How to Write a Step-by-Step Guide to Complete a Dissertation

Carey Weil 2019-12-29 This book is designed to help in outlining a dissertation. The dissertation process can be an overwhelming task, but this step-by-step guide can be used as a foundation. Writing a dissertation does not have to be a daunting task. I wrote this book because I understood the significance of having a thesis director so I could be challenging to the reader. While this doctoral journey was a long road and included obstacles, students could overcome them and complete the dissertation. I wrote this book to share with others the process I've gone through a dissertation and to help others complete their own. After finishing with another doctoral journey, the suggestion was made that I should author and publish a book based on the qualitative methodology. As a result, this book provides step-by-step guidance to complete the dissertation. The significance of this book is that it gives detailed information on how to develop paragraphs, sections, chapters, which will eventually culminate in a completed proposal or dissertation. Since completing the doctoral journey, I thought to author this book was inspiring, while the process of writing a dissertation was fresh in my mind. During the writing of this book, I have an emotional, intellectual, feeling because, as I thought about what to write, a multitude of memories were experienced. Some of the memories are not so great, but others were great such as passing the dissertation defense and then being called Dr. Waddell. Finally, I want to take the time to acknowledge everyone that was a part of my journey. There are too many people to thank by name, but I am all aware that I appreciate and understand the support and assistance to become Dr. Carey D. Waddell. Finally, it is very sincere hope that with this book will help you become Dr. Insert your name.
