**At the End of the Rainbow?** Gordon MacMillan 1995 Throughout the 1980s, a combination of widespread poverty and favorable gold prices encouraged hoards of wildcat miners to penetrate some of the Amazon's rainforest headwaters in search of new deposits. Now, hundreds of makeshift camps threaten the future of both the rainforest and the indigenous people who inhabit it. This book explains how gold fever came to grip the Amazon and considers the changes it has brought to the region. It contains a vivid account of the violent clash between forty thousand miners and the Yanamami Indians in the state of Roraima, as well as thoroughly researched arguments that explore the perspectives of the farmers, ranchers, natives, and others involved in this historic moment.

**The Vacuum Cleaner** Carroll Gantz 2012-09-21 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.
