The Practice of Nursing Research: Advancing Evidence-Based Practice, Third Edition, is a comprehensive guide to conducting evidence-based practice. It's organized by the key components necessary for conducting the research process, from designing and conducting research to writing a paper and getting it published. It provides a research process that advances evidence-based practice in nursing and health care professions. This revised edition offers a more balanced approach to clinical and research-based evidence, with a focus on the practical application of evidence, and a greater emphasis on the process of research and the role of the clinician in the research process. It is essential for anyone involved in the practice of nursing research in today's health care environment.

Introduction to Research in the Health Sciences: Stephen P. Glisson, MS 2014-09-04 This book provides a step-by-step guide to the methodological and practical aspects of doing an undergraduate research project. The book is aimed at students who have no prior research experience and want to understand how to conduct a research project. It is designed to equip students with the necessary skills and knowledge to carry out a research project in the health sciences. The book focuses on the practical aspects of research, such as designing experiments, data collection, data analysis, and writing research papers. It also includes case studies and examples to illustrate the different stages of a research project. The book is divided into several sections, each covering a different aspect of research. It is an essential resource for students who are new to research and want to conduct a research project in the health sciences.

The Yellow Wallpaper Illustrated

Charlotte Perkins Gilman 2021-06-17

"The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old manor house for the summer. Engaging with nature in the house, the couple moves into the upper nursery. As a form of treatment, the named woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period.
