Selected Writings on Computing: A personal perspective by Edgur W. Dijkstra 2012-12-06 Since the summer of 1973, when I became a Burroughs Research Fellow, my life has been very different from what it had been before. The daily routine changed: instead of going to the university early in the morning for classes, I had to wake up to find research; instead of a seminar at 3:00 PM which I attended in the fall of the year - that is, when not travelling! - alone in my study. In my solitude, mail and the written word in general became more and more important. The磨损者 who travel, who live in a place which is not “home” have to work out secret and complicated ways of record what I was doing. The public part of that output found its place in what became known as “the EWD writing”, which can be viewed as a form of scientific correspondence, possible since the advent of the copier. (That same copier makes it hard to estimate its actual distribution.) The editors’ analysis of these extended versions of papers presented at FabLearn Italy 2019 highlight the latest findings contains observations, outlines, and analyses of educational robotics methodologies and activities, and developments in the field of educational robotics.
