As an update to the best-selling guide to Azure development, this new edition by Chaitanya Daveli covers completely new technologies and techniques that will help you plan and manage your Azure projects. This book will help you understand how to implement Azure services, and how to manage their performance, costs, and security. You’ll learn how to use Azure services, such as Azure Search, Azure Functions, and Azure Cosmos DB, to create scalable, resilient, and secure applications. You will learn how to leverage Azure’s built-in capabilities to automate the deployment of your applications and how to use Azure Monitor to monitor and troubleshoot your applications.

SAP Billing and Revenue Innovation Management
Chaitanya Daveli 2021 Whether you’re upgrading an existing billing system or transitioning to SAP BRIM, this book will help you plan, configure, and manage billing processes. It covers the entire billing cycle, from customer order management and invoicing to contract accounting and customer care. The book is designed to help you understand how to set up and configure the SAP BRIM system, including how to create and manage orders, invoices, and contracts. You’ll also learn how to configure and test the billing process to ensure that it meets your business requirements.

Financial Accounting and Controlling (FICO)
Andrew Okungbowa 2021-06-08 SAP ERP modules are not only crucial for running an SAP business, but they are also complex and can be overwhelming. This book helps you understand the different modules of SAP ERP, such as Financial Accounting and Controlling (FICO), and how they work together to support your business processes. You’ll learn how to set up and configure FICO, and how to use it to perform various tasks, such as posting transactions, creating financial statements, and generating reports. You’ll also learn how to integrate FICO with other SAP modules, such as Sales and Distribution (SD) and Materials Management (MM), to create a complete business solution.

of creating stunning HTML5 applications using SAPUI5 Book Description Advanced Business Application Programming (ABAP) is an established and complex programming language in the IT industry. This book is designed to help you use the latest ABAP techniques and apply legacy constructions using practical examples. You'll start with a quick refresher on language and database concepts, followed by agile techniques for adding custom code to a modern ABAP system. After this, you will get up to speed with the complete ABAP toolkit for importing data to and from different environments. Next, you'll learn how to print forms and work with the different ABAP tools for Extensible Markup Language (XML) manipulation. While covering further chapters, you'll gain insights into building stunning UI5 interfaces, in addition to learning how to develop single apps using the Business Object Processing Framework (BOPF). You will also pick up the technique of handling exceptions and performing testing in ABAP. In the concluding chapters, you can look forward to grasping various techniques for optimizing the performance of programs using a variety of performance analysis tools. By the end of this book, you will have the expertise you need to confidently build maintainable programs in Systems, Applications, and Products (SAP). What you will learn Create stable and error-free ABAP programs Leverage new ABAP concepts including object-oriented programming (OOP) and Model-View-Controller (MVC) Learn to add custom code to your existing SAP program Speed up your ABAP programs by spotting bottlenecks Understand techniques such as performance tuning and optimization Develop modern and beautiful user interfaces (UIs) in an ABAP environment Build multiple classes with any nesting level.Nho this book is for This book is for developers who want to learn and use ABAP skills to become an industry expert. Familiarity with object-oriented programming concepts is expected.ZAP S/4HANA Embedded Analytics Jürgen Butsmann 2021 Meet your BI needs with SAP S/4HANA embedded analytics!
