolescence or adulthood, but arguably the most sensitive stage is adolescence; which starts at around 13 and ends at approximately 19 years. It is the stage when the urge of life reaches its highest peak. Accidents, natural death and conflicts are creating generations of orphaned children. In addition, the loss of a parent, orphaned children may face many hardships during their adolescence including decline in health, nutrition and psychological wellbeing. The number of children estimated to be orphaned due to all causes is estimated to be between 143 million and 210 million (UNICEF, 2012). Children and adolescents in particular are at increased risk for unresolved or complicated bereavement because of their development, vulnerability and emotional dependency. The purpose of the present investigation was to examine the differences in self-
