Alison Mackey and Susan Gass’ valuable new book offers hands-on methodological approaches and methods of data collection, as well as responses to common questions posed by students of qualitative research. The ideas in the book come from the authors’ extensive experience in teaching research methods courses in higher education, and offer unique insights into the complexities of the research process. The authors help students develop a more comprehensive understanding of the research process, including the challenges in getting work published and close with some words on quality of thought and action.
