Strategy Coursework - Sony Corporation Raphael Städtler 2011-05-02 Essay from the year 2010 in the subject Economics - Case Scenarios, grade: 1.0, The University of Surrey, course: Strategy, language: English, abstract: After the financial crisis hit the global economy in 2008 many global companies found themselves in economic distress. To remain competitive and successful, it is vital for any company to be aware of their status quo and its future strategic direction. Sony is a global company that operates in over 204 countries. According to Howard Stringer (CEO of Sony), Sony's mission for the future is to become a leading global provider in the sector of network consumer electronics, entertainment and services. Sony

wants to challenge its designers, engineers and producers to improve their hardware as well software in terms of innovation in order to further the differentiation process towards its competition. The purpose of this report is to analyze Sony's current situation within the electronics industry by assessing its macro- and micro-environmental factors in order to offer future strategic recommendations for the Corporation. The following methods and theories will be applied throughout the essay: 1) Competitive Analysis of the Industrial Current Status of Sony - Porter's Five- Forces - SWOT Analysis - Value-Chain Analysis - Resource-Based Analysis 2) Impacts of External Forces on the Competitive Advantage of Sony - PESTEL 3) Recommendations of Future Strategic Decisions of Sony 4) Conclusion

The Internet as a Technology-Based Ecosystem Nigel Walton 2017-05-04 This book examines and critiques classical approaches to strategic analysis, whilst exploring alternative methods which utilise ecosystem and platform concepts, as well as chaos and complexity theories. The innovative study provides a critique of the neoclassical Newtonian school of strategy, and proves it to be largely inappropriate as a decision-making methodology in today's internet-based market. By developing a new biological hydrothermal vent model in which analogical comparisons are made with the Information Communication Technology (ICT) sector, the chapters challenge existing paradigms of competitive advantage and analyse the extent to which the Internet can be considered to be an ecosystem in its own right. The Internet as a Technology-Based Eco-System offers a range of alternative models and analytical frameworks for the analysis of internet-based technology companies in the twenty-first century, creating a valuable tool for students and academics undertaking research in strategy, technology and electronic engineering.

Connective Technologies in the Supply Chain Sameer Kumar 2007-03-05 Rapid time-to-market expectations and the demand for custom-tailored products present real challenges for the rigid and fixed linear supply chains that compete in today's economy. Connective technologies meet these challenges head on by integrating the necessary people, information, and products beyond their current limitations. Connective Technologies in the Supply Chain illustrates the impact that connective technologies have across supply chains. It provides strategic frameworks, conceptual and analytical models, and case studies that focus on the design, development, and implementation of these technologies as they pertain to the management of engineering and manufacturing operations. Placing particular emphasis on RFID, the book addresses issues that include those involving GPS, inventory management, quality control, mobile technology, and security challenges. The book presents an overview of RFID applications, its underlying concepts and principles, and a macro perspective on its implementation in the manufacturing and service sectors. It also provides a feasible design of the technology's enabled knowledge-based supply chain management system. Connective Technologies in the Supply Chain is an essential resource for those who would like to expand their knowledge of-and increase their success with-these applications.

Innovation in Japan Keith Jackson 2013-10-18 The Japanese economy has made a remarkable recovery from the so-called 'Lost Decade' of the 1990s. This said, demographic trends suggest that Japan will have to show remarkable powers of innovation if it is to continue to prosper in the global economy. For, around the turn of the last century texts published by prominent strategy analysts such as Michael Porter and colleagues were

asking whether Japan could continue to compete at all, and in answering this question they not only gained significant global attention, they also appeared to sound the death knell for strategic innovation in Japan. This collection helps put the record straight. It invites authors and editors of previous (Routledge) titles on the topic of 'Innovation in Japan' to reflect on how things have moved on – prominent scholars on Japanese innovation such as Martin Hemmert, Cornelia Storz, and Ruth Taplin, all of whom appear in this collection. It brings together fresh perspectives on Japanese-style innovation, from insiders and from outsiders, from scholars and from practitioners, all of whose combined contributions to this book update our understanding of how patterns of innovation in Japan are evolving and thus provide inspiration and guidance for managers and innovators worldwide.

Short Introduction to Strategic Management Torben Juul Andersen 2013-07-09 The Short Introduction to Strategic Management provides an authoritative yet accessible account of strategic management and its contemporary challenges. It explains the roots and key rationales of the strategy field, discussing common models, tools and practices, to provide a complete overview of conventional analytical techniques in strategic management. Andersen extends the discussion to consider dynamic strategy making and how it can enable organizations to respond effectively to turbulent and unpredictable global business environments. There is a specific focus on multinational corporate strategy issues relevant to organizations operating across multiple international markets. Written in a clear and direct style, it will appeal to students and practising managers and executives alike.

Market Entry Strategies Mario Glowik 2016-03-07 This textbook discusses the most important theories of internationalization, including Product Life-Cycle, Internalization, Location, Eclectic Paradigm, Uppsala, Network, and International New Venture concepts. These models are grounded to a considerable extent in the Transaction Cost Theory and the Resource-Based View as explained and illustrated in the book. Relevant market entry strategies, such as franchising, contract manufacturing, joint ventures, and others are explained and categorized in light of crucial determinants of international business decision making: hierarchical control of operations, the firm's proximity to the foreign market, the investment risk, and the factor of time. What makes this textbook novel and unique? Its framework combines theories and market entry strategies: each topic is applied to authoritative, real-life business case studies. Complex issues are explained in a manner that results in understanding. Various illustrations and tables help the reader comprehend the point being discussed. The case study focus on Asian firms delivers interesting insights into modern high-technology industries and changing global business dynamics. Market Entry Strategies serves as a vital source for internationally oriented bachelor, master, and MBA programs with strategy, marketing, and management lecture modules. Consequently, this publication is highly recommended for students and scholars; but it is also useful for business practitioners seeking to gain competitive advantages in international business. About the Author Mario Glowik teaches Bachelor, MBA and Master courses in Strategic management, International management, Strategic management in China and Europe, and International and Asian business at Berlin School of Economics and Law in Berlin. Contemporary Strategy Analysis Robert M. Grant 2016-01-05 A strategy text on value creation with case studies The ninth edition of Contemporary Strategy Analysis: Text and Cases focuses on the fundamentals of value creation with an emphasis on practicality. Topics in this edition include: platform-based competition

and ecosystems of related industries; the role of strategy making processes; mergers, acquisitions and alliances; and strategy implementation. Within the twenty case studies, students will find leading companies that are familiar to them. This strategy analysis text is suitable for MBA and advanced undergraduate students.

Market Entry Strategies Mario Glowik 2010-10-01 The first part of the book introduces relevant theories of internationalization. In addition to traditional concepts of internationalization (e.g., the product life-cycle approach of Vernon, the Uppsala model, and Porter's diamond approach), particular attention is paid to the more modern network approaches of internationalization (e.g., systems, new venture/born global, and entrepreneur concepts). In the second part, alternatives for international market entry (e.g., exports, franchising, joint ventures, contract manufacturing, and foreign direct investments) are explained. These market entry modes are categorized according to decision determinants, such as hierarchical control, proximity to the market, risk of investment, and the factor of time, which are important from the point of view of the corporate management involved in international business. The empirical part of this publication, which is the result of a longitudinal study, consists of case studies of Asian firms doing business in the consumer electronics industry. The cases of Samsung, Sony, Sharp, Matsushita (Panasonic), LG Electronics, and TCL China provide fundamental insights into the firms' organizational structures, corporate cultures, respective sales volume, and earnings performance as well as strategic concepts for their market penetration in Europe. A main emphasis is placed on an understanding of internal firm networks (e.g., diversified business fields and vertical production depth) and external firm networks (e.g., joint ventures, supplier and buyer clusters as well as mutual capital interests). From the author's view, these network grids fundamentally contribute to the fact that Asian firms have more successfully positioned themselves in the market within the last two decades compared to their European competitors in the television set industry (e.g. Grundig, Thomson, or Philips). The networking aims and success factors as well as the changing strategic influence over the years of the partner firms both in bilateral Japanese joint ventures and in European-Asian joint ventures are examined. The book provides complex background information about the development of the European television set market. The analysis demonstrates that firms holding the position of technological market leaders in their segment simultaneously indicate the most intensive network activities. The further development of the network theory and the detailed and up-to-date case studies of the most important Asian enterprises in the consumer electronics industry contribute to the value of this publication. Furthermore, on the basis of the knowledge gained from this study, chances and risk potentials can be derived for other European industries (e.g., automotive). The book, written in English, is suitable for internationally oriented bachelor's, master's and MBA programs. Additionally, against the background of worldwide competition, the publication at hand offers relevant industry insights for interested political and economic decision makers.

Using Industry Analysis for Strategic Intelligence Chuck Howe 2016-01-23 In Chuck Howe's "Using Industry Analysis for Strategic Intelligence: Capabilities and Strategic Intent," the author argues that the Intelligence Community should evaluate globalization as a strategic factor affecting interdependencies between nations. He outlines a variety of industry analysis techniques-including the Five Forces Model, the External Environment Model, and the Value Chain Model-that could be valuable to analysts. Using the semiconductor industry as a case study, Howe illustrates methods that analysts should use in deriving strategic insights from industrial capability.

Embedded Autonomy Peter B. Evans 2012-01-12 In recent years, debate on the state's economic role has too often devolved into diatribes against intervention. Peter Evans questions such simplistic views, offering a new vision of why state involvement works in some cases and produces disasters in others. To illustrate, he looks at how state agencies, local entrepreneurs, and transnational corporations shaped the emergence of computer industries in Brazil, India, and Korea during the seventies and eighties. Evans starts with the idea that states vary in the way they are organized and tied to society. In some nations, like Zaire, the state is predatory, ruthlessly extracting and providing nothing of value in return. In others, like Korea, it is developmental, promoting industrial transformation. In still others, like Brazil and India, it is in between, sometimes helping, sometimes hindering. Evans's years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work, which demonstrates that successful state action requires an understanding of its own limits, a realistic relationship to the global economy, and the combination of coherent internal organization and close links to society that Evans called "embedded autonomy."

National Systems of Innovation S. Peters 2006-02-28 This book draws together literature from the fields of strategy, management and innovation to examine the importance of a firm's national base at a sectoral level in an era of globalization. By considering two very dynamic high-technology industries - semiconductors and liquid crystal displays, the author shows how national systems of innovation are of great importance in determining competitive success.

Technology Management Dilek Cetindamar 2017-09-16 This is an exciting and innovative core textbook that focuses on the micro-level analysis of TM as a dynamic capability. Now in its second edition and fully updated throughout, it systematically addresses the major tools and techniques needed for businesses to successfully conduct TM activities. Arguing that there is no single best way to manage technology in a company and there is no mechanistic route to success, this accessible handbook provides a wealth of resources designed to increase the dynamic capability of an organisation. Written by a highly experienced team of authors from the Universities of Sabanci and Cambridge, Technology Management is the perfect companion for undergraduate and postgraduate students on a variety of business, management and engineering degree courses. It is also suitable for practitioners seeking to progress their professional development and industry knowledge.

International Political Economy in the 21st Century Roy Smith 2017-02-10 Understanding of the theories that underpin international political economy (IPE), and their practical applications, is crucial to the study of international relations, politics, development and economics. This is a comprehensive and accessible introduction to the field, with an engaging and coherent foundation to the subject. It considers traditional and alternative approaches to IPE, and in doing so elucidates key concepts, assumptions and the intellectual and historical context in which they arose and developed. At all times, it makes clear their relevance to issues from trade, finance and government, to environment, technology, health, labour, security, migration, development and culture. The book encourages independent reflection and critical thinking through a range

of in-text guiding features. In addition, each chapter presents theoretical analysis alongside contemporary issues, helping the reader to relate to the real world of IPE and to better understand how theory helps inform interpretation of it. New to this edition: comprehensively updated to include key coverage of the post-2015 framework of the Sustainable Development Goals, the financial crisis and international government responses - successful or otherwise - to recent challenges; fully updated data, reflective questions, recommended readings, concept and example boxes, and illustrations; new chapters on health, migration and labour; additional coverage of trade theories and key contemporary issues, such as national versus human security, economic versus human development and illegal networks in global trade.

The Samsung Way: Transformational Management Strategies from the World Leader in Innovation and Design

Jaeyong Song 2014-08-22 An insider's account of the management principles driving one of the world's most innovative companies Twenty years ago, few people would have predicted that Samsung could transform itself from a low-cost original equipment manufacturer to a world leader in R&D, marketing, and design, with a brand more valuable than Pepsi, Nike, or American Express. Based on ten years of research inside Samsung and interviews with 80 of Samsung's top executives, The Samsung Way tells the compelling story of how Samsung has grafted Western business practices onto its essentially Japanese system, combining its low-cost manufacturing prowess with an ability to bring high-quality, high-margin branded products swiftly to market. Jaeyong Song is Professor of Strategy and International Management at Seoul National University (SNU). He received his Ph.D. at the Wharton School, University of Pennsylvania. Kyungmook Lee is Professor of Organizational Behavior and Human Resource Management at Seoul National University Business School where he currently serves as Senior Associate Dean for academic affairs. He received his Ph.D. at the Wharton School, University of Pennsylvania.

Intel, Nintendo, American Express, NutraSweet, American Airlines, and dozens of other companies have been using the strategies of co-opetition to change the game of business to their benefit. Formulating strategies based on game theory, authors Brandenburger and Nalebuff created a book that's insightful and instructive for managers eager to move their companies into a new mind set.

From Adam Smith to Michael Porter Tong-s?ng Cho 2013 This book provides a thorough explanation of the evolution of international competitiveness theories and their economic and strategic implications. The theories range from classical theories such as Adam Smith's theory of absolute advantage, to new theories such as Michael Porter's diamond model.

Sony vs Samsung Sea-Jin Chang 2011-02-25 "Sony vs. Samsung is business history at its best! It explores the divergent fortunes of these two electronics giants in the last decade and identifies the true reasons behind Sony's decline and Samsung's rise. Contrary to popular belief, Chang shows that success (or failure) does not simply arise from different strategies. Rather, it emerges from major decisions that are deeply rooted in the companies' organizational processes and their executives' political behavior. This book is a must-read for any senior executive." —Constantinos Markides, Robert P. Bauman Professor of Strategic Leadership and Chairman, Strategy Department, London Business School "Sea-Jin Chang has produced that rarity in a business book--one that is as valuable to practicing managers as it is insightful to academic researchers. In this fascinating comparison of two modern global giants, he applies his high resolution research microscope to their changing fortunes by dissecting their contrasting strategies, and providing interesting insights into their divergent organizational processes and management practices. This is a very valuable contribution to the international business literature. It will end up in as many corporate boardrooms as faculty seminars." —Christopher A. Bartlett, Thomas D. Casserly Professor Emeritus, Harvard Business School "Sea-Jin Chang has written a fascinating comparison of Sony and Samsung that will be valuable to anyone interested in strategy, organizations or international business. The interwoven and very detailed case studies of two very different companies in overlapping industries illuminate problems such as adaptation to

technological change (analog to digital), organizational flexibility and globalization. His attempt to analyze both strategic development and implementation is successful and very useful. Both academics and practitioners will learn a lot from this book." —Stephen J. Kobrin, William Wurster Professor of Multinational Management, The Wharton School, University of Pennsylvania "Refreshingly original and entertaining, this book analyzes major strategic decisions of Samsung and Sony and highlights organizational processes and top management leadership that have shaped their performances. This is a must-read for all executives who want to understand the strengths and weaknesses of Asian competitors. It also provides penetrating insights to other Asian companies with global ambitions." —Myoung Woo Lee, President and CEO, Irivier

Redesigning Asian Business Frank-Jürgen Richter 2002 With much of the "Asian Miracle" destroyed and much of the Western world's awe for Asian ways of management dissipated, organizations in East Asia are changing with such speed that most of our knowledge about them becomes quickly outdated. Richter takes stock of East Asian management practices, as they are perceived so far, and he discusses the strategies proposed by others to help Asian management redesign itself for the future—including a long-term agenda for change based on the cultural heritage of Confucianism. He shows how Asian firms adjusted to the Asian economic crisis and how a hybrid style of management is emerging, one which combines elements of Western and Eastern thinking. The result is a challenging, intensely pragmatic analysis for corporate decision makers at all levels, in all countries and cultures, and it is a necessary new stone in the foundation of academic research and thought.

Market Entry Strategies Mario Glowik 2020-09-21 This entirely revised and updated third edition of Market Entry Strategies continues to combine the profound explanation of internationalization theories and concepts with real-life firm cases. Reviewing the readers' valuable feedback from successful previous editions this version targets to improve the readability. New firm cases of Delivery Hero and Tesla contribute to broaden the books' industry focus. Particular attention is paid on the case studies developed to exercise in light of business practice what is theoretically taught and explained in the textbook. Through its link to digital learning tools such as charts available to the public at YouTube this new edition provides best pre-requisites for distance learning environments.

Infineon Philips Semiconductors AG - Strategic Fit of a Merger Matthias Meier 2006-07-11 Seminar paper from the year 2006 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7, Leeds Metropolitan University (Leeds Business School), course: Managing International Partnerships, 33 entries in the bibliography, language: English, abstract: As a result of the merger between Infineon Technologies AG and Philips Semiconductors, Infineon Philips Semiconductors AG (IPS) would rank third amongst the world's largest manufacturers of semiconductors, with 5.9% of total sales. Infineon would gain access to Philips' customer base which demands profitable chips for consumer electronics and mobile solutions. Its presence in the growing markets of Asia will be strengthened. By merging the two companies, a strategic fit would be achieved in terms of geographic market penetration and market sectors. Furthermore, the size of IPS would streamline efficiency and secure the long-term survival in a highly-competitive market with intensifying pressures from Asian manufacturers. Another objective is to combine both companies' competencies in order to develop smaller wafers and to conduct research on nanotechnology. The strengthened capital basis enables IPS to enlarge investments in R&D and production facilities. Major shareholders of IPS would be Siemens AG and the Philips Group.

Global Business Strategy: Asian Perspective (Second Edition) HwY-chang Moon 2022-01-07 As the second edition of Global Business Strategy, this book provides novel insights on how a firm can formulate a successful approach toward its global business from both the Western and Asian perspectives. In this respect, the book's overall goal is to bridge the gap between these two different viewpoints. This second edition includes more recent business theories, techniques, and cases within the field of global business strategy. Specifically, it includes new theories and techniques like creating shared value (CSV), the global value chain, platform strategy, and business ecosystem. They are shown to be important tools for enhancing competitiveness and maintaining sustainability among firms in today's rapidly changing international business environment. This is very much evident today given the critical challenges arising from the trade tensions between the United States and China, emerging technologies such as artificial intelligence and digital transformation, and the unprecedented disruptions brought on by the coronavirus pandemic. We hope

that this book will serve as a useful companion for students, business practitioners, policymakers, and the more general readers interested in issues related to competitiveness and business.

Analysis of Motorola's Personal Communications Segment Marco März 2004-07-26 Seminar paper from the year 2004 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7 (A-), University of Bradford (School of Management), course: Applied Strategic Management, language: English, abstract: In 1928 Paul Galvin founded the company as the "Galvin Manufacturing Corporation" in Chicago, Illinois. The first product launch, called a "battery eliminator" allowed radio consumers to operate directly from household current instead of the batteries supplied with earlier models. But the company's name was soon displaced through its main product, "Motorola" radios, figurehead that conjures up the historical symbiosis of a mobile radio and a car (Agar, 2003). Under the leadership of Paul Galvin, Motorola became leader in military, space and commercial communications, grew as a manufacturer of consumer electronics and built its first semiconductor facility. The company founder died in 1959. As his successor Robert W. Galvin, P. Galvin's son, was introduced. Within his leadership Motorola expanded into the international markets, and their object of view was shifted away from consumer electronics. As a fact of this challenge, the colour-TV receiver business was sold in the mid 70's, so that they could concentrate their abilities on high-technology markets in commercial, industrial and government fields. With the 80's ending, Motorola had become the doyen supplier of cellular phones. (www.motorola.com) You could say, that Motorola, Inc. is a global provider of wireless, broadband, automotive communications technologies and embedded electronic products. Further on the company provides software-enhanced wireless telephone and messaging, two-way radio products and systems, as well as networking and Internet-access products, for consumers, network operators and commercial, government and industrial customers. Motorola also provides end-to-end systems for the delivery of interactive digital video, voice and high-speed data solutions for broadband operators, and embedded semiconductor solutions for customers in wireless communications, networking and transportation markets. In addition, the company offers integrated electronic systems for the automotive, telematics, industrial, telecommunications, computing and portable energy systems markets. The last reported count of employees was 88.000. (www.yahoo.com) In most parts of my strategic analysis, I will focus on the Personal Communications Segment (PCS) of Motorola, the business group of Motorola's cellular phones. Following Nokia, Motorola is the 2nd largest mobile phone producer worldwide.

Doing Business in Korea Fabian Jintae Froese 2019-08-19 Much of the existing research looks at the outflow of companies and people from Korea to foreign countries, whilst less is known about foreign firms and workers in Korea. Considering the immense interest of both academics and practitioners in the business opportunities in Korea, this book provides a comprehensive overview of doing business in Korea and recommendations on how foreign companies and individuals can succeed in this market. This book covers a wide range of relevant topics, including the Korean business environment, market entry into Korea, management issues and entrepreneurship in Korea. This is a must-read for anyone interested in or already doing business in Korea.

New Multinational Enterprises from Korea and Taiwan Roger van Hoesel 2013-01-11 This volume represents the first substantive study of emerging multinationals (MNEs) from Asian economies, drawing on the unique experiences of South Korea and Taiwan. Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies, it aims to demystify the nature and theoretical implications of these dynamic economic regions. The author argues that many of these `new

multinationals do not possess the characteristics typically ascribed to MNEs, such as technological leadership, strong marketing positions or advanced managerial capabilities. This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level. The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored.

Korean Businesses: Internal and External Industrialization Jhongseok Bae 2020-06-30 Essays in the book focus on the Korean model of industrialization and internal internationalization, organizational capabilities and management roles, and disadvantages inherent in the model. The subjects covered include corporate catch-up strategies, foreign investment, and future possibilities.

A Study of the DRAM Industry Joonkyu Kang 2010 Samsung Electronics as a DRAM provider has kept its leadership in the DRAM market with leading technology and production capacity since the 1990s even though there were unpredictable market fluctuations and dramatic changes in competition. Through the

depressed market starting from 2006 to 2008, and the financial crisis, Samsung Electronics tightened its leading position in the DRAM market with changes in the dynamics of competition. But, from the industry wide view, the IT industry is getting complex since its system change from vertical integration to horizontal ecosystem. Also, the shrinkage of optical lithography, the main technical issue in semiconductor industry, is predicted to reach the uppermost limit. In this sense, Samsung Electronics as a DRAM provider should analyze and evaluate its current position in the DRAM market and the IT industry and needs to set a strategic goal and methods for sustaining its current position and also pursue more growth. I examine the current DRAM market dynamics, diagnose Samsung's current business status and strategy in the DRAM industry, and try to find a way to create value as a complementor in diverse IT industries. Furthermore, I will try to find opportunities where Samsung can sustainably capture value in the DRAM market. For this analysis, I use several frame works and concepts: Value creation and capture, Michael Porter's five forces analysis and Value Chain, Departure from a perfect competitive market, Ecosystem, and Complementor.
