Becoming a teacher Josef de Beer 2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the ‘elephant in the room’. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the ‘gap’ that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and-distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical
frameworks. Both quantitative and qualitative research informed the findings of the book. **Social Sciences, Grade 4** Lee Smith 2012-09-28 Study & Master Social Sciences has been specially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). **The Last Human** Lee Bacon 2019-10-08 Soon to be a major motion picture from the producers of Spider-Man: Into the Spider-Verse! In a future when humans are believed to be extinct, what will one curious robot do when it finds a girl who needs its help? Humans went extinct thirty years ago. Now the world is ruled by machines. And twelve-year-old robot XR_935 is just fine with that. Without humans around, there is no war, no pollution, no crime. Every member of society has a purpose. Everything runs smoothly and efficiently. Until the day XR discovers something impossible: a human girl named Emma. Now, Emma, XR, and two other robots must embark on a dangerous voyage in search of a mysterious point on a map. But how will they survive in a place where rules are never broken and humans aren’t even supposed to
exist? And what will they find at the end of their journey? Narrated in the first person (first robot?) by XR, The Last Human blends humor and action with moments of poignancy to tell a story about friendship, technology, and challenging the status quo no matter the consequences. It’s not just about what it means to be a robot. It’s about what it means to be a human.
