Project Set Strategies
F.G.J. Derkinderen 2012-12-06 Project Set Strategies focuses on an issue of vital concern to corporate managers: the development and implementation of strategy. Regrettably, this topic has received too little attention in the literature of finance and has been treated in completely in the management journals. In fact, not everyone recognizes that it falls within the sphere of finance. However, since the important issues discussed in this book strategically shape the destiny of the company and can seal its fate long before the point is reached where conventional finance considerations come into play, it is essential that this recognition be acknowledged. From the management point of view, it has long been realized that strategic elements play a crucial role in the continued well-being of the firm. Nevertheless, this truth is overlooked to some extent with most management techniques since there is insufficient typification, often leading to unjustified generalizations and inadequate attention to the requirements of the specific situation. Also, these management techniques are not grounded upon the long-established financial axiomatic theories of valuations and thus can lead to misdirected guidance. Since the two academic disciplines of ‘management’ and ‘finance’ have much insight to offer each other, this book represents an effort to link the strategic management area to a theoretically sound and usable financial e- economic foundation. In this way, the probability of errors of omission or unjustified finial generalizations is decreased and help is offered for ascertaining more relevant goal-directed recommendations.

Strategic Management for Government Agencies
Navin Girishankar 1998-01-01 This paper presents a conceptual framework for the strategic management of government agencies in developing and transition economies. It delineates a working model of an efficient government agency for which core strategy, internal organizational design, and external environment are aligned. It then demonstrates how the objectives of public sector management are ideally based on assessments of ‘areas of misalignment’ in government agencies.

Strategic Management in the Maritime Sector
Michael Roe 2019-05-23 First published in 1999, this volume explores port strategic management in Poland and Germany. It is part of the Plymouth Studies in Contemporary Shipping series and represents a unique collection of papers and edited texts from the leading maritime institute in Western Europe at the University of Plymouth. It covers all aspects of the industry from operations through to the logistical framework that supports the sector. Designed both for practising academics and the shipping and ports industry itself, the series combines the output for some of the leading academic commentators in the world from the UK, Korea, Germany and Poland, is an original and new contribution to the maritime debate.
