Courageous Dreaming Alberto Villoldo 2009-03-01 Modern physics tells us that we're dreaming the world into being with every thought. Courageous Dreaming tells us how to dream our world with power and grace. The ancient shamans of the Americas understood that we're not only creating our experience of the world, but are dreaming up the very nature of reality itself—that is, "life is but a dream." When you don't dream your life, you have to settle for the nightmare being dreamed by others. This book shows how to wake up from the collective nightmare and begin to dream a life of courage and grace, a sacred dream that shamans throughout time have known and served. Alberto Villoldo reveals ancient wisdom teachings that explain how to birth reality from the invisible matrix of creation; and reveals how we can interact with this matrix to dream a life of peace, health, and abundance. He shows us that courage is all that is required to create the joy we desire!

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained,

until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." - an excerpt

[The Strategy of Desire](#) Ernest Dichter 2017-07-12 Ernest Dichter is famous as one of the founding fathers of motivational research. In applying the social sciences to a variety of problems, Dichter emphasized new approaches to problem solving, advertising, politics, and selling, and issues of social significance such as urban renewal, productivity, and drug addiction. As an author and corporate adviser, he used psychoanalytic theory and depth interviewing to uncover unconsciously held attitudes and beliefs. His goal was to help explain why people act the way they do and how positive behavioral change might be achieved. In *The Strategy of Desire*, Dichter both counters the argument that motivational research amounts to manipulation, and shows how the understanding and modification of human behavior is necessary for progress. Dichter's survey and analysis of behavior ranges widely. He examines everyday matters of product choice, as well as such broad civic issues as voter participation, religious toleration, and racial understanding. He shows that in order to

achieve socially constructive goals, it is necessary to move beyond theological exhortation, which takes an unrealistic view of human morality, as well as beyond the limits of empirically oriented social science research, which only deals in appearances. Dichter sees human action as rooted in irrational and often unconscious motivation, which can usually be uncovered if the correct approach is used. In his consumer research, he analyzes the nonutilitarian importance of objects in everyday life, as well as how products and materials become bound with emotional resonance or acquire different meanings from different contexts or points of view. Dichter shows that success depends on the satisfaction of desires and a movement beyond the ethic of work and saving. Arguing that in an increasingly technological world, progress and social harmony are materially based, he advocates a morality of the good life in which prosperity and leisure lead to greater h

The Neglected Majority Dale Parnell 1985 Designed for high school and community college leaders, this book examines a number of issues related to student success, learning continuity, individual differences, and the lack of community college involvement in secondary education; and offers a proposal for increasing high school/community college program cooperation and coordination. After chapter I examines some dilemmas faced by educators in defining excellence, chapter II looks at the effects of technological, educational, and socio-economic tensions on educational excellence. Chapter III highlights such barriers to excellence as unfocused learning, loss of continuity in learning, failure to accommodate individual differences, and unfounded images about learning. Chapter IV offers a model of careers education as a learner-centered bridge between subject-matter disciplines and the competencies required by modern life. In chapter V, the "Opportunity with Excellence" philosophy is proposed as the basis for the community college mission, and a policy statement for the associate degree is presented as developed by the American Association of Community and Junior Colleges. After chapter VI underscores the importance of cooperation and coordination between the high school and the community college, offering examples of successful efforts around the nation, chapter VII delineates the assumptions and characteristics of a 2 + 2 Tech-Prep/Associate Degree Program, which blends the liberal and practical arts in a coordinated program that begins during the last 2 years of high school and culminates with an associate degree. Finally, suggestions for cultivating excellence are presented. (LAL)

Disciple IV Abingdon Press 2005-05 **DISCIPLE IV UNDER THE TREE OF LIFE** is the final study in the four-phase **DISCIPLE** program and is prepared for those who have completed **BECOMING DISCIPLES THROUGH BIBLE STUDY**. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for **DISCIPLE IV: UNDER THE TREE OF LIFE**. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to

videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with

lessons that go down easy. You'll be laughing and learning at the same time.
