Say’s Law and the Keynesian Revolution

According to me, another important revolution that occurred was the revolution of communication technology which is concerned with the commercial use of computers. Some of the important innovations of information technology are television and radio equipment, performance management software, and video conferencing technology. These innovations have significantly changed the way we communicate and interact with each other. While some people might argue that this revolution is not as significant as others, I believe it is important because it has the potential to transform the way we live and work.
