Developing England’s North Craig Berry 2017-11-03 This book explores the politics of land, money, and power that have shaped the North – and its future prospects – have become central to national debates in the UK. The status of Northern regions and their local economies is intimately associated with wider issues of the UK’s economic and political identity. This book brings together contributions from leading academics and practitioners, offering a comprehensive understanding of the challenges facing the region. It discusses the role of government policy in shaping the North’s future, examines the impact of globalization and the changing nature of employment, and considers the potential for sustainable development. The book is essential reading for students of regional development, political economists, and policymakers interested in the future of the North.

Exploring Strategy Text Only 11e Jerry Johnson 2014-01-10 This book includes a short version of the text and the additional material needed to access the eText and MyStrategyLab. With over one million copies sold worldwide, Exploring Strategy has long been the essential introduction to strategy for managers and future managers. This twelfth edition includes new coverage of strategy in the digital age, emphasizing the importance of digital strategy in today’s organizations. The authors also provide a new focus on strategy in the context of sustainability and corporate social responsibility. These updates make Exploring Strategy an even more relevant and engaging resource for students.

Handbook of Probiotics and Prebiotics Yuan Kun Lee 2009-02-17 Since the publication of the first edition in 1999, the science of probiotics and prebiotics has undergone significant growth. This new edition offers a comprehensive overview of the latest research and developments in the field, including a focus on the role of probiotics and prebiotics in health and disease prevention. The handbook is divided into six parts, covering topics such as the science of probiotics and prebiotics, their potential applications in health and disease, and their impact on the environment.

Pivot: A Journey into the Future of Northern England John A. Vornan 2019-01-03 This book offers a concise but comprehensive overview of the economic, social, and environmental challenges facing the northern regions of England. The authors examine the role of government policy in shaping the region’s future, consider the impact of globalization and the changing nature of employment, and assess the potential for sustainable development. The book is essential reading for students of regional development, political economists, and policymakers interested in the future of the North.

Global Corruption Report: Education Transparency International 2013-10-08 Corruption and poor governance are acknowledged as major impediments to realizing the right to education and promoting universal primary education by 2015. Corruption not only distorts access to education, but affects the quality of education and the reliability of research findings. This book investigates the extent of corruption in the field of education, examining the ways in which corruption affects the achievement of universal primary education by 2015. It discusses the role of government policy in shaping the region’s future, examines the impact of globalization and the changing nature of employment, and considers the potential for sustainable development. The book is essential reading for students of regional development, political economists, and policymakers interested in the future of the North.

Psychological Health and Human Services in the 21st Century Mary C. Townsend 1999-12-01 -- Uses the stress-adaptation model as its conceptual framework -- The latest classification of psychiatric disorders in DSM IV -- Access to 50 psychotropic drugs with client information -- Includes tables with abstracts describing recent research studies pertaining to specific psychiatric diagnoses -- Within the DSM IV section, each chapter features a list of client guidelines that mental health professionals can use to inform clients about their diagnosis -- Four new chapters: Cognitive Therapy, Complementary Therapies, Mindfulness, and Cultural Considerations -- Emphasis on the use of evidence-based therapy approaches for working in case management situations -- Chapters include objectives, glossary, case studies using critical thinking, NCLEx-style chapter review questions, case scenarios, and an extensive appendices section -- The Cultural Considerations chapter focuses on working with culturally diverse populations -- The Stress Adaptation Model chapter are followed by a series of case studies. The chapter authors were invited speakers at the 6th Symposium "Design Modelling Systems" held in Alghero, Italy, September 2007. The book is an updated version of the 1997 Psychological Health and Human Services in the 21st Century.
having at the end of that time been kidnapped and sold into Slavery, where I
remained, until happily rescued in the month of January, 1853, after a bondage of
twelve years—it has been suggested that an account of my life and fortunes would
not be uninteresting to the public.” - an excerpt

Proceedings of the 21st International Symposium on Advancement of Construction
Management and Real Estate K. W. Chau 2017-12-18 This book presents the
proceedings of CRIOCM_2016, 21st International Conference on Advancement of
Construction Management and Real Estate, sharing the latest developments in real
estate and construction management around the globe. The conference was organized
by the Chinese Research Institute of Construction Management (CRIOCM) working in
close collaboration with the University of Hong Kong. Written by international
academics and professionals, the proceedings discuss the latest achievements,
research findings and advances in frontier disciplines in the field of
construction management and real estate. Covering a wide range of topics,
including building information modelling, big data, geographic information
systems, housing policies, management of infrastructure projects, occupational
health and safety, real estate finance and economics, urban planning, and
sustainability, the discussions provide valuable insights into the implementation
doing the construction process together; people. The book addresses people issues in the
construction industry where behavioural outcomes impact upon business and project
performance. The main proposition of the book is that as people continue to lead
the completion of construction activities, their health, safety, and well-being
should be seen as a priority, and valued by stakeholders. As employers and
employees, the role of people in construction must be to strive for the
improvement of individual lives and society. This edited collection, which is the
first book to focus specifically on placing value on people in construction,
focusses on people at work, gender at work, conditions at work, and respect at
work. In addition to an editorial overview, the book presents tested and refined
empirical work and case studies by leading construction researchers from Africa,
Australia, and Europe. Essential reading for researchers, students and
professionals interested in construction management, the sociology of
construction, HRM in construction, gender, work and health studies.
